Invicta - November 20, 2012, 8:29 pm

Isn't the client also compatible with Linux?

Ronald Weasley - November 20, 2012, 8:30 pm

I don't know what to think of Bshades anymore after all the drama.. it definitely looks nice but...

Cloud9™ - November 20, 2012, 8:31 pm

(Nov 20, 2012 09:29 PM)Ass Pirate Wrote: [\[CITE\]](#) Isn't the client also compatible with Linux?
That would be correct, client is compatible with Linux, Mac OSX, and Windows.

venomous. - November 22, 2012, 3:07 pm

Vouch for blackshades. They make good and HQ products would not hesitate to but them!.

Inalienable - November 22, 2012, 3:24 pm

You should probably tell people about the part where the stub needs root access to the Mac in order for it to be ratted. Can you also tell me why I would buy this instead of getting a free Java rat that is FUD and doesnt need windows to run?

Cloud9™ - November 22, 2012, 4:08 pm

(Nov 22, 2012 04:24 PM)#Chad Wrote: [\[CITE\]](#) You should probably tell people about the part where the stub needs root access to the Mac in order for it to be ratted. Can you also tell me why I would buy this instead of getting a free Java rat that is FUD and doesnt need windows to run?
I'm sorry, but I believe you're misunderstanding the product's purpose. BlackShades Stealth's client is coded in Java, which means it can be ran on Linux, Windows, or Mac OSX. The stub is coded in C, which means the server can only be ran on Windows.

A 100% pure Java RAT has the ability to execute its client, as well as its server on Windows, Linux, and Macintosh. Downside to having the server coded in Java is that it creates a dependency on all three operating systems. Which means, in order for that Java RAT's server to execute the target computer would require Java to be installed.

Well, I hope that answers your question ?.

Gpure - November 22, 2012, 7:43 pm

Part of this is incorrect.

C is multi-platform, and it is very possible to make a Mac OSX Rat in C without having root privileges.

However, you need to be highly informed on the OS's vulnerabilities and the features will be a tad less unique.

? ?? ??2? - November 22, 2012, 8:01 pm

The most thing i like about BS Stealth is the webcam streaming and desktop thumbnail. Fast and smooth! But hope someday you will add function to capture/save the stream.

Cloud9™ - November 22, 2012, 8:43 pm

You are correct, but BlackShades Stealth's server is designed to only run on Windows. While the client itself is designed to run on Linux, Mac OSX, and Windows.

Mises - November 22, 2012, 9:47 pm

BlackShades Stealth is perfect for the user that desires an extremely fast, easy to use, connection encrypted, and overall stable RAT client.

Big vouch for this product!

Pikarica - November 22, 2012, 11:32 pm

Great product it seems. Really glad because no more .NET and new portability options. New age of Java is coming.

Best regards and good luck with BlackShades.

blackshades - November 23, 2012, 3:18 am

The Torrrrent download link is now working again.

blackshades - November 24, 2012, 3:24 am

To get the latest version of this product, just re-download the torrent.

Arkad - November 24, 2012, 3:39 am

What is the latest version? also i have this, it needs way more features ..

SmoothCriminal - November 24, 2012, 4:04 am

Must say that this is by far the best RAT out there.
Bought it thanks to the speed, I've made lots of money already.
First time I see and use such a stable software.

A++++ RATE FROM ME!

blackshades - November 24, 2012, 11:15 am

blackshades - November 24, 2012, 7:07 pm

You may also PM me for any questions regarding this product.

Nestle - November 25, 2012, 5:21 am

Also a very nice product. Waiting for this to gain more features, but it's definitely the fastest and most stable RAT ever made.

chine - November 25, 2012, 5:33 am

fast rat but password recovery don't work !!!

Cloud9™ - November 25, 2012, 2:10 pm

BlackShades is currently undergoing maintenance. All services will be offline for a few hours.

Thank you for understanding and being patient.

blackshades - November 26, 2012, 4:31 am

Server has been updated. You may now compile new bots again.

update for server bot or web server ?

PMCWorlds - November 28, 2012, 4:54 pm

Does this let you DDoS like .NET, so you could make a small botnet.

Cloud9™ - November 29, 2012, 6:19 pm

(Nov 28, 2012 05:54 PM)PMCWorlds Wrote: [\[CITE\]](#) Does this let you DDoS like .NET, so you could make a small botnet.

Blackshades Stealth does not currently have a DDOS function.

blackshades - November 30, 2012, 11:11 am

PROJECT1 - December 1, 2012, 5:54 am

What is the server size on this one?? Stability with 1k bots?

blackshades - December 9, 2012, 2:23 pm

Please, feel free to PM me for any questions or support.

Nestle - December 11, 2012, 11:16 am

Also one of the best RATs out there. Amazingly fast and stable. If that's what you're looking for then this product is your best bet.

Cloud9™ - December 12, 2012, 6:44 pm

(Dec 1, 2012 06:54 AM)PROJECT1 Wrote: [\[CITE\]](#) What is the server size on this one?? Stability with 1k bots?

Server size is 84k and stability is great.

Nestle - December 13, 2012, 5:18 am

I'm also here to support anyone who needs help using this product. Just PM me.

Drug ballad - December 13, 2012, 5:20 am

very very ugly gui but it seems like a nice prduct

(Dec 13, 2012 06:20 AM)Raccoon™ Wrote: [\[CITE\]](#) very very ugly gui but it seems like a nice prduct
Bad judgement there. I think it has the BEST gui!

It's so very simple thus a very very powerful RAT.

Never ever seen anything stable and fast like this, especially not coded in Java and working on my MAC!!!

Keep up the good work Blackshades!

blackshades - December 28, 2012, 6:57 am

PM me for any further questions or support.

Hawkthorne - December 29, 2012, 2:55 pm

So can bshades be used to infect a Mac?

Cloud9™ - January 5, 2013, 5:08 am

(Dec 29, 2012 03:55 PM)Hawkthorne Wrote: [\[CITE\]](#) So can bshades be used to infect a Mac?
BlackShades Stealth client is compatible with Mac, but the server is only functional with Windows.
