Are you a programmer or someone who wants to be a programmer?

Do you like fun, friendly communities for learning, talking and just having fun? Then this is the forum for you! Passionate Programming is a brand new forum for programming, gaming, graphics and more!

Register now!

[http://passionateprogramm.in/g/forum/member.php?action=register&referrer=1](#)

Because Passionate Programming is brand new, I am offering free upgrades to any user that refers another user!

Benefits of upgrading, you may ask? You get access to the premium downloads, and other various forums, that you would regularly have to pay for with our forum's currency, E-Dollars.

E-Dollars can be earned by posting, referring users, etc...

Passionate Programming is exactly what it says it is! A forum made for people like myself, who are passionate about programming. But, there are other forums for other users who enjoy gaming, music, etc..

We have a very smooth, premium theme, and even our own custom plugins!

Some of you may be worried about people leeching your work, and so you create release threads like "Post and PM for link", however, I have modified an older plugin to work with the forum! You simply click the "thanks" button, and you can then reveal whatever the user was hiding in their post!

It works like this:

Thanks dude, if you know anyone who would like it, refer them ?

Phobix - December 1, 2012, 10:09 pm

Still a 404 for me OP, and I highly doubt it's my browser connection..

Google Chrome is having trouble accessing the network.

This may be because your firewall or antivirus software wrongly thinks Google Chrome is an intruder on your computer and is blocking it from connecting to the Internet.

Here are some suggestions:

Add Google Chrome as a permitted program in your firewall's or antivirus software's settings. If it is already a permitted program, try deleting it from the list of permitted programs and adding it again.

404 dude. :/

404 dude. :/

Tested on Firefox, Chrome, Opera and IE9.

All work. I don't see what your problem could be, but that certainly does not sound like a 404 to me.

EDIT:

Also tested using several different web proxies, and browsershots. All work as expected.

Please consider upgrading your browser, until then, you are blocked from the website!

It's for your own good, really! We don't want you to be hurt by the monster that is Internet Explorer!

Below is a list of browsers that would work great with any modern website!

-- Sincerely, every web developer eve

I laughed so hard at this

Yeah. Internet Explorer sucks so much that I made a plugin specifically to blog IE < 9 users.

Phobix - December 2, 2012, 8:30 pm

Yeah I still cant even load your site dude wth :/

badbrains - December 2, 2012, 9:01 pm

That's very odd, do you have a firewall / antivirus software enabled? No one else has experienced this issue but you ?

Phobix - December 2, 2012, 9:03 pm

Mcafee security center.. -.- Yeah. My firewall's a jackass. Great site, browsing it now :)

badbrains - December 2, 2012, 9:05 pm

Odd. I'll go yell at McAfee later for blocking my site.

Customer Support is always like this. ;P

Dastoks - December 2, 2012, 9:37 pm

how do i refer some1 under me?

i asked from my friend to register under me but he only registered because there is no referral box..
hes name is amir232

and im dastoks

badbrains - December 2, 2012, 9:42 pm

I actually just added the referrals. Once you register, you will now receive a PM with a URL to refer a user.

Dastoks - December 2, 2012, 10:12 pm

there :D got a referral from a friend of mine :) im dastoks there.. and got a referral + another friend of mine registered before u added the referral box ..
