Thread: [\[Preview\]\[SkypeKit\] Advanced Resolver | Exploiter | Tool](#)

MalwareMop - December 5, 2012, 12:23 am

This is the preview to the release of SkypeKit which will be released shortly.

Some features include:Contact Calling

Contact Messaging

Contact Spam Message

View Contact Profile

View User Profile (Not friends)

Identify Callers (Identify's all caller's that you're connected to)

Google Maps

Pinger

IP Resolver (Tracer)

Spoof Contact (Pose as a contact; view profile is the spoofed contact)

Spy (Listen to users audio without them knowing)

Plenty more...

Pictures:

Spoiler [\(Click to View\)](#)

This product will be sold, it will not be for free.

Developer(s):

Inclement

?UnReLaTeD

TrackPro+ - December 5, 2012, 12:26 am

How much will you be selling it for ? and good job mate ;)

log dot zip - December 5, 2012, 12:45 am

I can vouch for this, I have seen it in action. It's the best resolver, period.

TrackPro+ - December 5, 2012, 1:07 am

Do you know how much the price will be? I wanna earn some money to buy it :p

.Hitman - December 5, 2012, 1:07 am

This looks incredible buddy, good work! I'll keep an eye out for this!

Pops - December 5, 2012, 2:03 am

Looks incredibly good! They are being released for free in v3 of my skype tool though...

PedroDJ - December 5, 2012, 2:04 am

Very interesting: let me know when the tool will be ready :)

MalwareMop - December 5, 2012, 2:30 am

Excuse me, what's being release, features from my project?

xXx1337xXx - December 5, 2012, 3:35 am

Woow, nice!!

You make a lite (free) edition?

mullinupp - December 5, 2012, 5:51 am

this one looks very interesting Inclement, i really liked the exploits features :P

Jeff. - December 5, 2012, 7:01 am

I've seen another Skype tool with the same name. @

<https://hackforums.net/showthread.php?tid=2629971>

But this is more focused on the resolving IP's part of Skype I think. Good luck with the project I hope that this is worth the buy because of there are allot of free alternatives so I hope the program is unique and good luck with the sales ! :]

Razza™ - December 5, 2012, 10:15 am

Looks sick bro, keep it up!

- Omgrazza.

MalwareMop - December 6, 2012, 9:45 am

(Dec 5, 2012 06:51 AM)mullinupp Wrote: [\[CITE\]](#) this one looks very interesting Inclement, i really liked the exploits features :P

Thanks, this are features that not many have. The exploits are done using private code.

mullinupp - December 6, 2012, 10:14 am

Good because i hate to see this one become the usual skype tool (everyone) is releasing ^_^. My meaning is, that its nice to see some new stuff for a change.

Are you going to post a demonstration vid later would be neat to see in action ^_^
Take care

Pat. - December 6, 2012, 10:26 pm

Vouch for the product, seen it in action on skype.

maxkaxx - December 7, 2012, 7:22 am

The spy function sounds awesome!
does someone know how it works ? and nice program there ! :)

do you even lift - December 7, 2012, 7:43 am

Kiss my ass, i'll write a better one and release it for free. fucking idiots

maxkaxx - December 7, 2012, 8:11 am

hehe yeah do dat!
and don't forget the spy mode.
pm me when it's done! ?

MalwareMop - December 7, 2012, 8:14 am

You're not going to create shit, (my little incentive for you to actually create something because you wouldn't of picked up on it), you make me laugh, start coding away, you'll need in novice.

As for you, haha. You're a foreign idiot, I mean this sincerely.

What does the Spy feature do? Funny you ask!

The Spy features allows me to remotely have sexual intercourse with you, with only the use of Web-requests.

It sounds like you have problems.

and why would not he be able to make a better program then yours? I mean you made one so he probably can make one better.

and what i mean with "how it works" question I wondered how it could "spy" on some one, and if you need to send them something etc.

MalwareMop - December 7, 2012, 8:50 am

How does it work, I'll explain what it does, but not how it works.

SPY: Enables the user to listen to the Other user, while he or she has no idea, almost like a RAT.

Dw parsing the debug log isnt hard you must have the intelligence of an apple

MalwareMop - December 7, 2012, 10:55 am

(Dec 7, 2012 11:15 AM)do you even lift Wrote: [\[CITE\]](#) Dw parsing the debug log isnt hard you must have the intelligence of an apple

Alright dude, that's obviously the only thing I've done in this project.

7amndy - December 7, 2012, 11:15 am

Very nice that you share this! Can you send it to me? Thanks!!

mullinupp - December 7, 2012, 12:07 pm

if you are talking to Inclement he did say this :P
or i just misunderstood this ^_^

iCorb0 - December 7, 2012, 2:16 pm

will the source be sold at all :O this is very interesting

do you even lift - December 7, 2012, 2:56 pm

(Dec 7, 2012 11:55 AM)Inclement Wrote: [\[CITE\]](#) Alright dude, that's obviously the only thing I've done in this project.

That is the only thing that this program requires. the rest is basic knowledge ?
