Gentlemens,the new Simcity costs 20\$.

You guys will have to understand that the user might enter and play for a while as everyone that bought the game wants to play it.So you should play whenever the user doesn't so he would not notice,the savegames are on your pc and cities,so don't worry about that.

I have accounts available,not sure how many but i do.LE,Deluxe,Normal most of them.

You can add me on skype to purchase or request more infos.

SimCity can be bought (legit) from Origin (through india) at like \$30 (£18)

20\$ but i can offer le or deluxe wich costs 60+20\$=80\$.

I do not think it can be that cheap also there's the problem to find people to sell to you or where to transfer the curency and etc.

If you want you might also buy it from there it's up to everyone.

ODDSAC - March 11, 2013, 2:23 pm

the deluxe was £18, it's as simple as changing location temporarily in Origin and using an Indian proxy.

I'll just end this here.It's up to each user.This is my offer.The price mgith be bigger or not so easy to acces or you might also need a VPN to play the game wich would suck.Thanks for the infos but please try not to trash sales next time ok?Thanks.

anatho - March 11, 2013, 5:14 pm

For EA India you need Indian VPN, also this might not be region-free. You will need an Indian address, Indian credit card etc.

Very complicated thing.

About the EA accounts sold here, you say, I should play when the user does not play. But how should I know when he does not play???

Well that explains how I bought it with my English address, English credit card whilst using AdvTor to appear from india.

Everywhere comes with English language selectable, except Russia.

Very complicated thing.

About the EA accounts sold here, you say, I should play when the user does not play. But how should I know when he does not play???When you try to login ,if the user si currently online you'll recive a pop-up saying that the account is currently connected somewhere else and you'll be asked if you want to go offline more,exit or kick the current user and go online.

So only I receive this pop-up or also the original user? Because if he gets it too, he will know that a second person is logged in to his account and will immediately change password ..

Everywhere comes with English language selectable, except Russia.

ok I will try this ..

because somebody told me you have to give an Indian address
