hello every one,

i was searching for Cybergate 3.1.0 Private Version, and found this blog

<http://www.theatregelap.com/2012/09/convert-cybergate-310-public-to-private.html> i have paid \$25 for this and they give me some files and most important one video tutorial, now m having issue with setting? maybe my port fording problem or something else, if some can fix my problem trogh TV TeamViewer, i will give him this pakage for free?

my skype : kiana.kitt45

Thanks
