This is very simple.

Go on omegle with many cam a one of thoes stupid little vcw things. Ask a horny teen for his phone number. When he says it to you. Type his number into the sms buy for the membership. Then ask the fag for the pin that "you" sent to his phone.

works a lot of the time.

This doesn't really go in-depth, but seems a pretty smart method - not too sure if I know anyone who'd fall for it. :3

Sounds like a good idea. Could you please tell me what you mean by vnc though? (new to hacking and learning about computers). I'm not really sure what to do but I understand what you mean by this guide. Thanks in advance.

This seems more of a social engineering method than hacking but it could possibly work. I don't think I'll be the one testing it out though. ^.^.
