Thread: [\[Feedback needed\] Thinking about starting a C++ class/group for beginners.](#)

Anakin™ - December 4, 2012, 10:22 am

Well, me and [Saobryn](#) were thinking of starting a group for all those who want to learn C++ and have no idea where to start/are lazy to start by themselves/prefer listening to people teach better than reading eBooks. We would be the teachers.

The concept is simple, we will stream classes and after each class you'll get some materials in form of youtube videos/books/chapters/self-written tutorials. You will also get several tasks which you need to finish before the beginning of the next class. If you will have issues, you can contact both of us and we will explain each task if needed.

The classes would be held on Visual Studio 2010.

These classes will be completely free.

The only thing you need is free time and Skype, and willing to learn.

Slackers who won't work would be removed from the group. I know the difference between people who need more time to understand things and people who're lazy and don't want to work.

Classes would be held once or twice per week and would last around 10 weeks maximum, depending on the progress of the group. You would learn the basics of C++ and from there you can advance yourself.

What would you guys think? How many of you would be interested in this?

LevelUp - December 4, 2012, 11:05 am

I'm really interested in learning C++

I'm assuming you will decide on the times suiting to the students needs?

ViciouS - December 4, 2012, 1:00 pm

(Dec 4, 2012 11:22 AM)Anakin™ Wrote: [\[CITE\]](#) Well, me and [Saobryn](#) were thinking of starting a group for all those who want to learn C++ and have no idea where to start/are lazy...

Slackers who won't work would be removed from the group. I know the difference between people who need more time to understand things and people who're lazy and don't want to work.

It sounds like an interesting group that I'm sure a lot of people here will be interested in but are you accepting lazy or rejecting it? First part seems that you will accept lazy and last part seems like you will give lazy the boot.

Anakin™ - December 4, 2012, 2:22 pm

(Dec 4, 2012 02:00 PM)ViciouS Wrote: [\[CITE\]](#) It sounds like an interesting group that I'm sure a lot of people here will be interested in but are you accepting lazy or rejecting it? First part seems that you will accept lazy and last part seems like you will give lazy the boot. I am very sorry for making this unclear.

The first part refers to people who are lazy to start learning on their own. I have edited this part.

The 2nd part refers to people who think learning a coding language is easy and they decrease the overall quality of the whole group with their low effort.

Saobryn - December 4, 2012, 2:23 pm

(Dec 4, 2012 12:05 PM)?DarkZealot Wrote: [\[CITE\]](#) I'm really interested in learning C++

I'm assuming you will decide on the times suiting to the students needs?The times would be arranged to suit both me or Anakin and the person we are tutoring. The times can differ from day to day depending on our time and time of people we are helping. It's all by agreement.

ViciouS - December 4, 2012, 2:44 pm

The 2nd part refers to people who think learning a coding language is easy and they decrease the overall quality of the whole group with their low effort.

No need to apologize. I was just curious. Thanks for clearing that up.

Shim - December 4, 2012, 3:11 pm

And how much experience do you both have working with this language? Those with less than two years of experience with the C++ programming language should not be teaching.

asdfhi - December 4, 2012, 4:38 pm

I need a lot of help in C++ this would be a good for me. I would like to be in the group.

Anakin™ - December 4, 2012, 4:50 pm

I'm very glad that we have a positive response about this.

If more people show interest, we will do our best to help members learn some C++ basics.

Saobryn - December 4, 2012, 4:54 pm

(Dec 4, 2012 04:11 PM)Shim Wrote: [\[CITE\]](#) And how much experience do you both have working with this language? Those with less than two years of experience with the C++ programming language should not be teaching.We have enough experience to teach but thank you for worrying about people on HF. ?

Shim - December 4, 2012, 4:56 pm

(Dec 4, 2012 05:54 PM)Saobryn Wrote: [\[CITE\]](#) We have enough experience to teach but thank you for worrying about people on HF. ?

I wasn't at all worried about the members of this forum.

dunnee - December 4, 2012, 6:11 pm

I would be interested in this, relatively new but I lurk a lot. More of an absorber of information, than a provider. Thank you.

