Thread: [\[OPEN SOURCE\] Agile.Net Deobfuscator](#)

Joe. - November 24, 2012, 4:33 pm

Hey guys, since de4dot doesn't support agile.net, and pretty much everyone relies on that now. I was thinking about writing a agile.net deobfuscator for the latest version. Which includes the following transforms:

Code Virtualization

Code Encryption

Symbol Renaming

Control Flow

Method Call Obfuscation (Proxy Calls)

String Encryption

Resource Encrpytion

Would you guys be interested in a open source project like this?

EDIT: Alright guys i made a codeplex for the project, i just started so it's just using a hardcoded path for the file and is not very clean. I only started on the Proxy Calls, you can check it out at:

<https://agilenetslayer.codeplex.com>

I'd be interested in just the program lol

li0nsar3c00l - November 27, 2012, 5:32 am

tooo sad, i dont got a working pc atm to improve the code
another very high quality post of you :)

Pnurt - December 13, 2012, 1:02 am

It would be really awesome if you got would get it working man!

Hope you wont quit :)

larosa.cristian - November 27, 2019, 4:55 pm

it's a great idea, congratulations even if I notice that the topic is old, I hope you finished it because it would be very useful.

am getting into .net obfuscation,virtualization etc this would be an resource nice !!

ek_nightmare - November 28, 2019, 2:11 pm

according to de4dot readme in github, aguile packer is supported (although I haven't checked it)

de4dot can not deofuscator the new version Agile.

dayaramgodara93 - December 4, 2019, 4:06 am

that will be very good bro
