Check us out at <http://Epic-Software.net/> for more information and upcoming products!

Hey there. I'm seeing a lot of frustration, with new members as well as some of our experienced users having trouble setting up these RAT's.

I want to end these struggles today by giving you all this simple easy to follow walk through. Just follow basic steps.. and you have your RAT setup. I will make a separate walk through for DarkComet, and CyberGate, as well as port-forwarding.

-How to Setup BlackShades 4.8 + and Beyond Editions=-

By

NoodleBot?™

Steps before proceeding

Ensure you have a RAT to work with here.

You must purchase this RAT from

- <http://www.blackshades.ru/index.php>

Or by contacting BlackShades on HackForums by using the link below.

[_ ? 15\\$ \[RAT\] BlackShades NET v5.5 - No Dependencies | Best on HF | VPN | Linux/MAC ? - OFFICIAL SALES THREAD](#)

Ensure your antivirus is turned off completely before using the RAT. When your antivirus software is on, it will detect the RAT and add an injection detection. Basically, by saying this, I mean that it will send a copy of your RAT server to it's manufacturer. So if you have Avira, turn it off, or you will see more Avira detections. Etc etc etc. Very simple rule, and this universal rule applies for all types of malware and cryptography.

-BlackShades Server Instructions-

Step 1:

Click on Settings and do something like this.

Step 2:

All other settings are optional and require you to read the PDF provided when you purchase Blackshades. ?

Your server is essentially now ready to crypt and ready for its next stages. I will release another thread on port-forwarding soon - stay posted.

Hedex - November 10, 2012, 5:30 pm

Can I ask, why do we need this thread? There is a full setup guide that comes with blackshades. And why are you doing a 4.8 guide? It is on 5.4 right now. ? Also, correct your site to wear people should purchase it from. It is .eu, not .ru.

- 1) People ignore the smallest of details.
- 2) The title is 4.8 + and beyond, which means the setup is exactly the same as 4.8 and just as easy.
- 3) The site works just fine for me, maybe you need to adjust something for your country. Google it if anything.

3) The site works just fine for me, maybe you need to adjust something for your country. Google it if anything.Hm. I didn't even know that was a legit domain. I always go with what they're linking me to. <http://bshades.eu/> was the only legit site I thought. It even sends you to <http://bshades.eu/> on all of the sales threads. (Not sure if that is to do with where I am from or what) But what I was saying was, there are plenty of more detailed TUT's here and also, that PDF TUT has everything in it you need to know...

???ø?y????? - November 10, 2012, 5:38 pm

You should do one for ControlME Rat also.

Hedex - November 10, 2012, 5:41 pm

(Nov 10, 2012 06:38 PM)lownyourrat Wrote: [\[CITE\]](#) You should do one for ControlME Rat also.Why does he? ControlME is one of the easiest, if not the easiest RAT's to setup. Don't quote me on that, because I use to sell it. My friend already made a detailed TUT on YT for it anyway.

#Skyline - November 10, 2012, 5:43 pm

I think this thread should be in the tutorial section

iPodTouch3x3 - November 10, 2012, 6:07 pm

Hey nuudles thanks for this tut its really useful like how to setup dc, and your other one's look forward for more tuts from you nuudles!

NoodleBot™ - November 10, 2012, 6:09 pm

You seem to think that just because you know how to set these RAT's up, it makes it simple for other people.

These other people have their own computers and different issues, they want somewhere to learn how to set it up properly.

I would make a tut on ControlMe if I owned it.

And again, most people don't check the pdf file tutorial. Or else there wouldn't be hundreds of tutorials on HackForums.

Apple J4ck. - November 10, 2012, 7:47 pm

Nice tutorial , will definitely help those who need it ..

i used to have problems with that too but i fixed it , thanks .

Thanks mate you feedback is appreciated. Some people don't have/want to open the PDFs ; here is an alternative to those people.

a1kop990 - November 12, 2012, 12:07 pm

great tutorial

it helped me a lot :)

Funky Kong - November 23, 2012, 7:43 am

I have question about the file hijacker. When I put my paypal email in the box it would be easy for the infected guy to track the money right? How can I cover up the money?

Thank you in advance. :)

I honestly wouldn't bother trying that unless target is AFK. Even then they can see where it went to.

a1eks_ - December 31, 2012, 6:05 am

how it can work on mac can someone answer ?
