Well, the most I can really do is post the log, which is just text. Other than that, it's just a console application that you'd bind (Or I can bind it to a premade (fake) hack.)

Seems a nice program,you should have made an topic instead selling the cd-keys,you'd make more money like this than selling your own method...

Krizz - January 7, 2013, 4:04 am

Hey I'm interested in this stealer. Hit me up if you are still selling babe.

Management - January 7, 2013, 4:06 am

Seems good, however you should add a UAC bypass like my soon to be arma 2 oa stealer. Good friendly competition though :P

DrewDrops29 - January 7, 2013, 4:44 am

Registry Lock - Locks the registry key, does not allow for re-installation via Steam, or manual (Cracked).

why would you do that?

Hunter S Thompson - January 7, 2013, 10:05 am

So they cannot reinstall, meaning the key actually stays as an invalid key, unless they're able to unlock the registry key.

There's no need.

TheMedigator - January 7, 2013, 11:28 am

Just a heads up, i was selling the same product and omni said it was against the rules and he removed it.

That's weird. I haven't heard anything about it.

If it gets removed, it gets removed. Nothing I can really do about it.
