Yeah, guess the group looks awesome and so innovating. There is nothing like it on these forums or anything. People posting are just a bunch of suck up faggots. GLWS

Well The Marketers failed a long time ago, I can't say what will happen now with codevade back, and illuminati changed direction a bit afaik. Anywho.. I don't think it really matters, I'm just going to focus on Corp and not the other groups that may or may not be similar.

Only time will tell how this group turns out, but don't resort to those low standards it's harsh to see respectable members wind up screwing over members in the end with "Buy-ins"

Many groups have said this, but like I said only time will tell. Some need it to pay off the group, extra money, etc etc. I'm not trying to trash your thread in anyway possible.

We've paid off the group, we have no intentions of ever selling spots. We will not sell spots though. Empire won't and The Corporation won't. No group I lead/own will sell spots.

Re?olution - December 4, 2012, 4:19 pm

They are doing a \$100 giveaway, have like 4-5 stickies up right not including the one that Aeon<3 junked. I don't think they will have a shortage of money any time soon :P And god knows how much they get from Empire Stresser.

Yeah, there will be group products by each member in the group... but I don't think that's what it was meant to be interpreted as. I believe it was meant as we will stay with this group long term and keep trying to make the quality higher in each section of the site we participate in.

They will not be required, I meant it as Group Projects, each member can pitch into project(s), solo, partner, or the entire group... to create amazing products by the group.

These can be about anything and everything.

Mohatu - December 5, 2012, 3:37 am

What kind of software do you see the group creating?

To elaborate, any 12 year old and his mother can create a booter in Visual Basic.NET. Something I have yet to see on these forums are applications that go beyond that. For example, The Corporation could get a server and host Java servlet based web applications that the HF community can use, for free or for a paid subscription. Although many members have little to no experience with JSP, PHP, or MySQL, it doesn't take that long to pick up. Also, server sided applications are much more simple to secure against being cracked or copied, as the end user never has access to the compiled class/binary files and no way of recovering the original source code.

I noticed you used the term "Programmer" instead of "Coder" in the main post. Are you one of the few who realizes that there is much more to software development than just the "coding" portion?

Anyways, I wish you luck with the new group. It sounds like you have a good understanding of how a group works.

Also, refusing to accept buy-ins will keep the group a community of invited-only members who know what they are doing, great decision.

I'd say something out of the blue. Something that no group has done, nor even ever considered.

On the spot thinking, let's say this for an example of something different,

'Rather than the traditional recruitment process to where one has to write about himself, and let's be honest in most cases it's complete an utter bullsh*t, make the member do something to which shows he is worthy. I'm talking, if the group is about giving and helping other members, make him show that he is able to be there. Be it, through the use of a couple dozen posts to where good detail and instructions are used, or a couple of threads to where he is giving to the community.'

That there is at least having practical proof..

I for one, am one of those people whom agree with practical is better than text as such. An example would be Universities, if I was to choose to what is a better business degree, I'd say the foundation courses. Any one can write, and revise enough to come out with an honours degree, but where is the practical? For all you know, this graduate could be completely useless with that skill and environment, but still he's shown to be better? But surely one with expertise in that area, should be the main priority?

Low quality in groups can still get a member banned. It's happened before. That's the equivalent of paying \$500 for a ban. Why would a psychologically sane person do such an act?

Then again, why would a psychologically sane person buy a \$4000 group? (Honestly...someone answer me this)

Good to hear it. Allowing buy-ins decreases the reputation of a group immensely.

Why not at least try to act civilized?

Nokia donated to HF in the name of his group, doesn't mean all members of the group helped out, but the group is recognized for doing it.

We are going to be donating about 50 upgrades or more. It's in the name of the group, but is from each of our personal finances as was Nokia's for Red Lions.

Why do you have something against us donating to HF in the name of our group?

Anyway, it's not changing the group, we're still both going to work on the group.

I have a question:

How do you define "quality products"?

(Dec 13, 2012 05:27 PM)Raz?r Wrote: [\[CITE\]](#) I have a question:

Successful products. Products that were actually taken time on, developed properly, and marketed well.

(Dec 13, 2012 06:09 PM)Aeon <3 Wrote: [\[CITE\]](#) Successful products. Products that were actually taken time on, developed properly, and marketed well.

But having a successful product doesn't necessarily mean you'd get an invite, correct?

Correct, it's a factor though. A good business man can sell anything, a good product can sell itself. The one who is putting in the most effort is the one who stands out.

Raz?r - December 13, 2012, 5:44 pm

Thanks for the fast reply.

I hope to get invited one day, as marketing my products here on HF is actually what i am living from.

Charles Hamilton - January 6, 2013, 9:21 am

Just a quick question here:

Would you consider resellers of products such as crypters or RAT's or something of the sort businessmen? I'm wondering because I am not really into programming at all.

Because Tibit said this:

(Nov 30, 2012 04:13 AM)Tibit Wrote: [\[CITE\]](#) Do not apply via UserCP or you will be blacklisted from the group. We are invite only, we only want the best innovators. The guys who create the sites, programs, etc. Those who have a knack for selling quality products. Mainly, our members will consist of great salesmen, great product creators, from programming to design to creating the idea.

If you have any questions feel free to post them on this thread. We will be sending out invitations soon. Not trying to get myself looked at, I am just trying to get a clearer view of the group.

Thank you & this looks like a high quality group. Good luck to you Tibit & Aeon <3.

It's quite amazing when you think about it.

They're one of the last extremely prestigious groups on HackForums, and only the best of the best are in there. It's not biased either, it's legitimate reasoning as to why they're in there.

It's fantastic, imho.
