Thread: [Help me get back stolen money from Liberty Reserve](#)

Soniscain - October 10, 2008, 5:50 pm

My Liberty Reserve account was hacked last night by a shady HYIP, taking all of my money (many thousands). I need to "hack back" and get my money. Does anyone have any advice? I have heard of a program called Vampire 3.5 - anyone had experience or luck with that?

Seriously. Two wrongs don't make a right. Just live and let live.

Report them if they've stolen money from you. :)

best way u guys can do is file a court order against liberty reserve but mostly try to contact LR support and see what they can do.

Mhm, Instead of using Illegal things. And if they find out. They might just not help you. Its better to complain.
