Thread: [Envy Crypter corrupts?](#)

trashcanman - November 20, 2012, 12:26 am

i have purchased envy crypter for use with my darkcomet and poison ivy servers...the servers work fine and connect before i crypt, when i test on the same computer as the client is on...i am behind a vpn and using no-ip...i cannot figure out what the problem is once i crypt the servers...does anyone have any ideas

Straight Grizzly - November 20, 2012, 12:30 am

I own this crypter and am getting the same errors man. No worries, nothing wrong on your side.

trashcanman - November 20, 2012, 12:36 am

well thats shitty...i dont have a way to crypt anything and i paid 25 bucks for that...is it always like that or a bug right now do you think?

northman - November 20, 2012, 8:41 am

If you are 100% sure you are using the correct settings in both DC/Poison Ivy and the crypter then contact Envys support. Because it is working fine for me.
