This is an easy tutorial for all you n00bish hackers that want to make DVD rips.

Let's start off with a few tools to download.

1. Get DVD Decrypter

http://www.mrbass.org/dvdrip/SetupDVDDecrypter_3.5.4.0.exe

2. Get DVD Shrink

<http://www.dvdshrink.org/where.html>

3. Get Ripit4me

<http://#.org/tor/3672229/RipIt4Me>

4. Get FixVTS

http://www.free-codecs.com/FixVTS_download.htm

Now...install them all and run the Ripit4me. Follow the online instructions. Post if you have a problem and I will try to help you out.

Or i could send u pac-mans dvd win image creator

Igkg32072 - February 20, 2008, 2:10 pm

use DVD decryptor it's a very useful thing it also burns iso files such as videogames i tried Guitar Hero 3 but my ps2 doesnt recognize the format maybe you'll be lucky

Trowelfaz - February 20, 2008, 2:37 pm

To rip videogames on a PS2, you either need a modchip in it or something like HDLoader (or the memory card Independence exploit) . Xbox360 needs a modchip or the DVDRom firmware hack. Wii needs to be chipped. Dunno about PS3, but I assume modchip as well. After you mod your console to bypass whatever CD/DVD checks it performs, you may still need to do some security sector mods or game patching before burning.

Im ing this thread however old it might be because its a good tutorial 4 n00bs

nanobyter - *November 28, 2010, 1:17 pm*

i know you guys hate OLD OLD b u mps but this is good for newbies :)

Kronesin - *November 28, 2010, 2:55 pm*

You could also use dvd clone, Its much faster and easy-er. You just have to hit one butten

Toxin - *July 23, 2012, 2:03 am*

dude this is so beast im glad you taught me this

GreenPanda - *July 23, 2012, 2:20 am*

Umm, why did this get ed exactly?

Probably a troll

KitCat - *June 1, 2015, 8:14 pm*

Thanks bruh

copying porn right now
