Thread: [Looking for a good free FUD Keyloggger](#)

MinecraftUser - December 1, 2012, 5:31 pm

As the title says, I am looking for a good free FUD Keylogger that works with Gmails.

Year?? - December 1, 2012, 5:34 pm

Do you mean to steal Gmail info? Or send via Gmail.

No Keyloggers are made FUD they have to be crypted.

I can tell you a free Keylogger but you need to buy a crypter or a buy a Crypt for
It to be FUD.

Dont go free, it wont be FUD (For the crypt)

The Keylogger is Project Neptune btw

Look at some Keyloggers here, they have "Stealers" which steal the account info.

You can send any Keylogger over Gmail.

I can't find the link right now..

A very good one is Limitless Logger from Mephobia, maybe is not FUD when you generate it but also includes a Mini Crypter and that could make it FUD :).
