Thread: [Need a new Group image.](#)

Omniscient - November 14, 2012, 12:01 pm

The HJT Team is going to be changed to the HF MRT (Malware Removal Team). We need a new group image. The icon we normally have in our images needs to be a custom made graphic. It will be a logo of sorts that will be used for both the group image and ficon.

Please post your best entry. I'll be awarding a graphics guru or similar award to the member for the one we use.

This sounds like an interesting group, i hope all turns out well.

Ontopic: Why changing the name ?

SkyGuy - November 14, 2012, 12:09 pm

Well since I'm not a professional in graphics or anything I'm not going to have any chance of winning, but nonetheless I do still enjoy the creation of graphics and so thus I see no harm in having an attempt.

The group is already well established. He just wants to change the name - therefore needs a new userbar.

What exactly is needed?

Ficon?

Userbar?

Banner?

K, nvm, saw that you needed a forum icon.

Will be attempting these soon, reserving a slot.

Endanger™ - November 14, 2012, 12:37 pm

Do you need a new group logo in general, or are we creating the new userbar?

Morchid - November 14, 2012, 12:39 pm

I'm going to give this a try, not the best at this but I do got an idea.

Mr. Anderson - November 14, 2012, 12:54 pm

Do you need like a logo image or an Icon or a userbar?

D3xus - November 14, 2012, 12:59 pm

It'll be interesting to see what comes of it. :D

ryoh - November 14, 2012, 3:30 pm

I'll give this my best try; I suck at userbars though.

EDIT: All right, sorry for the bad userbar. I don't know the font that you use for the HF L33T. It would help if someone gave me the font that they use for HF L33T, Admin, and the current HJT Team.

AsSaSs@iN - November 14, 2012, 7:31 pm

Clarification on all points:

1. HJT is outdated and never used. We are in the process of upgrading our entire training program, entrance and helping.
2. We require a new user bar, forum icon (logo), and preferably a header that we could use in official threads like recruitment and tutorials.

The successful entrant will be acknowledged in threads, will make clean and professional looking images to best represent this official HackForums team.

They want a custom made graphic. Why use the HJT logo when they no longer use HJT as their main tool, hence the group name change?

I tried to get 2 staff members to edit the OP and clarify what we require. Both refused until getting the ok. It is evident that members need this clarification as even you have not understood what we require ?

We just had omni post this to gain more attention rather than ourselves (TH and I).

Oh c'mon guys. I know you can do better than that. Where are all the graphic masters when you need them.

Let's just focus on a logo and not a userbar then. Hopefully that will simplify it for members.

I can easily deal with the userbar part. We just need a logo. I'd say a 64x64 size would be fine.

[img]http://i.minus.com/jHNCZZpPPi14T.jpg[/img]I don't know if it's just me, but the userbar qualities seem lower.

I'd personally make the shield have a lighter outside color like something between white and grey as the whole image seems to be more whitehat and it would just blend better then a more grey/silver border.

I'd move over the shield/text a bit to the left on the userbars too.

Great job with the logo though. These are mere suggestions from a fellow graphics designer wanting to improve your quality.

I'd personally make the shield have a lighter outside color like something between white and grey as the whole image seems to be more whitehat and it would just blend better than a more grey/silver border.

I'd move over the shield/text a bit to the left on the userbars too.

Great job with the logo though. These are mere suggestions from a fellow graphics designer wanting to improve your quality.

I honestly think you should submit one of your own.

If the HJT team see's something they like, that's not original, I don't think they'll hesitate to use it as a group image.

I'm more than aware of this; Assassi@n came to me before Omni posted this, or very close too it. I was getting to the point where he asked for a logo, that was made by the user. If I, for example, got 4 free logos and put them together, they wouldn't be mine, would they?

Of course they wouldn't be yours if you randomly placed icons together. Mine isn't as near as original, but I wasn't expecting them to use it anyway. Just simply doing it for fun as I had nothing to do at that time.

Time to do another job.

Looks quite nice mate. I think white (logo) could look a little better than brushed metal, but I'm not sure.

Also, am I stupid for not seeing why you put the dots above the "M"?

Anyway, nice concept. I also like the glossy MRT.

Keep it up ;)

Thanks bro, I appreciate your designs as well, they're pro as always. ?

So, the above dots. The concept is 2 guys holding hands making an M. Yeah, the 2 dots are their faces. ?

So you want a logo (big)?
And what colours?
What size?

makaka - November 17, 2012, 2:57 am

Designers logo is perfect but why you guys don't try to make a logo of animated blackwidow pic or some other insect/alien and pose it as malware killer ;P

Example:

<http://www.clker.com/clipart-123998.html> You can't just edit images like that without having the .psd. Why would I waste time going through such a difficult editing process when I have the knowledge to easily design my own radar from scratch? It's not that hard.

Just need to create the circle/cover, put a black filler inside. Add some colored clouds on top, add a grid on top of it with low opacity, then search for a target (I used [this one](#)) to put on top of it. Then you just need to add the needle, which is a simple line with glow, the lens flare lights and the glass on top. Note: The only thing that makes my radar look similar to the one you posted is the semi-circle shaped glass which was indeed inspired by other radars on google, but not copied. It's just one detail.

9 out of 10 designers who posted in this thread could design a radar like that one. It's not hard. But it was me who had the idea so please stop trying to take merit from me. There's nothing more frustrating. In my original post I was VERY careful to specify that only the radar, not the bomb, was designed by me 100%.

As a designer, though, I have to look at the object I'm trying to make before I do my own. I don't have a real radar next to me so I must look at other works on google for inspiration. It's original creation. The idea might still be about somewhere but I think we should give him the benefit of the doubt. Everyone just get over it and move on. It looks pretty good as well.

Simple enough. ? Can you post the 64 x 64 icon? I think Omniscient can handle the text for the user bar. Perhaps it can do without the magnifying glass... it seems a little off since it is practically levitating.

Could be better, but oh well. I'm alright with being in the top 10.
that one is pretty good i like that

I made this userbar on school today:

Size: 4.8 kb

I think I've got you beat :P
Haha, good job though. I like the icon.

I designed a logo, I hope you like it.

PS: I'm working on the userbar.

Peace!

I really like the second one. You should slap it on a userbar to see what it would look like.

All they need is a custom made icon, Omni will take care of the userbar.

The userbar has already been made (by Omniscient).

Brandenx781 - December 5, 2012, 5:49 pm

The userbar has been picked and changed.

This one looks much cooler. But guess the image has been chosen.

Great Job Designer. :) ?
