Thread: [Zyklon B and Arcane Sky](#)

Cyber Criminal - December 2, 2012, 1:25 pm

Hello fellow HF members. for the pas couple of years I have trying to learn how to hack but to honest I haven't really gotton anywhere. I do know basic SQLi however i do not know why/how this works. I do think I am a Script Kiddie i guess but I want to know why things have vulnerabilities. My life is getting on I'm 14 now and I wish to learn and become good at hacking. People I look up to the most in life are Zyklon B and Arcane Sky. I want to gain their knowledge but Where do I start? I read tutorials here everyday but they just tell me how to carry out a procedure they don't explain why it works and what it's doing. Thanks for any Help.

Also, I'm looking for Hacker name to leave on defaces etc but not sure how to choose one.

bckslsh - December 2, 2012, 1:47 pm

Zyklon B - Got caught. wat.

Arcane Sky - Creates free hosting/domain accounts, uploads his deface and claims to be pro hexor.

Why do you look up to these two the most?

zyklon was a good friend spoke to him everyday but like some said he didn't secure himself enough. Zyklon started with basic SQLi so start there. But keep yourself secure

RyanC - December 2, 2012, 2:22 pm

Zyklon B was a known skid who got caught for being retarded, nothing more.

Jae? - December 2, 2012, 2:26 pm

Now let me guess. You've signed up to Hackforums without a VPN. You're planning to post threads on the sites you have hacked and claim you're safe because you used a VPN to hack them. But

can you see your flaw? Back to step one and start with your anonymity or just don't post any of your hacks without removing your IP from this website and anything linking to your future of hacking illegally.

Also, Zyklon B was a kid who had no idea what he was actually doing. He was sitting around with his brother with his real IP and not clearing logs.

5NiP3R - December 2, 2012, 2:32 pm

Arcane Sky Uploads defaces to his own free hosting sites really??

Anyway, I kind of agree with the op.

Yes, exactly my point.

He got sloppy and eventually got caught.

"Got sloppy", "eventually"? Those words imply that he wasn't always sloppy.

I was implying that he bragged on HF about his hacked sites.

And that's sloppy.

Zyklon B's first thread was him asking how to get arrested for hacking because he thought it would be cool for the police to come and pick him up in front of people so that he looked like a badass.

Do I now? So your telling me I own <http://www.marathonstalk.com> (Gets 50k traffic daily & 1.2m total downloads on there podcast for iTunes, See DL Stats at bottom of there page), I own www.edinburgh.gov.uk (.gov.uk *Derp*), And various other websites? Just because a site is free

hosted doesn't mean its fake you spastic, Free hosting sites get hacked on a daily basis, Your 'Handle' On hackforum's is unheard of, Go make a name for yourself then trash me.

As for dan, Well he hacks Ruinsc4p3z servers with 50 players on a daily basis, He is in no position to trash me either, Also he seems to have some weird hatred for me, Kinda like a childish grudge, Leads me to believe he is definately no older than 18 IRL, So being bitchy & A child makes his opinion irrelevant to me. ?

And as for Zyklon, I have never spoken to him, Seem's like a nice guy, Just fucked up, I don't think he used a proxy (Don't take my word for it), And hacking the USA gov is a way to get V&, Stay away from them & they couldn't care what you do online.

^ Massive skid bragging about owning a few sites.

Get real, that's just a couple of rather small sites you owned with public exploits. I'm sorry to break this for you, but you are nothing special... You are just yet another skid that probably doesn't even

write their exploits by themselves. (Maybe for some simple webapps, but nobody care)

Eh? I also dropped empire staff SSNs, and I wouldn't even consider empire own worth mentioning. Check out HTP zines for example.

Oh wow this guy is 1337, You couldn't even cover your tracks up enough to avoid a ban, What does that say... Like really...? You were banned within like 2 hours, I would hate to see how quick you would get caught for hacking a gov site.

Mistakes? The character is entirely dependant on your shell config.

It's fine, I left this section & have stopped posting my hacks on hackforum's for this exact reason, Kids just hate all the time, I don't consider myself the leader because I hardly ever post here, Like I said, I stopped because its just filled with shit, like Who?. I just prefer to keep them to myself now, And I'm not gonna lie I hardly even hack anymore. Maybe 2-3 site's a week max.

My avatar has been this since I joined in march, I like it, Why not have it? Just because 90% of anon's are lamer's doesn't mean they all are.

I'm not sure why this guy made this thread, Maybe if it was 2 months ago when I used this section...?
