Thread: [Which Crypter are able to do this?](#)

PoisonKnife - November 18, 2012, 2:13 pm

I use Darkcomet and I want to crypt the downloader (not the server).

Which crypter are able to do that & deliver a working downloader which are 100% FUD?

Vandal - November 18, 2012, 2:18 pm

Now I'm not sure what a downloader does, mine explaining?

Do you mean like this?

It's actually called a server downloader. It's a small file which you execute on the a person's computer. The downloader then download your real server and execute it on the person's computer the person will be infected.

It's good to use with JDBs as it's very small in size in contrast to the server.

Couldn't you use another program to gain access to there computer thne install the executable?

P1AYA4LIFE - November 18, 2012, 4:07 pm

use a different server downloader than the one darkcomet offers. I tried it and other people have also told me that it is awful.

Could you recommend me one? Or maybe a free RAT (not Cybergate) which also have a downloader feature.

Kelly007 - November 19, 2012, 7:51 am

use nexus crypter.Its not Fud though

Then I can't use it. It must be 100% FUD.
