Thread: [OmegleInteract - Interact with users on Omegle](#)

badbrains - November 4, 2012, 3:25 pm

I got pretty bored and made a script last night that interacts with users on Omegle.

It can be used for almost anything. Bots, spam, spreading, etc...

It is available on GitHub, <https://github.com/xxOrpheus/OmegleInteract>

Here is an example hub, which will imitate what the user says:

PHP Code

```
<?php
require_once('class.omegleinteract.php');
define('TIMEOUT', 15);

$imitator = new OmegleInteract();

$imitator->setChatID();
$imitator->notifyTyping(true);
// $imitator->setProxy('76.73.26.76:3128', true);

$lastMessageTime = time();
while(true) {
    $event = json_decode($imitator->getEvents(), false);
    $event = @end($event);
    $timeout = time() - $lastMessageTime;
    if($timeout > TIMEOUT) {
        $imitator->setChatID(true);
        $imitator->setChatting(true);
        $timeout = time() - $lastMessageTime;
        sleep(2);
    }
    if($event[0] == 'gotMessage') {
        $msg = $imitator->getLastMessage();
        $msg = $msg['msg'];
        $imitator->sendMessage($msg);
        $lastMessageTime = time();
    } else if($event[0] == 'connected')
        $lastMessageTime = time();

    if(!$imitator->isChatting())
        echo '['.date('h:i:s').'] <Omegle> Looking for a stranger to chat with.' . "\n";
}
?>
```

I wouldn't recommend usingg that, it got be banned from Omegle in like three chats LOL.

???ø?y????? - November 4, 2012, 4:00 pm

Please fix the thing please :D

badbrains - November 4, 2012, 4:07 pm

Did you get the actual class itself lol....

Btw, you can't run this on a shared host lol, it needs to be run via CLI.

???ø?y????? - November 4, 2012, 4:21 pm

Ohh haahaha, I tried running it on unlimitedmb.com ?

badbrains - November 6, 2012, 3:17 pm

I used the class to make it so users can talk with Pandorabot.

Look at how many people it talks to! I could be making so much money!

Also, I found out that if you click send feedback on the main page, type "banned" in the body, it auto-unbans you ?

???? - March 21, 2013, 5:24 pm

lol interesting.. mind sharing the code with integrated pandorabot?

badbrains - March 21, 2013, 5:40 pm

I don't have it anymore, sorry.

its k., found your code on skyrealm, is that it?

you see, i'm on a slow net so can't do anything interesting, planning on making this run from a browser with ajax and have fun lol

badbrains - March 21, 2013, 6:18 pm

Yes I think that is it lol, I forgot I posted it there.
