Thread: [\[Help\] In process of making "The ultimate PPD/CPA earning guide"](#)

Hey I'm currently making an eBook and I'm planning to give it away for free.

I WILL upload the eBook in mediafire or any other free file uploading site. It will be a combination of 200+ methods including Fiverr, Torrents, Youtube, Facebook, Google, Getting free domains, Making Youtube accounts in a short amount of time, How to become a professional from faking things, Hi5, Myspace, Twitter new chances etc.

Don't panic. Myspace and hi5 have still some dust that needs to be cleaned off. I have some methods that will help you earn INDIRECTLY using myspace hi5.

The eBook is about 10% complete and I will give it away for free as I said before, but I want it to be the biggest eBook and the most organized one so people won't need to download countless eBooks to succeed in PPD/CPA sites. So that's why I need ideas and tips that will make my eBook the ultimate one. Please help me. Thanks.

You already added way too much "ideas" which a single person can combine. Rather make 50-70 pages and ask someone to see how it looks like, the easiest part is to add more.

I honestly don't think it's a good idea to slam a 3 inch book on someone's face containing all the methods in the world. It would be too overwhelming. I suggest splitting it into parts that focus on different methods rather than one eBook that's a billion pages long that way, if I want to try something, I can just focus on that.

That's a great idea, but please don't start it like all the other ebooks like: Oh here's my story i've been trying for weeks and made this and that... Just make it simple like: #1 Method: -do this -do that, and that's it. If you really finish it and give it out on mediafire i think all HF will be like:

It sounds great, but it will probably be too much for people to handle.