Fortknight - December 4, 2012, 6:31 pm

i would love to join this
it sounds very interesting

_spun - December 4, 2012, 6:49 pm

Yea I'd like to participate in this. I've decent skill in C++ but I'd like to see your approach and learn something a bit differnt. Might also be able to contribute.

I use Eclipse but I don't think thats a big deal.

Shim - December 4, 2012, 7:01 pm

(Dec 4, 2012 07:49 PM)shibby4555 Wrote: [\[CITE\]](#) Yea I'd like to participate in this. I've decent skill in

C++ but I'd like to see your approach and learn something a bit different. Might also be able to contribute.

I use Eclipse but I don't think that's a big deal.

Your skill is far from decent. It's unlikely that you would be able to contribute anything.

Jash - December 5, 2012, 12:15 am

Hi Anakin,

I'd like to know when will you and your friend Saobryn would be starting these classes. It's actually been a couple of years since my last reflex on the field of programming(Vb6, Vb.Net and a couple of web programming languages). I just hope my rep won't be an issue for you, repfucked yes but that was upon the last few years - I want to clarify that I just wanted to learn C++ without even some skid-like motives and such(I mean, coding crypterz and ratz ya knoww). C++ is a part on the college course I am taking right now, well I guess it won't hurt much to have some advanced knowledge right.

Bro, if I can get your skype well it'll be cool.

Anakin™ - December 5, 2012, 6:35 am

I'm happy to see some members interested in this. We're looking for some more feedback first.

This project will not be rushed and we will put great effort in it.

Mohatu - December 5, 2012, 8:39 am

Not a bad idea. However, most classes like this usually fade because members forget class times or the teachers have something better to do. What will you do different?

__init__ - December 5, 2012, 8:47 am

I'd like this too. Hopefully the classes won't be when I'm asleep.

dunnee - December 5, 2012, 8:54 am

Are you UK based? I have no problem being on any time during the week, hopefully that will be when classes are taking place? Really looking forward to this now, I'm a complete novice to C++ closest I've come to learning it is downloading bloodshed haha. Will I need to learn the basics myself before the classes begin?

Dammit Not That Guy -.- - December 5, 2012, 1:14 pm

I really want to join this, and im very willing learn alot :D but whuld it be ok if I used note::blocks for my personal use? and where do you live (not to be creapy, but to find the righth time zones)

skypename: kvernmoen98

gancher - December 8, 2012, 10:39 pm

i would love to be part of that class. i have already started on my own but it would be great to actually have people help me

-Base- - December 9, 2012, 7:51 pm

I would suggest just finding an ebook and reading it. That's what I'm doing now and I've learned most of the basics and almost done the book. Then again I have 4 years of experience in java so things make more sense to me. If someone is looking for c++ to be your first language, I probably would hold back and recommend something like Visual Basic to start out. It can be very difficult for someone new to programming to wrap their heads around all of the concepts.

Koolg223 - December 9, 2012, 8:22 pm

I'd be interested in learning this. I'm moderately experienced with C# and I'd like to improve my skills there by learning some a lower level language. If you guys are putting together a group, sign me up.

WOLGA - December 9, 2012, 9:53 pm

I am highly intrested in this. I am a near absolute novice. However, I have very, very little free time.

FockerPT - December 10, 2012, 4:18 am

I would be interested in learning from a pro :)

Dammit Not That Guy -- - December 10, 2012, 10:11 am

Quick question!;

will this start any soon, or has it just faded away?

Anakin™ - December 10, 2012, 3:27 pm

Been really busy lately.

This will start depending on the interest and our free time. It will start once we get a definite interest of a satisfying amount of members.

To all the people PMing me and asking:

No, we will not teach you how to code Crypters, reFUD them, code bots, loggers, RATs, etc.

This tutorial is for absolute beginners who don't know anything about coding, but would like to start learning. We will teach you the basics of C++ (and coding in general) and will not teach you how to code malware.

We will teach you how to think as a coder and introduce you the world of coding (in C++) trough many examples and tasks.

Dr. Death - December 11, 2012, 12:31 pm

What a thinking.. I am in bro! you got my support :)

I was just looking for a teacher to learn vc..

