Can I have the source mate?

Thanks in advance

gigajew - November 14, 2012, 7:27 am

Would love to check the source out, thanks in advance.

I have made something VERY similar to this. I am guessing it's grabbing them from ProxyNova?

LolZ Gym - November 14, 2012, 7:32 am

Nice usage of regex.

You should multithread it though, now you're GUI will hang.

Why don't you just quick reverse the app and find out?

Can't be bothered. I am wondering if I should put up all of my "projects-I-did-while-I-was-bored" -

people seem to appreciate those.

Pussy Cat - November 14, 2012, 8:00 am

The proxies you're getting are from 2009 and are all dead.

For god sake people, look at his reputation and the previous comments. Those proxies are outdated by 7 years.

byhacking - December 6, 2012, 9:01 am

Looks really good! Do u mind sharing a direct link? Thanks!

cr4cker - December 9, 2012, 7:17 am

Why don't you just quick reverse the app and find out?The part where you said it's not multithreaded reminded me of a very nice thread Mava made to show his 1337 pr0grM

Related to OP > The program is fetching Proxys from 2009, how much more obvious can it be that this is cypypasta or old useless code...

SkiD_xD - December 31, 2012, 2:38 am

im interested in seeing the source can i get it ?

Leaving forever - January 19, 2013, 10:46 am
