Thread: [Pastebin Uploader](#)

Edward Kenway - November 7, 2012, 8:54 am

Hello everyone

I made a simple pastebin uploading tool.
I'm releasing it open-source and free to use.
This is for educational purposes.

Nice release but can you post some virus scans?

CyNecx - November 8, 2012, 9:28 am

WTF u dont need a VirusScan there is also a source ?
Just download the damn source compile run ?

iSellStuf - November 8, 2012, 9:33 am

Check if your script is protected of SQLi attacks :)

Koolg223 - November 8, 2012, 10:37 am

Not to be rude, but does this really save you anytime? Anyway, I'm sure it will help people learn, so thanks for posting.

Sql injections in a script wich doesn't use any form of db at all and above all is a .NET project so no, just no.

ontopic: looks nice will look into the source asap

SomeWhiteGuy - November 8, 2012, 12:09 pm

I made a library using PasteBin's API:

<https://hackforums.net/showthread.php?tid=2589902>

The source is in VB; although you can still use the actual library in C#.

Edward Kenway - November 8, 2012, 12:28 pm

Thanks for the good comments.

I don't need to protect for SQLi o.O There are no databases used.

It's all using the Pastebin API.

Hmm, I will look forward to it SomeWhiteGuy!
