Thread: [???\[HOT\] HIDE your LASTNAME on FACEB00K???](#)

Twitterr - November 13, 2012, 1:04 am

Hide your Lastname on Facebook!

1.Goto Firefox -- Options -- Advanced -- Network -- Settings -- Connection Settings -- And choose manual proxy configuration.

2.Now Tick " Use This Proxy Servers For All Protocols ".

3.Put this proxy and port

Http Proxy : 202.70.136.142

Port : 8080

5) Put 202.70.136.142 on No Proxy for Box.

6) Now goto Account Settings, Delete Middle Name and Last Name. Then Save!

7) Bravo !! You Did It, Now Your Last Name Is Gone.

???

ZeusGod13 - November 13, 2012, 1:28 am

thanx for the share :)

will try it out later

Can you tell me how this method working?
Last Name is a must, in some places..

i think There are some places FB allows only FirstName

And that proxy belongs to that certain place.

(I found out that proxy was on Indonesia, Jakarta)

nabeel007 - November 13, 2012, 1:57 am

wow it works really great thank you bro.

Jake.kent - November 13, 2012, 1:58 am

would that be Indonesia by any chance or is it Vietnam or the middle east?

Zenety - November 13, 2012, 2:15 am

(Nov 13, 2012 02:04 AM)Twitterr Wrote: [\[CITE\]](#) 5) Put 202.70.136.142 on No Proxy for Box.
What do you mean with this? (Not the most brightest person :P)

Since it's not working for me.

Twitterr - November 13, 2012, 3:02 am

(Nov 13, 2012 03:15 AM)Zenety Wrote: [\[CITE\]](#) What do you mean with this? (Not the most brightest person :P)

Actual configuration on

Firefox -- Options -- Advanced -- Network -- Settings -- Connection Settings

http://img819.imageshack.us/img819/1929/imagegss.jpg

?

SIM-964740 - November 13, 2012, 3:04 am

That's pretty cool man, I might do this later. It will help to make me not get DOXed.

Zenety - November 13, 2012, 3:05 am

?

Thanks for the screenshot. Might not work because I am at school at the moment. Will try it out at home. Firefox gives me the error: Connection is refusing connections.

msd92 - November 13, 2012, 3:17 am

Just checking, are you allowed to change back afterwards (going backwards)? Pretty cool tho!

Edit: It worked, thank's!

But I just want you guys to all be cautious, you are entering someone elses proxy server, and they might see what you are typing just so they can login to your facebook account and steal it (it's a risk).

So before you go do changes, put a simple password that doesn't put your account to risk, after you follow the guide and you're complete, logout and remove the proxy and change the password back!

Twitter - November 13, 2012, 6:22 am

Thanks For Your Help

Can you tell me how this method working?

JasonDotExe - November 13, 2012, 7:34 am

Thanks so much! Work fine :)
Vouch!

spyware - November 13, 2012, 7:40 am

HAHA, highlight of the week, thanks so much for sharing this, it is so awesome

Vouche for this guy :)

duiveltje - November 13, 2012, 10:07 am

heey, thankyou.
this is a few way better.
I'm in the army and now it is even harder for the ones who try to find me.
Thank you!

ibloodqman - November 13, 2012, 10:12 am

DUDEE this is awesome... thanks for the share.. this will freak others a lot!! ?

Mr.Phoenix - November 13, 2012, 10:19 am

Oh oh oh :) very nice share man :) i will check this dude :) thanks dude:)

Exotic Kiwi - November 13, 2012, 10:56 am

Works! but u have to go though some stupid stuff, because facebook recognizes you're connecting from a place you arent used to. But thanks for the tip, my friends are like wtf :D

Twitter - November 13, 2012, 3:40 pm

Thanks for liking the tutorial!
Goodluck

TacticalScheme - November 13, 2012, 6:17 pm

Nice this looks cool. Ill be sure to check it out later!

