Thread: [iPhone 5 jailbroken - iPhone 4 iOS 6 untethered \(Video's\)](#)

Dragonce - November 19, 2012, 9:10 am

[Video: <http://www.youtube.com/watch?v=wKDxjaPNRHI&sns=em>]

Look on the channel for the iPhone 4 video. I know this is old but I want to read your thoughts. I think it's real but obviously I can't be a 100% sure.

What do you think?

Phobix - November 19, 2012, 11:25 am

Looks real, and would fool me if I didn't know any better. There ARE more developers other than just the dream team who can decompile and reverse engineer devices. He also made this just for big devs to look at and probably offer him money for the exploit. (dev team wont but he wants it)

If I where the guy that developed it, I would for sure try to get known a little bit more. I would make an Twitter account and start sending out more proof. My point is that I hope he will release it and not keep it private.

0020 - November 19, 2012, 7:51 pm

I would be impressed if he had proof he broke the sandbox.

Grin - November 19, 2012, 8:39 pm

'Respond to this video...

Sambojag, I've managed to jb my iphone 5 but it will only run under a dev account to be able to code. Does your jailbreak need a dev account to run? And is it tethered? Dan.'

Apparently, there are a lot of talented broski's out there. However, they're unwilling to release information.

0020 - November 19, 2012, 9:01 pm

I saw that comment. Its amazing what people will do for publicity. You have to work for these things.

If your the best iPhone hacker here, why don't you try to develop a jailbreak?

Genius1223 - November 30, 2012, 2:40 am

facepalm

Hacker. developer all sounds the same to u? :O and btw 0020 is indeed learning the working of the firmwares.

Phobix - November 30, 2012, 5:36 am

Im really disliking the people grave dig old threads just to spite another user. It's also annoying when they are new here or are lounge whores coming from the new posts section.

phyrrus9 - November 30, 2012, 6:19 am

Jailbreaking the iPhone 5 is not difficult, anybody with a valid developer liscence can just sign cydia and execute it. The iPhone checks file permissions but not if it is called with another program that honors suid (look at how iFile launches). The only problem is that none of the apps you download will execute until you sign them (not hard but defeats the point of C)

pod2g said so himself that he has signed cydia (and I too have done it, though it is once again, useless without a patch). I would like to see some of your code, if you are willing, we can share some stuff. Shoot me an email and we can chat (in the sig) or a PM.

Feel the same. This topic was useless and he gravedigs :-x

phyrrus9 - November 30, 2012, 6:21 am

I'm not spiting him, if he did it then he did it, I am just saying it might be beneficial to the community to share resources with me and some of the other devs. Completely his call.

Phobix - November 30, 2012, 6:59 am

We're not talking about you Phyrus. This isn't OP's video though, so asking to talk to him via pm is pointless because he doesn't know diddly squat of what the video maker did. :p

phyrrus9 - November 30, 2012, 7:40 am

Ah, I was under the implication that HE did this.

Grin - November 30, 2012, 9:09 am

isnt this thread kind of old what happened?

phyrrus9 - November 30, 2012, 9:36 am

No? It seems to be rather false though.

Genius1223 - November 30, 2012, 10:44 am

Phyrrus we are kinda blaming the OP for fake vids :) Not you!

phyrrus9 - November 30, 2012, 10:47 am

I see that. I was blaming the youtuber for his falseness. it is a themed 4. note why he never closes the folder (makes the screen seem larger)

This may be slightly off topic but don't PM me about rep.

I didn't even read the sob story.

phyrrus9 - November 30, 2012, 1:11 pm

What story? Long story short, I dont give a crap if you -rep me lol.

I said a few other things but it wasn't relevant to the rep you gave me. But more at the comment you put in it. feel free to ignore it (since you will anyways)

Genius1223 - November 30, 2012, 6:49 pm

Take it into PMs plz! dont argue about reps here :)

Probably running a build of Cydia through a Dev account or something.

Also, could you lighten up around the other members in this sub forum? Everybody has a different personality but we should keep the tone light and try not to insult eachother here. I've asked everybody who flames here, and not just you because you're a regular member.

And they don't have a good reason to release it either.

phyrrus9 - December 21, 2012, 10:13 am

Just for all of you, I did some inquiry about the failbreak, maybe this will keep you off the dev's backs

<https://imgur.com/HjTZJ>

that's OPK from chronic-dev. Other companies have jailbreaks but release for profit, and even if OPK did (which he did not) update me with the status of the 6.1 JB, I would have the respect to keep it private. Don't expect people to just come out with it in videos that are not signed and

endorsed.

I have to side with grin on this one...
