Thread: [RF Private Servers GameCP vote hack](#)

balmung098 - November 20, 2012, 1:28 pm

I was wondering if someone could help me hack GameCP in any private server on RF online..

I did post just like this but still got ignored ?

any Help would be appreciated and willing to learn anything and everything from hacking..

More Power to this site ???

your post "just like this" more than likely got ignored because no one wants to or is going to do the work for you.

members of this forum are not your, nor anyone elses personal army

You're 14, why would you even think about hacking?

I can hack GameCP for you if you have an account on the panel already.

It can be any account that has a working game that supports plugins hosted on it. The end result will be root on the server hosting the panel.
