Thread: [FYIBooter V5.0](#)

Kyle FYI™ - November 4, 2012, 7:12 pm

As some of you know, past few months I have let FYIBooter die. I don't want this to happen as I enjoy running FYIBooter. I hit some real life problems and ran in to some big money issues. Because of this happening I couldn't keep the servers to FYIBooter V4.0. And to be honest I was pretty much ready to let it go.

I am now a lot better, still have the money issues but I am hoping to try and find a way around it.

Because of this, I am making FYIBooter V5.0. I wont much change from V4.0, but I will be recoding it, redoing the whole system and making it more stable. As at the moment the source and system is just plain shit. I know I can do better and I will do better.

I am planing on releasing V5.0 next month or in the new year.

Now, I know a lot of people didn't get there full member ship. Because of this, ALL members to V4.0 will be getting a free month and lifetime users will get 60 seconds added on to there package.

I will be hiring a high end support team and reseller. The reasoning behind this is because then I don't have to deal with support, sales and updates and up keep and everything like that. So this time i'll be splitting the jobs up. Because before I was the only person running FYIBooter and helping with FYIBooter...

I will be doing a bate stage, this will hopefully run from the 1st of December to the 9th of December then giving me one day to get it hitting at full power for opening the booter publicly on the 10th.

If everything goes to plan I hope to have this released on the 10th of December and out of beta stage.

If you are looking for somebody to just answer support tickets I could do it for free because I have nothing better to do.

Lol buddy you made my day ?

Falconw0w - November 4, 2012, 9:02 pm

Will be waiting to see the outcome Kyle. Good luck on this.

Tangy - November 5, 2012, 12:56 am

good luck Kyle, hopefully things turn out great!

Deer With No Eye - November 5, 2012, 2:04 am

Welcome back Kyle, I've missed seeing you on Hackforums!

Come onto skype and hit me up really quick senor ?

MattyBoi - November 7, 2012, 3:35 am

cant wait to get 60 seconds added <3

I'll be happy to test this out and report bugs etc when it comes out.

+Awesome - November 7, 2012, 4:38 am

That avatar yeah. ? Glad to see you back man. You better come to me for gfx. ?

?Nami - January 7, 2013, 5:38 pm

Looking forward to the release! Don't use Booters anymore, but they were fun to play with when I wasn't familiar with Botnets. I'm sure this will be HQ

Human75 - January 7, 2013, 6:29 pm

Market is flooded with shitty booters. They all use same shitty scripts C+P > new booter.
