xx 0x0 xx - November 17, 2012, 11:22 pm

hello guys im just hacked this site

<http://www.goldenway.com.eg/hacked/>

and i still have my shell on the server so i would like to know what i can do with it if you can help with good ideas

Best regards

Mats0o0o0 aka Volcan

Mormaii - November 17, 2012, 11:33 pm

Horrible deface page. Do whatever you want with that random site.

amus3d - November 17, 2012, 11:36 pm

I guess the deface kind of gets your message across - what ever it is.

The song sounds like the guy's mouth is full of donuts.

that's me 20 - November 17, 2012, 11:42 pm

good work guy go ahead friend

best regards

xx 0x0 xx - November 18, 2012, 12:02 am

okay guys im not talking about the deface page cuz i didnt make it good but im asking for useful idea

btw i got more cpanels i hope some one till me what i can do with it and be useful for me

Atrocious? - November 18, 2012, 12:51 am

Ok,Nice what method did you use to hack that site?

PhobicHD - November 18, 2012, 1:30 am

Lol just add a JDB and see what happens

CoLDarkness - November 18, 2012, 1:36 am

Lol. Skiddy? Get your shell secure with a password if you don't want it leaked.

Jae? - November 18, 2012, 3:21 am

Apple J4ck, over-riding OP's deface page making me proud to be here.

gaussillusion - November 18, 2012, 3:41 am

You could put a sentence more interesting. This is an horrible deface

Apple J4ck - November 18, 2012, 3:43 am

Its not his deface you little smarty pwny ;3

Microrobot - November 18, 2012, 4:14 am

Lol, they put "Please stop defacing random website"

Marcus Aurelius - November 18, 2012, 6:54 am

hahahaha that was fucking awesome, laughing so hard

xx 0x0 xx - November 18, 2012, 2:53 pm

well im volcan it was my deface page and it was not random website i was target it and sure Apple J4ck. is very good man :)

and btw i put password for my shell on it and now they blocked me XD

thx for comments guys hope some one could close this thread
