I'm selling a list of over 200+ checked accounts, all with games.

None have been pillaged, and you can even start your own shop with them.

Price: \$10

PM me for details.

Would be interested in knowing what games are on the accounts before purchasing as \$10 seems very low therefore assuming they aren't very good games.

Ill buy right now as long as only I get them and you show proof they all work. Thanks.

I can't show you they all work because of the way that SteamForce outputs the accounts, I'll see if I can work up a program that goes through the SteamForce outputs and grabs them in the usual fashion for cracking.

All the accounts were cracked and outputted by SteamForce, so all the games are listed under the account information.

As for the "\$10 seems kind of low", I'm not interested in selling them all separately, as I don't have the time; I'm only looking for \$10 to purchase another month for a DayZ hack, as I get rather tired of getting teleported and/or killed by scripts and what not.

Dammit! OP PM me when you get more accounts. I'm looking to buy. Thanks.

Received accounts, most are pretty bad. The decent ones all have steam guard or the passes have been changed, for \$10 can't really complain. Legit seller although I don't know that there's over 200 accounts here.

There should be, I ran the count feature on Notepad++ on the first 3 .txt's (The two dates, and the games.txt) and there was 190+, and the rest put it over the top for 200.

There should be some ones in there in which you can get some good accounts.