I know c++ pretty well but i want to move to Visual C++

please let me know when the classes will be started :)

+Affinity - December 12, 2012, 4:39 am

I'd be very interested in this!~

Would the videos be streamed live? Or pre-recorded? As this may be a problem for people living in different timezones.

Thanks

~LikeASir97

Anakin™ - December 12, 2012, 5:53 am

We would both stream our classes live, and afterwards upload the videos to youtube for those who couldn't attend.

+Affinity - December 12, 2012, 5:01 pm

Well, I'd be very interested then. The work we would have to submit, would we get a mark for it? To see how we're progressing?

Also, when do you plan to start the class?

Thanks

~LikeASir97

xkatox - December 12, 2012, 5:36 pm

kinda interested only in advance parts an if their going to b class projects but if it starts with hello.cpp im out

Bean Dip - December 12, 2012, 5:38 pm

This would actually be a good idea, sign me up. :D

c00ldodo - December 12, 2012, 7:25 pm

this sounds pretty interesting
when is this starting ?
how to apply :P ?

Zipp3r - December 13, 2012, 9:33 am

I would like to join the group, when does it start?

I'm new to this board so i'm not able to write PMs...

UnknownP - December 13, 2012, 6:57 pm

Pretty interested in this, though I believe I am past the "basic" stuff, I still need to refresh my memories on C++.

BIG MACARIO 13 - December 13, 2012, 7:09 pm

I Have Expierence In C++ programming But I Am Still Interested If You Wouldnt Mind.

Mr. Programmer - December 13, 2012, 8:19 pm

I'm very interested! when will this start?

thedoctorhamza - December 14, 2012, 5:59 am

(Dec 4, 2012 11:22 AM)Anakin™ Wrote: [CITE](#) Well, me and [Saobryn](#) were thinking of starting a group for all those who want to learn C++ and have no idea where to start/are lazy to start by themselves/prefer listening to people teach better than reading eBooks. We would be the teachers.

The concept is simple, we will stream classes and after each class you'll get some materials in form of youtube videos/books/chapters/self-written tutorials. You will also get several tasks which you need to finish before the beginning of the next class. If you will have issues, you can contact both of us and we will explain each task if needed.

The classes would be held on Visual Studio 2010.

These classes will be completely free.

The only thing you need is free time and Skype, and willing to learn.

Slackers who won't work would be removed from the group. I know the difference between people who need more time to understand things and people who're lazy and don't want to work.

Classes would be held once or twice per week and would last around 10 weeks maximum, depending on the progress of the group. You would learn the basics of C++ and from there you can advance yourself.

What would you guys think? How many of you would be interested in this?

im also interested ,plz tell me when will you start ??

it will be very helpful for me

Anakin™ - December 17, 2012, 11:56 am

I've been replying to PMs regarding this. The interest is great.

I will be opening an official group soon so you guys can apply.

chalk0let - December 17, 2012, 12:04 pm

This sounds like a internet school for coding.

I'm in :3

Lbubeer - December 18, 2012, 2:17 pm

I would definitely be interested in this

Thanks

-Lbubeer

AlwaysLegit - December 18, 2012, 3:44 pm

Finally, I would love to learn how to code and contribute to the hacking community so whenever you find the time possible please via private message me. Thanks in advance for this opportunity.

phazor - December 18, 2012, 3:51 pm

(Dec 18, 2012 04:44 PM)AlwaysLegit Wrote: [\[CITE\]](#) Finally, I would love to learn how to code and contribute to the hacking community so whenever you find the time possible please via private message me. Thanks in advance for this opportunity.

Why would he PM YOU for something YOU want? Please, explain?

Catagen - December 18, 2012, 11:39 pm

I'm not really a begginer, but I would for sure be interested in some more in-depth tutorials. Btw this sound like a really good idea guys, it's nice to see that people want to help others. Cheers! ?

Drizzletoed - December 18, 2012, 11:59 pm

I would love to join this program, I have been looking to take classes in C++ but my uni offers Java mainly. =\

AlwaysLegit - December 19, 2012, 6:55 pm

(Dec 18, 2012 04:51 PM)Dr. Drey Wrote: [\[CITE\]](#) Why would he PM YOU for something YOU want? Please, explain?

