You don't get paid for crashing a website.. Explain your plan, please? Boggle
All your posts seem to involve you gaining money, have you tried a job or are you avoiding that?

blacksage - October 9, 2008, 12:02 pm

Yea I'd have to agree with the Rat person above me. Why? You won't get paid. You won't crash any company thats worth crashing. You probably won't even crash a persons desktop.

The 100 post rules is a rule on the forum if you don't respect it, you won't have your forum and your clan. It's Omni's rule not a rule that you can disrespect.

oh lolz i didnt know...

Vaqxine - October 9, 2008, 1:25 pm

You can join a clan with under 100 posts but you won't be an official member until then.

Historic Moron - October 9, 2008, 2:58 pm

btw as of for now with your post you cant make a group and i doubt your going to be able to make it

i won't join but i have my own and if i where you since your the boss i would get a rat program and tell my employees that you will get paid as long as i monitor you doing your job which will be ddos'ing other websites you tell them to do and to pay them equally go to a few clicking advertisement pages that allow you to make money by clicking on adds and how you will pay them is by them opening a p.o box and that way your untraceable. or if your a drug runner making money like that then pay them buy selling the stuff you grow lol if you know what i mean but i don't know your clan sounds good and yes it can be done and that's not all you see a lot of people don't know that there are special ways to stop the website from seeing ddos attacks even if they have ddosing security lol like security even matters anymore as long as you can program your ddos program to be encrypted and be like a worm that is totally fud forever then you will never be found out but it takes some major skill that not even i can do at the moment but a great ADMINISTRATOR told me it could be done and so that's what i have to leave you with my friend i hope your team goes well and if something happens i might join you and that way we can recruit more members and we will be the best dam ddos team there ever was and will be.
and plus you guys should see my other post