greenhunter - November 14, 2012, 2:53 am

hh

Nice Proxy Server that you Steal With

Zenety - November 14, 2012, 5:53 am

(Nov 14, 2012 03:53 AM)greenhunter Wrote: [\[CITE\]](#) hh

Nice Proxy Server that you Steal With

Wow, just change ur password after you removed it. Not that hard.. You can also force a logout for people who are on your account after you changed it anyway.

cyberhack - November 14, 2012, 8:37 am

Nice tut man & its worked But its too slow to connect

Dajmond - November 14, 2012, 9:24 am

hehe nice post, thanks you much! °° _ °°

.Clarity - November 14, 2012, 4:30 pm

Thanks!

Works perfect and my name is cooler without last name ;)

bobsmith - November 14, 2012, 4:38 pm

It sucks that i can't change my name anymore on facebook * :(, after 5 times they block you. If anyone knows how, pm me :)

serg06 - November 14, 2012, 4:59 pm

Here, let me fix it for you:

(Nov 13, 2012 02:04 AM)Twitter Wrote: [\[CITE\]](#) 1) Goto Firefox -- Options -- Advanced -- Network -- Settings -- Connection Settings -- And choose manual proxy configuration.

2) Tick "Use This Proxy Servers For All Protocols".

3) Put this proxy/port

Http Proxy : 202.70.136.142

Port : 8080

4) Press okay and exit the settings

5) Right click the down arrow in the top right corner, click Account Settings

6) Remove your Middle Name and Last Name, enter your password, and press save

7) Go back to proxy configurations and set it to No Proxy

8) Dance

Step 4 is missing, and step 5 is misleading, so... Fixed it.

Underrated™ - November 14, 2012, 7:43 pm

For anyone that wants to use their own proxy, any Hong Kong proxy will do ^.^

kalashas - November 15, 2012, 2:34 am

THanks didnt know you can do this !!

vinu667 - November 15, 2012, 4:24 am

Working fine.but it slows internet browsing speed.Otherwise good trick thanks for sharing!

ghelatin1 - November 16, 2012, 12:49 am

doesn't work for me. :(too bad. F*CK

Spoiler ([Click to View](#))

HackThat - November 16, 2012, 4:16 am

worked perfect !! thnx a lot bro! :D

now if i log in from my ip will be any problem?

kannss - November 16, 2012, 4:51 am

(Nov 16, 2012 05:16 AM)HackThat Wrote: ([CITE](#)) worked perfect !! thnx a lot bro! :D

now if i log in from my ip will be any problem?after removing last name

you can back to your original ip

w/o any problem

simon74 - November 16, 2012, 4:51 am

Thank you for sharing this great useful information:)

UnknownG. - November 16, 2012, 5:36 am

Nice one really. It works like a charm. :D

Thanks

GreyPhantom - November 16, 2012, 5:49 am

Why does it does not work in mine? :(

Ballista - November 16, 2012, 10:42 am

GreatTuT man! You deserve some appreciation!

\$pooky - November 16, 2012, 11:30 am

thanks mate its working.. nice share...

Oxydaz - November 16, 2012, 1:31 pm

Amazing :) Let's try it!

Thanks Bro.

Seductable - November 16, 2012, 2:10 pm

Thanks, this is really awesome. :D Works. I love it!

ODK420 - November 16, 2012, 3:34 pm

Thanks For Your Help!

fogle6 - November 16, 2012, 4:17 pm

Can't change my name.. No option on it.. thanks for the guide though

traphier - November 16, 2012, 4:26 pm

thanx for the share :)
will try it out later

Default™ - November 16, 2012, 5:20 pm

Still working as of 11-16-12 so it is BADASS!!! Thanks!

