Thread: [\[Updated\] WordListTool for large txt-files \[BIN + SRC\]](#)

G3O - November 12, 2012, 4:05 pm

Hi everyone,

today I release my new WordListTool which can handle large txt-files such as logs,dumps and password lists. All operations are performed by reading and writing files on disk instead of using memory to ensure it is capable of handling real large file (>1,3 GB)

Features [\(Click to View\)](#)splitting txt-file into equal parts (or almost) by number of parts or part size

removing duplicate lines from txt-file

extract data from the txt-file to a separate file using regex

regex pattern for mailadress extration included

regex pattern for http/https/ftp extration included

regex pattern for image URL extration included

Screenshoots [\(Click to View\)](#) [img]<http://imageshack.us/a/img845/304/wlt001.jpg>[/img]

[img]<http://imageshack.us/a/img543/9141/wlt002.jpg>[/img]

[img]<http://imageshack.us/a/img706/1513/wlt003.jpg>[/img]

Upcoming Features [\(Click to View\)](#)merging files

more regex pattern .. feel free to suggest some

viewing txt-files beyond normal TextBox or RTB capability

yeah a better GUI will come

MediaFire Links [\(Click to View\)](#)[BIN](#)
[SRC VB.NET](#)

There is and will be no VirusScan since I release my source.

Please post comments and suggesntions.

mullinupp - November 12, 2012, 4:52 pm

Looks very nice C3O could be very usefull indeed.

Thanks for the share keep it up

Take care

Hi AP ?. Work was too much time consuming, I spendd the last months interely on my construction site.

I know what you mean mate.

University is also very time consuming :S

Hi everyone,

I added a regex pattern for extracting http/https/ftp URL and image URL. Please suggest further regex pattern or post regex pattern to add. Thks
