Thread: [Webcrab Formgrabber Review](#)

Prince of Persia - November 29, 2012, 10:07 pm

Summary:

The coder goes by the name of [pr0t0typ3](#). He's is known in various different sections for various different things he has done for this community. This product does exactly what it says. It is a form grabber that grabs from various different browsers. I have tested this product on Internet Explorer and Firefox. It can grab both HTTP and HTTPS on the browsers I have tested with. The coder even gave me his Skype if I ever had any questions or concerns. This product works on Internet Explorer, Firefox, Chrome, Safari, and even Opera. The file size of this product is great, 9KB (packed), this is the perfect size. The price for this product is only \$75 Liberty Reserve.

Login Page:

Nothing too fancy just a basic username and password form.

PackTheMoon - November 29, 2012, 10:09 pm

The product does look good. Nice review.

James Bond™ - November 29, 2012, 10:11 pm

Vouch for PoP, If he says its good it must be good.

I'm not even related to this project. Hell I don't even know how to code. I only posted on the review thread.

Null_ - November 29, 2012, 10:34 pm

What was the name of the music playing?

Prince of Persia - November 29, 2012, 10:37 pm

(Nov 29, 2012 11:34 PM)Null_ Wrote: [\[CITE\]](#) What was the name of the music playing?

The song playing is Everyday - Carly Comando.

The first thing he stated was that it was coded by pr0t0typ3... ?

redpois0n - November 30, 2012, 5:59 am

I like that you posted images of it. Looks really nice.

Cunningham - November 30, 2012, 6:19 am

Looks really fucking good actually! Glad he actually released a form grabber and didn't let his work go to waste.

SBMK - November 30, 2012, 11:37 am

looks nice! maybe you can make a video demonstrating the chrome grabber (ssl), that would be rly nice.

Good luck with sales!

pr0t0typ3 - November 30, 2012, 12:54 pm

Good luck with sales!I'll do one by tomorrow :) I would do it now but I'm not at home

what else? - December 1, 2012, 6:48 am

Cronus? Coded in javascript?

Lol wtf, you cannot hook those functions with javascript.

Lol wtf, you cannot hook those functions with javascript.

I think it is a addon in browser or something. Not sure.

You gotta be kidding me!? ?

Once you run the formgrabber it will inject a remote-thread and then hook the web browser to intercept the on submit API to collect web form data before it passes over the internet. This cannot be done in JavaScript or Java.

I think prototype who coded this should have posted this on osc or tf instead here on hackforums (only scriptkiddies).

OpenSC/TF are not exactly going to be profitable places to post shit like this, or anything really ?. Most of the shit on TF is related to cracks for malware and opensc, well, I'm not sure about them. All I know for sure is pr0t0typ3 would be more likely to get flamed there AND not make a sale then he would here.

Regards,
Beta Monkey

I KNOW.

But there was some password stealing thing made as a browser addon i believe.

Maybe you're right about opensc and tf. What do you think about ABH? Only problem I can see there is that people might purchase with stolen credit cards which results in the card holder chargesback against him.

I'm not sure how many customers pr0t0typ3 have got but I think he should consider to reduce the price of it to maybe 50\$. You can easily find the source code of Zeus if you know where to look. SpyEye's builder is also cracked and both of them are far more advanced than pr0t0typ3's formgrabber (with web injects). If pr0t0typ3 want to be a competitor to Zeus/SpyEye he should lower the price.

I would not even worry about this kid. Furious always gets upset when others code things better than he can, which is easier than you would think. He's just some angry jealous kid is all. :)

CookieKRISP - December 3, 2012, 6:15 am

twGrabber purchasers get any discount, you are the same coder? :(

redpois0n - December 3, 2012, 6:48 am

micdonand - December 24, 2012, 1:31 am

Nice preview it really nice, a big vouch for you keep it up

ampere69 - April 3, 2013, 7:33 am

Is this for download?

And i would really appreciate it if someone could help me