Freerunning - November 16, 2012, 5:38 pm

Worked for me. Thanks for this OP :)

lamApenguin - November 16, 2012, 5:40 pm

It isn't working for me, keep saying i need a last name.
any help?

thanks in advance

booster123 - November 16, 2012, 6:58 pm

Cool it's work for me :)

Keep up :)

Grin - November 16, 2012, 7:06 pm

This works. I vouch for this method. :D

commando5671 - November 16, 2012, 7:14 pm

It really looks like a fake facebook when I try this, am i doing it right?

Grin - November 16, 2012, 8:16 pm

What the hell are you talking about?

greenc0de - November 19, 2012, 6:25 pm

Facebook is fine, Its not a pishing page or any thing. Working perfect.. Thank you for sharing brother
!!

shico75 - November 19, 2012, 10:25 pm

Hmm from Indonesia you say? Well that explains my slow Firefox, but oh, i'm with chrome ? .
Thanks for sharing!?

Zoidberg - November 20, 2012, 7:43 pm

Seems to not work anymore.
Was fun while it lasted :(

Samaritan - November 21, 2012, 5:48 am

Wow! It worked. Very useful man. Thanks a lot. :)

(Nov 20, 2012 08:43 PM)Zoidberg Wrote: [\[CITE\]](#) Seems to not work anymore.

Was fun while it lasted :(
Probably you made somewhere a mistake. Try again. It is working for me just fine.

Fares - November 21, 2012, 5:58 am

Thanks you, your tutorial is very good.

????? - November 21, 2012, 6:26 am

Bookmarked will see this thread later on :)
Thanks for posting this thread:)

Living Corpse - November 21, 2012, 8:31 am

very nice tut thanks for sharing :)

axmetmcl - November 21, 2012, 8:44 am

thank you for perfect tutorial u save my life :)

k0r - November 21, 2012, 8:49 am

thanks for this. Like the guy above said make sure you change your password afterwards though just to be safe :)

generald - November 21, 2012, 9:37 am

thanks dude it worked for me !!! :)

punkHD - November 21, 2012, 9:40 am

Cool! Thanks man, it's working.
[35 characters]

iphonehacks58 - November 21, 2012, 9:43 am

Not working because it doesn't load any webpage what now?
Cant login...
every webpage an error..
see the screen here: <http://prntscr.com/k96x6>

CX007-KHS - November 22, 2012, 12:54 pm

Last: You must provide a last name.
not working :s help please

Zenety - November 22, 2012, 1:32 pm

After checking the "Settings" page on Facebook my last name was automatically changed. If my name would be Rick, Facebook changed it to Rick Rick. Instead of just one name.

I tried to remove it again but the proxy also asks for a last name now. They might have fixed it.

LadiesLoveMe - November 22, 2012, 1:36 pm

No longer working, oh man this sucks :(

wowits - November 22, 2012, 1:46 pm

bro nice sharing !! ill try it out !!
thanx for sharing works beautifully !! nicee onee

Zenety - November 22, 2012, 1:46 pm

Yep, not working anymore. Tried different Hong Kong ip's. Any other country that still supports this?

d4rk41g0r1thm - November 22, 2012, 9:37 pm

Thank you for the Share will try it later :)

obamabinladen - November 22, 2012, 11:09 pm

Would have been fun but apparently no longer works.

lol - November 23, 2012, 5:06 am

Unfortunately, it no longer works. Ah well...

AsadBhatti - November 23, 2012, 6:05 am

Not working for me...

what is point 5??

i didn't get it, please help

shyguyftw - November 23, 2012, 9:25 am

Aww this stoped working.

I hope someone figures out a way to bypass this again.

Defective - November 28, 2012, 6:31 am

This worked like a charm. Thanks man :)

Roberto Morose - November 28, 2012, 2:11 pm

not working anymore! is there any new method?

Northlane - November 29, 2012, 1:23 am

No longer works :(but thanks for the tut

Twitterr - May 18, 2014, 3:59 pm

Guys you can try here again! And it's still working

<https://hackforums.net/showthread.php?tid=4236502>

Whriten - May 18, 2014, 4:02 pm
