Thread: [Whats the difference of BlackShades Rat and Blackshades NET?](#)

Crotex - November 9, 2012, 4:13 am

Whats the difference, and what do you recommend?

redpois0n - November 9, 2012, 5:17 am

Is blackshades rat old blackshades fusion renamed?

logging*machine - November 9, 2012, 6:08 am

Blackshades RAT is a stealth version

BlackshadesNET is the un-stealthy RAT

Mises - November 9, 2012, 6:38 am

BlackShades NET is coded in VB6 and contains a wide range of features, some of which are unavailable in BlackShades Stealth.

BlackShades Stealth however, is coded in Java making the overall performance of the RAT much quicker than BlackShades NET.

In addition, BlackShades Stealth encrypts your traffic with AES and is also not HWID locked.

You can find additional information about our products [here](#).

Trolly Trollerson - November 9, 2012, 1:17 pm

No, the binary BlackShades Stealth compiles is coded in C.

Although, the client should be able to function properly on a Mac.

D(A)(R)K R??\$O?™ - January 13, 2013, 3:46 pm

What crypter for BlackShades Stealth to infect a Mac ? What is the best crypter compatible for mac infections ?

Thanks.

Skiezo™ - January 13, 2013, 5:28 pm

(Jan 13, 2013 04:46 PM)D(A)(R)K R??\$O?™ Wrote: [\[CITE\]](#) What crypter for BlackShades Stealth to infect a Mac ? What is the best crypter compatible for mac infections ?

Thanks.

BlackShades Stealth cannot infect a Mac, the output of the created server you make on BlackShades Stealth, is a Executable file. You can't run that on a Mac system.

D(A)(R)K R??\$O?™ - January 14, 2013, 4:11 am

Ok, I see...

thank's for the information.

Floziko - September 30, 2013, 7:32 am

Stealth is much faster but NET has more features. Simple enough.

Albertozinzogat - September 30, 2013, 11:10 am

Do you guys have any detailed information about the Blackshades Crypter?

If yes PM me and let me know. Tnx.

vodka1087 - October 1, 2013, 4:18 am

I got the crypter with Blackshades Full.

Really good stuff. I like the fact that it's web based. Can make fud from anywhere ;)

simdia - October 12, 2013, 11:08 am

blackshades net is better if you are like me and like to have many features!

h2ck3r - October 13, 2013, 9:02 am

Blackshades NET has most features. It has more features than any other RAT around here like combined together...

Stealth has way less features but for sure one of the fastest and most stable RATs.

MarketExpert - October 15, 2013, 4:55 pm

Blackshades NET is just better. no need to argue why

Omgklutch - October 17, 2013, 3:30 pm

NET is faster and better in all ways. its the best rat currently our there.

prizraka666 - October 18, 2013, 1:28 pm

yes blackshades net is the fastest and most stable rat.
i havent tried stealth that much but im quite sure a rat cant get much better than blackshades net.

ugobest - October 21, 2013, 4:21 am

Blackshades NET is the best RAT out and that's why you should be getting it instead.

aka007 - October 28, 2013, 4:23 pm

Yes it's the best RAT out there, definitely!

Prehtends - November 1, 2013, 6:05 am

Blackshades NET is faster and just better in all aspects. It's the best RAT on the market!

DarkWombat - November 5, 2013, 4:36 pm

Blackshades NET is really good. There is just something about it that makes most people fall in love with it, maybe all of those features?

_pc_man_ - November 10, 2013, 11:13 am

Blackshades is very effective and opens up possibilities to make good amount of cash.

Shabloski - November 13, 2013, 8:42 am

I have got tons of RS accounts already by using Blackshades. As many say, blackshades is the only rat opening up possibilities to earn money.

Mind showing some proof here to let people see?

??Tommy - November 15, 2013, 6:33 am

Stealth is allot more faster but last less features, It's the newest blackshades projects.

beastt - December 2, 2013, 11:22 am

Does blackshades even work anymore? I bought it a few years ago and it stopped working a few months later.

Kayness - December 2, 2013, 11:23 am

Features is the main answer, .NET has more features, hence its price.

maches - February 9, 2014, 7:15 am

Blackshades NET is better feature-wise but Stealth is still considered the fastest RAT ever in my opinion.

Your Offline - February 9, 2014, 7:24 am

thank's for the information.
Look into jRat and multi-system rats.

Deathskull - February 9, 2014, 7:32 am

Blackshades products are the best quality on HF.
Im saying this by past experience with other paid RAT here.
