Thread: [MD5 cracking with Cain & Abel](#)

Funky Kong - November 20, 2012, 1:06 pm

In this thread I want to show you how easy it is to crack a MD5 hash with the old but gold tool Cain & Abel because so many members on HF are asking for MD5 cracking services. Do it buy your self!

First you need to download and install this: <http://www.oxid.it/cain.html>

You also need a wordlist. I would recommend to use this list:

<https://hackforums.net/showthread.php?tid=2728886> , but you can use any wordlist. Just use google.

Now follow the video instructions...

[Video: <http://www.youtube.com/watch?v=gPx-oE4SuGg>]

The time of the cracking process depends on your computers speed. I hope this helped you a bit. When you have questions then just pm me.

Some Antivirus programs will pop up but this file is clean (link is from the developer).

Yoooo Really Nice job! Can I get download link :)?

Funky Kong - November 20, 2012, 1:28 pm

Thank you!

The download link of the tool is in the thread or what you mean?
