Thread: [\[TuT\] \[HQ\] How to Setup Cybergate V 1.07.5 \[TuT\] \[With Pictures\]](#)

NoodleBot™ - November 10, 2012, 4:38 pm

Advertisement

Hey there. I'm seeing a lot of frustration, with new members as well as some of our experienced users having trouble setting up these RAT's.

I want to end these struggles today by giving you all this simple easy to follow walk through. Just follow basic steps.. and you have your RAT setup. I will make a separate walk through for DarkComet, and BlackShades, as well as port-forwarding.

-How to Setup Cybergate 1.07.5=-

By

NoodleBot™

Steps before proceeding

Ensure you have a RAT to work with here.

Cybergate V 1.07.5 - <http://www.mediafire.com/?5o5dgwb4uy53s9y>

(uploaded by me for another thread)

Ensure your antivirus is turned off completely before using the RAT. When your antivirus software is on, it will detect the RAT and add an injection detection. Basically, by saying this, I mean that it will send a copy of your RAT server to it's manufacturer. So if you have Avira, turn it off, or you will see more Avira detections. Etc etc etc. Very simple rule, and this universal rule applies for all types of malware and cryptography.

-CyberGate Server Instructions-

Step 1:

Click on Select Listening ports and do something like this.

Step 2:

Step 3:

Step 4:

Step 5:

Step 6:

Disable ALL OF THIS SHIT, this leads to a quick detection rate even if crypted.

Step 7: Server Completion (Build)

Hit Create Server.

Your server is essentially now ready to crypt and ready for its next stages. I will release another thread on port-forwarding soon - stay posted.

iPodTouch3x3 - November 10, 2012, 4:43 pm

Nuudle's a HQ member

I love his TuTs they are very indeed useful~

#Skyline - November 10, 2012, 6:09 pm

I understand this is a HQ tutorial

But couldn't you post this in the tutorial section?

This is a RAT section.

Thanks :)

NoodleBot™ - November 10, 2012, 6:12 pm

(Nov 10, 2012 07:09 PM)#Skyline Wrote: [\[CITE\]](#) I understand this is a HQ tutorial

This is a RAT section.

Thanks :)

I felt if it was not in the RAT section it would be ignored by hundreds of pesky skids wanting to have someone set it up for them.

walsallboyz - November 11, 2012, 11:50 am

hey mate thank for that but do u no any think about crypting as i dont really no much

NoodleBot™ - November 11, 2012, 12:56 pm

(Nov 11, 2012 12:50 PM)walsallboyz Wrote: [\[CITE\]](#) hey mate thank for that but do u no any think about crypting as i dont really no much

There's a cryptography section here: [Cryptography, Encryption, and Decryption](#)

As well as the premium section for it's crypters here: [Premium Sellers Section](#)

ZeusGod13 - November 11, 2012, 4:56 pm

really nice tutorial

well written
good job mate :)

Che Guevara - November 11, 2012, 5:02 pm

Good job mate most TUTs about rats I have seen here did not tell guys the right settings to be able to crypt it right. This will be helpful for many noobs and others. Well done.

#Skyline - November 11, 2012, 7:29 pm

But i did report it, and it did get moved. Because it is a tutorial. I understand your point of view OP, but it is the rules.

That's fine with me, you've made your point.

shadey960 - November 12, 2012, 12:08 pm

thnks for guys helps i love of cybergates espasially my victims now

NoodleBot™ - November 12, 2012, 12:54 pm

(Nov 12, 2012 01:08 PM)shadey960 Wrote: [\[CITE\]](#) thnks for guys helps i love of cybergates espasially my victims now

No problem glad I could help out man.

Floppy - November 13, 2012, 2:13 pm

Nice tutorial! This really helped me out!

pashabiceps - November 13, 2012, 2:40 pm

Nice tutorial but there are lots and lots out there... People should use the search function more often

NoodleBot™ - November 13, 2012, 3:16 pm

All current tuts show the users favourite or recommended settings. These settings in my TuT will work 100% and cryptable.

war123 - November 13, 2012, 8:28 pm

wow.very nice tutorial..

thank you....hope you teach me how to port

forward...

krueger24 - November 13, 2012, 8:31 pm

good tut on this. i like it alot. good steps

NoodleBot™ - November 13, 2012, 9:18 pm

Thanks ;0 that means a lot. Glad I helped!

immortalwon - June 7, 2014, 2:40 pm

Why doesn't this open in sandbox? Suspicious to me.

Talu - June 7, 2014, 3:34 pm

Tutorial looks HQ. Thanks for posting.

MaxResist - June 11, 2014, 2:35 pm

Thank you for this tutorial! Will give it a try!

traczthefox - June 11, 2014, 3:36 pm

Okay so this is like a new RAT correct?

I am just really seeing this now I have heard about it here and there since my return but never knew what it was.

Cannooo - June 11, 2014, 4:18 pm

It's about 2.5-3 year old as far as I remember, so it's kinda old actually.

NoodleBot™ - June 11, 2014, 4:35 pm

It is quite an old piece of malware however it does not take away from it being free, well coded and in a stable language.

traczthefox - June 11, 2014, 5:03 pm

(Jun 11, 2014 04:35 PM)NoodleBot™ Wrote: [\[CITE\]](#) It is quite an old piece of malware however it does not take away from it being free, well coded and in a stable language.

Alright this is the first time I have heard of it.

Works on linux and windows?

NoodleBot™ - June 11, 2014, 5:05 pm

Just Windows I believe, unless you are able to run .exe's on your flavor.

traczthefox - June 11, 2014, 6:15 pm

(Jun 11, 2014 05:05 PM)NoodleBot™ Wrote: [\[CITE\]](#) Just Windows I believe, unless you are able to run .exe's on your flavor.

Alright thanks. I was mainly looking for a linux one though.

Im still going to give this a look.

traczthefox - June 13, 2014, 3:59 am

damn this thread kinda died off.. good thing I have questions!

What features does this have?

Any that darkcomet has?

And would you use this over darkcomet?

Justin Bieber x - June 13, 2014, 7:23 am

Wow thanks for this share mate , really needed this!

kameolite - June 13, 2014, 8:51 am

Really nice tutorial,well written,good job ,thank you!

NoodleBot™ - June 13, 2014, 5:07 pm

And would you use this over darkcomet?

Mostly the same as darkcomet, but with maybe a few different features. The basic idea is the same, but I'd prefer Darkcomet.

Some people have an issue with CG files once crypted they flash a cmd prompt on the victims screen.

Yeah. my problem is I have no crypter lol.

I am currently reading up to make my own and I might give it free or for like 5 bucks and they can give it to who ever they want for all I care as long as they don't scan it!

Thats how crypters don't stay FUD.

anyways thanks for responding to me questions. ?
