Thread: [\[Short TUT\] Making a rollover button that flashes \[Short TUT\]](#)

Nezami - March 5, 2010, 2:02 pm

Hi guys I am going to show you how to make a rollover button that flashes when you rollover it.

To start with you will need 2 images.

- Don't HAVE to be same size but it looks better
- Prefibly the same image, E.G A blue question mark and then a red question mark

So once you have your 2 images, I'm going to use 2 question marks from RuneScape, open up VB and make a new project and then add 2 "Picture boxes"

[IMG][http://i48.\[censored\].com/20qakxf.jpg](http://i48.[censored].com/20qakxf.jpg)[/IMG]

Now once you have done that, go to the one you want to show SECOND and go to properites then scroll down to "visible" and set as "false"

[IMG][http://i48.\[censored\].com/182bs1.jpg](http://i48.[censored].com/182bs1.jpg)[/IMG]

Now, double click the first picture box (the one that is visible at the start) and then go to the top right and select "MouseMove"

[IMG][http://i47.\[censored\].com/343rlgp.jpg](http://i47.[censored].com/343rlgp.jpg)[/IMG]

Now type in this code

```
Code PictureBox2.Visible = False
```

```
    PictureBox1.Visible = True
```

Ofcourse replace the "picturebox2" and "picturebox1" with which ones you want.

[IMG][http://i48.\[censored\].com/29xjhv8.jpg](http://i48.[censored].com/29xjhv8.jpg)[/IMG]

Now once you have done that, go back onto your form and double click the OTHER button, the one that appears after rolling over the first one, and go to the top right again and select "MouseLeave" and put this code

```
Code picturebox1.visible = false
```

```
picturebox2.visible = true
```

[IMG][http://i47.\[censored\].com/2qwki0k.jpg](http://i47.[censored].com/2qwki0k.jpg)[/IMG]

And that's it! To make the buttons better, put one on top of the other then it will look like it flashes rather than a different image appearing.

Thanks for posting :D

Deathader - March 5, 2010, 3:25 pm

It's better to use a single picturebox and rotate the images from the resources. It's less messy.

Can you please show me the source? Im new at VB as well xD

phyyyyyy - March 5, 2010, 4:04 pm

Far from a TUT, i didnt learn jack shit except how to copy and past crap.

but, i would of done it like the other dude stated, and simply use the "Mouse Enter" & "Mouse Leave" events.

```
Code Sub ME handles picturebox1.mouseenter
picturebox1.image = my.resources.image2
end sub
```

```
Sub ML handles picturebox1.mouseLeave
picturebox1.image = my.resources.image1
end sub
```

Sub ML handles picturebox1.mouseLeave
picturebox1.image = my.resources.image1
end sub
```

Well maybe you shouldn't just copy and paste shit and actually read the code yeah?

Very, Very nice and short, I never new this could be done!

Well done mate.

Incomplete - *March 6, 2010, 4:46 am*

I have this in my tut. And much more!

But, still nice none the less.

Nezami - *March 6, 2010, 8:39 am*

Thanks for feedback guys :D
