Never blurr the skin... x_x

The tut is clear and easy to understand though, so GJ with that one. But the skin blurring technique has to go if anyone aims to get pro at this... I love retouching. ^_^

One word... No.

It's a lot simpler to blur it, because when you edit with the healing brush and apply blur, you can get awesome results. ?

Nice tut, that is pretty impressive. Would you happen to know to take text out of an image without cropping it? for example...

Anyway to remove the 'Fuel TV' logo without cropping it? Keep up the great work and thanks!
