Thread: [{TUT} WHATS APP ATTACK. Attack Your Ex- girlfriend and friends {TUT}](#)

sam2011hacker - November 12, 2012, 6:52 am

Hello HF,

yesterday i was using whats app and i thought of something.

i made a huge message, a very long message about 5000 words.

then i copied it and pasted to my friend many times, about 40-50

Now he is unable to open whats app. i tried this trick with my other friends for testing purpose and got the same results. no 1 was able to open it up.
when ever they try to open it, they get a message

whats app isnt responding.

So i thought to share this trick with you guyz. its type of whats app DOS attack ???

SO HERE IS A TUTORIAL -:

1- go to whats app and make a message for about 5000 words. to make suck a long message copy and paste a line 500 times in a single message. then click send

2- now copy the same message which has 5000 words and again paste it and send to your friend.

3- Now do this procedure 50 times and you will see that no 1 is able to open it

NOTE - now the problem here is that it will slower your whats app also and you will also get the same message of unresponding

you can do 1 thing for that. you can download and install whats app on PC
here is a tutorial - <http://www.ruchirablog.com/install-whatsapp-pc/>

Now follow the above procedure on PC and you will se your friends will be unable to open it up.
then need to again install whats app on their androids.

??? MISSION ACCOMPLISHED. ???

PLEASE SAY THANKS IF I HELPED YOU.

We can call this type of attack as W.A.D.O.S attack (whats app DOS attack)

Thanks for viewing

Nice man.

Didn't know this. I'd hate to see my friends have no contact with me though :P
Thank you! :)

Thank you! :)

do it with your ex-girlfriend . get her number and attack her

She'll be like ???

and ull be like ???
