Thread: [Computer infected. Virus protection doesnt pick up the virus. Redirect Virus](#)

Quest™ - November 14, 2012, 5:13 pm

This virus is called "Livesearch now Redirect Vrius"

I've scanned with tons of anti-malware.

I've tried manual removal said on websites.

I just need someone on teamviewer to help me.

Have you tried using malware-bytes?

I use it and its really nice c;

I'm more than willing to help you on Teamviewer, but there are probably more ... trusted people amongst the HF community that could help you. I promise I'd be able to remove the redirect virus, but it's up to you. If you want my help feel free to PM me :). Removing malware is my specialty.
