Plot

A young woman named Fuu is working as a waitress in a tea shop when she is harassed by a band of samurai. She is saved by Mugen, a mysterious rogue, and Jin, a young ronin. Mugen attacks Jin after he proves to be a worthy opponent and they begin fighting one another and inadvertently cause the death of Shibui Tomonoshina, the magistrate's son. For this crime they are to be executed. But with some help from Fuu, they escape, and Fuu asks them to travel with her to find "the samurai who smells of sunflowers."

Review

Samurai Champloo (?????????) Is a very unique and original anime mixing that hippity hop music the kids now days love with the traditional honor and prestige of being a samurai is really something not just out side the box but in a total new box with laced corners and a bow.

Storyline

The story line is is essentially a very common story line in anime but when mixed with that hippity hop and the edo period makes some for unusual. The storyline although seems very serious in itself it would be nothing without the visits to brothels, and the red light district to lighten the mood and of course you can't have an anime without a cock fight can we.

Sound

By far one of the main aspects of this anime that makes it so amazing. The music of SC really sets itself apart from other anime! Not just the music type but the quality and how wow all the background music flows with the scenes nothing seems out of place.

Characters

Fairly generic character set

Main character- Hot headed bad ass that for some reason is borderline invincible

side protagonist- cool/emo quite type that looks pretty and is also seems to be equally as strong as main.

girl- well honestly im not sure why she is here she brings no real fan service apart from like the first episode so i can't really comment on her cause i have no idea why she exists.

The overall character development is pretty dam good tbh they go through the main characters bring up a almost total character change part of the anime. following the origin of each main character is rather entertaining.

Animation

Well is was developed by Manglobe can i really go into any thing more then this. It is an incredibly crisp looking anime with flawless artwork making it just a visual orgasm.. While watching this it was said there were incredible moans seeping out of my room... so nuff said when it comes to this . The art work is just... wow

Summery

There is nothing abd about this anime... I am not going to give it a 10/10 but it does what it is meant to flawlessly. personal i will give it a score of around 9.999999999999999/10.
