Thread: [\[RAT SETUP\] DoS'S Rat Setup Thread\[RAT SETUP\]](#)

DoS Agent - March 8, 2010, 11:05 am

Ok ladies and gentlemen I am not a long time member of this community but in the short period of time i have been here i have learned an exceptional amount from the great members here.

So to show some gratitude i am starting a Rat setup thread. I can set up Cybergate,Cerberus,Spy-net,Pro-rat,Pzn-Ivy, etc. I will portforward as well. If i have never done it before i will try my hardest to get it done.

Post Your Request! and Thanks and feedback (note a req but its the right thing to do) I Do not guarantee your set up, Some settings/isp/ routers are not able to be i will try my best...

Requirements:

1. Teamviewer - [Here](#)

2.Your rat -Guys and gals please use the search button on the forums it works i promise find a new or atleast kinda new version of the rat you want i recommend Cybergate 1.02

Download CyberGate RAT 1.02 [Here](#)

Credits for dl link goes to Plutoniums TUT Thread which can be seen [Here](#) if you would like to teach yourself

3.No-ip DUC and account If you dont understand this i will help you get it. The link is [Here](#) -set up an account atleast

4. MSN

If you do not have the things required you might be put to back behind some one who does. If im not on Msn im at work or away just leave a message or pm me. I will follow up with every request.

Note: Rate my thread

Also I can help you with spreading Techniques I have come to learn and use.

Everything you need to know about RATS and If I dont know i will help you find out ?

MSN- DoS.Agent.DoS@Gmail.com Post your requests here or im going to start ignoring IMs
