Orianthi - November 10, 2012, 1:33 pm

it looks bad but i think you should remove credit for the quote as it symbolizes its not yours and when you deface site its best to have it look like yours also the credit of all people isn't needed just Add this Hacked by"USER/Group"

Also why not have like bg music or something?

What has html with graphics to do in SQLi section ?

Show us your SQLi command how you did it. That is what we expect (and discuss) in this section ?
