Thread: [I have a virus and its making a ton of files read from Hard drive](#)

mrgray - November 8, 2012, 11:24 am

Here's what it looks like

=====

Disk usage

=====

Image | PID | File| (continues)--->

SearchProtocolHost.exe [21516] (Name of location and file name .tif)

=====

File read/write rates

=====

Read (B/sec)| Write (B/sec)| I/O Priority|

88,07,815 | 0| Background|

=====

Theres tons of these in my disk process's i don't know why
and also it slows the crap out of my desktop thats running I7 8gb ram
And i think it also makes tons of .dll's run really high also

Thanks man

I haven't been on here in forever
