Thread: [One year of reseller hosting \(offshore\) in exchange for ub3r upgrade](#)

TuneUp - November 19, 2012, 9:21 pm

Hello, I understand this may not be the best offer but please consider it as I'm in need of an upgrade.

I'm offering one year of reseller hosting for anyone who will upgrade me to ub3r membership. I offer hosting as a free service to the HF community, but now I am offering one year of reseller hosting on my box in exchange for ub3r. Specifications as follows:

- 40GB RAID Storage (Can be allocated more as you need, most users don't use more than 10)
- 5 TB Monthly transfer
- Unlimited cPanel account creation
- Gigabit connection
- Offshore location (Romania)

This account is not with a hosting provider, it will be on a VPS on my personally rented dedicated box from a data center which is paid for until July 2013 (and will continue to be renewed unless I change locations)

If you would like more information on my server configuration, such as network speed and disk I/O, please view [This](#) thread.

I can possibly kick in a steam account with this.