Is it your problem?I assume not and I'm interesting in the position and thanked him for giving people this opportunity. I wouldn't have to explain myself if you didn't have to bash on my comment.

buyinsurance - December 20, 2012, 11:09 am

If you guys need some extra help with running this class I might be able to help out. Or if you want some help setting up a more OOP/Data structures class later I can help with that too.

Exile™ - December 20, 2012, 7:54 pm

I would really love to learn! Thanks a ton!! I'm actually really excited for this!

xXHotshot55Xx - December 21, 2012, 9:57 pm

I would be interested as I am trying to learn through e-books and other tutorials, although I usually figure stuff out it's nice to have someone else to help push you into doing it and giving you extra things to work on instead of just coping what is being taught.

Anakin™ - December 22, 2012, 6:44 am

I will be making an official thread next week. All information and instructions will be posted there.

alexlandonflicksss - December 22, 2012, 6:50 am

I would to join this really interested...help please...if you can PM me abt this....thanks in advance...

waiting - December 22, 2012, 6:45 pm

I would definetly be interested.

Please PM me or let me know.

Anakin™ - January 4, 2013, 9:09 am

Kind of a delay, I've been very busy lately and therefore I'm sorry.

We will open the group in the upcoming days.

gamerduck - January 4, 2013, 10:12 pm

im interested too..i think its a great idea..rather than learning from ebooks..thanks for this idea..:)
looking forward to it..

dMiZze - January 5, 2013, 3:57 am

Interested, let us know when you formulate the group!

glob - January 5, 2013, 9:06 pm

I would really love to be in this group! I am in the process of learning this language and help would be pretty nice. Please pm me and I will tell you my skype :)

Mut? - January 5, 2013, 11:11 pm

Is this still going down? I really need to learn c++, let me know. Thanks.

Weary - January 6, 2013, 1:07 am

Please do it! I'm desperately in need of something like this.

Yui Asuna - January 6, 2013, 9:09 am

I'm very interested in this, but since I can't understand/speak English fluently, I think I'll stay with books & written tutorial :(

If some French peoples read this & know C++, be free to PM me :)

Insinuate - January 6, 2013, 8:48 pm

I would join. Seems like a nice place to start learning c++ and would help me as I end up needing to know the whys to why some things are done a certain way.

Anakin™ - January 7, 2013, 6:30 am

The official recruitment thread will be up tomorrow in the Groups section.

We will do 1 class per week as we're very busy lately.

We will do it 2-3 days in the week so people who couldn't attend the class at a certain time, can attend it again in a couple of days.

Also, we're going to try to pick the times so people all around the world can attend, meaning one day the class can be at noon, the other day the class can be at 8PM. We're from Europe and our time is CET (GMT+1).

All attentands should have Skype and Visual Studio 2010.

The classes will last for around 10 weeks, and after that you will know all the basics of C++ if you've went trough all of the homework we will give you, and went to all 10 classes.

Mut? - January 9, 2013, 6:08 pm

Have you guys opened recruitment / the group yet? I don't see it anywhere.

xadamxk - January 9, 2013, 9:44 pm

I would love to join! I have been very interested in learning C++ and this looks like an awesome place to start!

Clark Kent™ - January 10, 2013, 4:25 am

I would love to join this could be a great opportunity

domanga - January 11, 2013, 9:42 am

I would be very interested in joining this group, I'm currently studying C++ at University so this would be a great help!

narutorine - January 13, 2013, 11:06 am

I would love to join this hopefully I'm not too late and missed a class :O

blindern - January 13, 2013, 11:12 am

I'd love to learn but I'm not 100% a beginner in C++, I haven't learned templates or arrays yet if you're interested in letting me learn any way please pm me or skype

daydreamer14002 - January 13, 2013, 8:07 pm

I would be very interested to learn more of C++, but are there qualifications to join? and I can't seem to find the thread in groups

SpockIndustries - January 15, 2013, 4:26 am

I would like to join the class but I only have free time during the week end :(

?lassy - January 15, 2013, 4:27 am

You have to be patient as hell.

Noobs New people tend to be annoying as fuck with questions. :)

narutorine - January 16, 2013, 4:23 pm

So any updates on when the thread is going to be up? :O
