Thread: [\[BATCH\] Scare your friends, simple script](#)

Simmesson94 - November 5, 2012, 6:16 am

Hello HF!

I just put this together in school during a break and i thought it would be worth sharing for everybody who would like giving their not-so-technical friends a scare.

Nothing fancy really, just kinda funny when i watched my friends face while executing this.

I use this with a simple .vbs i named template.vbs(for non-suspicious reasons), and for those who don't know what a .vbs is; It's a message popup box that comes with windows. The principle for creating a .vbs is the same as creating a .bat, just a diffrent code format.

I'll post the .vbs code i used in my .vbs below the batch code.

Feel free to edit and stuff! (obvi)

Code @echo off

title input name CRACKING SOFTWARE

echo all your base are belong to us

set /p value=To start press 1, to exit press 2:

if %value% == 1 goto :hacking

if %value% == 2 goto :bye

:hacking

cls

echo Hi

ping localhost -n 2 >nul

echo This is your custom-built server cracking software by input name

ping localhost -n 3 >nul

echo Going into load mode to load all exploits

ping localhost -n 3 >nul

cls

echo loading.

ping localhost -n 2 >nul

cls

echo loading..

ping localhost -n 2 >nul

cls

echo loading...

ping localhost -n 2 >nul

cls

echo loading.

ping localhost -n 2 >nul

cls

echo loading..

ping localhost -n 2 >nul

cls

echo loading...

ping localhost -n 2 >nul

cls

```
echo All exploits loaded!
ping localhost -n 4 >nul
cls
echo deleting c:\windows
ping localhost -n 2 >nul
cls
echo deleting
ping localhost -n 2 >nul
cls
echo deleting--
ping localhost -n 2 >nul
cls
echo deleting--
ping localhost -n 2 >nul
cls
echo deleting--
ping localhost -n 2 >nul
cls
start template.vbs
cls
ping localhost -n 2 >nul
shutdown -s -t 30 -c "WINDOWS FATAL ERROR, RE-INSTALL WINDOWS PROPERLY"
cls
pause>nul
exit
:bye
echo Bye
pause>nul
exit
And the .vbs code
```

Code x=msgbox("WINDOWS FAILURE", 48, "Windows error")
And remember, don't claim to be something that you're not unless it's a joke.

#YOLO - November 5, 2012, 6:18 am
What exactly does this do?

And dont ask for rep

Simmesson94 - November 5, 2012, 6:20 am
This shuts the computer down. Nothing more, nothing less.
Except the scare ofc
