Thread: [\[Direct Download \]Worm Hole Builder || Stub, Builder Src, and Stub src](#)

?asp3r - November 7, 2012, 3:58 am

Grave dig much ? The files were on my computer where the hard drive died. Sorry.

I found my old source for Worm Hole and have compiled the builder and a fresh stub.

Vir Scan of Wormed server (wasnt fud to begin with):

Vir Scan for Builder:

Vir Scan for Stub:

Yes I know it is not FUD, but it is still a working worm.

Normal only gets the Builder and stub, But Uber and Leet receive the whole package

How to get this?

[Normal Memeber] Post here & wait

[Leets] Post here and PM

[Ub3r] Just PM

Just FYI people check neg reps. and you are "known" for leaking stuff.

So I think I'm going to use discretion and say no.

Sorry about that.

Unless you can compile a program based in Visual Basic, then no.

also, I'm not going to compile it on a mac, so to get the source to compile your own it's leet/ub3r
