Thread: [Setup a PuTTY booter with Ghost rider53000](#)

Ghost rider53000 - November 11, 2012, 6:35 am

Need list_____

(1)VPS

(2)PuTTY.exe

(3)WinSCP or FileZilla

(4)Ddos script or viking or Xtreme script_____

Get a Free VPS..._____

(1) PM me for the link for the VPS is only a 3 hour trail

(2) make a account

(3)put in the info and create it

(4) go to your email for the ip to vps and copy the ip username and password....P.s username will be root_____

Set up the Putty_____

(1)Open the Putty.exe or Putty both the same thing

(2)put the ip from the email for the website in Host Name

(3)put a name for the Saved Session and save it when the ip is typed in

(4)when you open it a message should pop click yes or ok

(5) username should pop up type in root

(6)password should pop up type in the password from the email

(7)type in passwd the type in the password to what

WinSCP or FileZilla_____

I have Winscp its better then FileZilla_____

(1) open open winscp it ill ask for host name username pasword

host name =the ip from the email

username=root

password= the password to the login for the putty vps booter

Should look like is

Hostname:1.1.1.1

Username:root

Password:*****

dont use this on its fake on only for show

(2)When log in it should connect

(3)Drag and drop the ddos Script

(4)Right click on and where the number at put 0777 or 777

(5)Save the Session and exit it go back to your putty type in cd Xtreme click Enter then type in ./menu then hit enter there you have a Putty Vps booter

CountZero - November 8, 2016, 9:30 pm

Looks good, can i get the link?? thanks.

And the dropbox link is down :(anyway you can put it on mediafire or something like that?

HackyBoss14 - December 3, 2016, 8:45 am

can you pm me for the vps link

MrSpyrO - December 4, 2016, 6:51 am

Excellent tutorial, I think that for the second part you should place the tutorial to have the free vps.
