Thread: [Selling Bitcoins \[Your PayPal for my BitCoins \]](#)

cakepops - November 10, 2012, 5:43 pm

Hello, today I though that I could make a couple extra bucks here and there by selling Bitcoins for PayPal

For every Bitcoin you like I will sell it at 10% of the cost so if a Bitcoin costs 1 dollar you pay 1.10. I would only like to only deal with trusted people and of course I can go first to any trusted exchanger, or we could use a middle man.

My PayPal account is business verified and I can prove it if you would like, I am ordering all Bitcoins on order (I buy when an exchange is needed). All transactions can be done through TeamViewer if you would like, Thank you for your time.

Error from Bitinstant: Internal error

I cannot do orders at the moment as this was my payment method, I am sorry.

seems to me an honest person

I wrote to the PM

So perhaps it is not one of those who only writes

I believe DiamondKing's first language is not English, making it a little bit more challenging for him to type. I believe that he is trying to get across that the other user is possible a scammer and he is warning me, most likely with a previous endeavor with him and possibly by being scammed by him.
